correct?

A. Yes, it is.

works there, as well as her husband.

Q. And there are members of the next

generation working in the Clayton Group; is that

A. Yes, my -- two of my three

children work there and my brother has a child that

Page 298 1 hearing. 1 Toronto, Ontario, 2 2 --- Upon resuming on Tuesday, February 20, 2018 We are going to have the 3 3 at 9:31 a.m. cross-examination of claimants' witnesses Mr. 4 DR. PULKOWSKI: Good morning 4 Clayton, Mr. Forestieri and Mr. Estrin and I think I 5 5 will give the floor to Mr. Nash for the direct. everyone. Before we go on the record, just a quick 6 6 housekeeping matter the tribunal has asked me to MR. NASH: Thank you, Judge Simma. 7 7 take up with the parties. Good morning. 8 8 I'd just like to know that today, as PRESIDING ARBITRATOR: Before -- not 9 anticipated, we do not have any viewer in the public 9 to forget that the declaration that witnesses will 10 viewing room and we've thus asked the technicians to 10 have to... 11 turn off the feed to the public viewing area. 11 MR. NASH: So, our first witness is 12 Should that change during the course 12 Bill Clayton who we would call up now. 13 of the day, we'll certainly let you know but for now 13 PRESIDING ARBITRATOR: Okay, yes, 14 we would expect that nobody is in the room next door. 14 please. 15 The tribunal would still suggest that 15 MR. CLAYTON: Good morning. 16 we continue to identify confidential information to 16 PRESIDING ARBITRATOR: Good morning, 17 the extent that is possible in the course of the 17 Mr. Clayton. You should find -- you have before you 18 direct and cross-examination because that will 18 the declaration and could I ask you to read it 19 significantly facilitate the editing of the 19 please. 20 transcript and of the videos later. But certainly 20 MR. CLAYTON: I solemnly declare upon 21 there would be a scope for making small amendments 21 my honour and conscience that I will speak the 22 and extending or limiting confidentiality later on if 22 truth, the whole truth and nothing but the truth. 23 that were necessary. Thanks. 23 AFFIRMED: RICHARD CLAYTON 24 PRESIDING ARBITRATOR: This having 24 PRESIDING ARBITRATOR: Thank you very 25 been said, we will open the second day of the 25 much. Mr. Nash. Page 299 Page 300 1 1 MR. NASH: Thank you, Judge Simma. Q. And your two children who work 2 EXAMINATION IN-CHIEF BY MR. NASH: 2 there are Casey and Jennifer? 3 Q. You are William Richard Clayton? 3 A. Yes. 4 4 A. Yes, I am. Q. What does Casey --5 Q. And you've signed two statements 5 MR. SCOTT LITTLE: Excuse me, Judge in the damages phase of this arbitration? 6 6 Simma, I think we are already diverting from the 7 7 A. Yes. procedural order with respect to the introduction of 8 the witness. It's supposed to be a brief 8 Q. And your first witness statement 9 is December 15th, 2016 and your second is 9 introduction of the witness and any clarifications August 21st, 2016 -- 2017? 10 10 or corrections to witness statements and we're 11 A. Yes, it is. 11 getting into evidence that I'm not even aware of as 12 Q. And you are still operating the 12 having been mentioned in the witness statements. 13 Clayton Group of companies along with your brothers 13 MR. NASH: It's a brief introduction. 14 14 Just to give some --Doug and Dan? 15 15 A. That's true. PRESIDING ARBITRATOR: It's not going 16 16 Q. And the Clayton Group is still a going to be --17 17 family business, owned and operated by you and your MR. NASH: It's ten seconds.

do for the Clayton Group of Companies?

A. She's in sales.

office with me.

do?

	Page 301		Page 302
1	Senior?	1	please let me know and I can repeat it or rephrase
2	A. Yes, he is.	2	it.
3	Q. Does he still go to the office?	3	We've put a small binder of documents
4	A. Yes, he goes in every day.	4	in front of you. These are documents that I'm going
5	Q. And how does he get there?	5	to be asking you questions about today, though if we
6	A. I drive him in. He's 89.	6	need a different document to understand something,
7	Q. Thank you very much, Mr. Clayton,	7	we can also have it pulled up.
8	those are my questions.	8	Do you have your witness statements
9	PRESIDING ARBITRATOR: My guess is	9	with you, sir?
10	that Mr. Clayton doesn't have any corrections to	10	A. No, I did not bring anything with
11	the witness.	11	me.
12	MR. NASH: That's correct.	12	Q. I think we can provide you with a
13	CROSS-EXAMINATION BY MR. LITTLE:	13	copy.
14	Q. Good morning, Mr. Clayton.	14	When I refer to documents in the
15	A. Good morning.	15	binder that's this front of you, I'll be noting the
16	Q. My name is Scott Little. I'm	16	tab number in the binder and the exhibit number for
17	counsel for the Government of Canada. We met back	17	the record. Okay? And just so you know and Mr.
18	in the liability phase of the arbitration. We met	18	Nash knows, while I have a few questions that would
19	in the elevator last night. I recognize that you	19	be classified as public, I anticipate it will mostly
20	gave testimony back in 2013 and you know how this	20	be classified as confidential and we'll be switching
21	all works, but just so we're on the same page. I'm	21	into shortly probably for the duration.
22	going to ask you a few questions so I can understand	22	So I want to just first start off,
23	the fact testimony that you've provided in your	23	Mr. Clayton, by going over some of the corporate
24	witness statements.	24	entities that we've read about in the claimants'
25	If you don't understand a question,	25	written materials so I have a handle on those.

And Bilcon of Nova Scotia was incorporated in Nova Scotia in 2002? A. Yes. Q. And the purpose of Bilcon of Nova Scotia was to establish and then operate the Whites Point Quarry and Marine terminal; correct? A. Yes, it was. Q. All right. There's another company in the Clayton Group that you refer to in

Page 305

A. Yes, Amboy Aggregates was a joint
venture located in South Amboy, New Jersey which
mined sand off the coast. We were the only company
on the east coast that mined off the coast.

Q. Okay. Can you turn to -- it's in
your binder at Tab 2 and that's paragraph 27 of the
first witness statement of Tom Dooley. I'm just

Now, in paragraph 27 Mr. Dooley describes Amboy aggregates and if you look at the second sentence of paragraph 27, as he states:

information about how Amboy fits in.

taking you there because Mr. Dooley provides some

"It is the principal -- Amboy Aggregates principle business was to supply natural sand products for use in the production of concrete to the New Jersey market, particularly in northern New Jersey."

Is that on a accurate description of what Amboy did?

A. Amboy Aggregates, South Amboy is based in north Jersey and they definitely sold a lot of sand in north Jersey but they also sold a lot of sand by barge to barge customers in New York City.

Q. All right. Looking at the first sentence of paragraph 27, this, I think confirms

something that you mentioned earlier. Mr. Dooley writes that Amboy was formed in 1989 as a joint venture which you told me, and that joint venture was between Clayton Materials and a company named Great Lakes Dredge and Dock Company, would that be accurate?

A. Yes, Great Lakes was 50 per cent owner and they were out of Chicago.

Q. Okay.

A. They were actually there before us with another partner and we in '89 bought out their other partner.

Q. Now, Clayton Materials and I believe the full name of that company is Ralph Clayton & Sons Materials; is that correct?

A. Ralph Clayton & Sons is the concrete company that we run.

Q. Okay. Would that be Clayton Materials then?

A. Materials is another company.

Q. All right. So, when Mr. Dooley is referring to Clayton Materials in paragraph 27, that's a different company then than Ralph Clayton &

Sons Materials; is that correct?

A. Yes, I -- that is a company that

Page 307

was the partner in Great Lakes Dredge and Dock -- I'm sorry, in Amboy Aggregates.

Q. Clayton Materials was?

A. Yes.

Q. And Clayton Materials is different than Ralph Clayton & Sons Material; is that correct?

A. Yes, another LLC.

Q. All right. To be clear, I think you were clear about that, great Lakes Dredge and Dock Company was not owned in any way by the Clayton Group?

A. No, that's a large -- one of the largest dredging companies in the world out of Chicago.

Q. This would be where I'd turn to confidential.

Page 308

--- CONFIDENTIAL SECTION BEGINS AT 9:43 A.M. BY MR. SCOTT LITTLE

Q. If you could turn please to Tab 3, sir. This is Exhibit C-1050 for the record and it is the Amboy Aggregates Joint Venture Agreement.

If you look at the first line it appears that the Joint Venture Agreement is dated January 1989; is that correct?

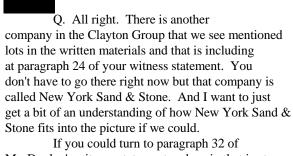

A. Yes, that's what it says.

Q. Okay. If you can turn to page

1050-006.

1 2

Page 309

If you could turn to paragraph 32 of Mr. Dooley's witness statement and again that is at Tab 2 of your binder.

A. Thirty-two.

Q. Now, Mr. Dooley, he was the sales and marketing manager of New York Sand & Stone; correct?

A. Yes, Tom Dooley was New York Sand & Stone. He was the one that made it work.

Q. And in paragraph 32 if you look at the first sentence, Mr. Dooley states that:

"New York Sand & Stone was formed

in 1998 by Amboy Aggregates and a company by the name of New York Sand."

Is that accurate?

Q. So New York Sand was a joint venture then between Amboy Aggregates which the company we just discussed and another company called New York Sand?

A. Yes.

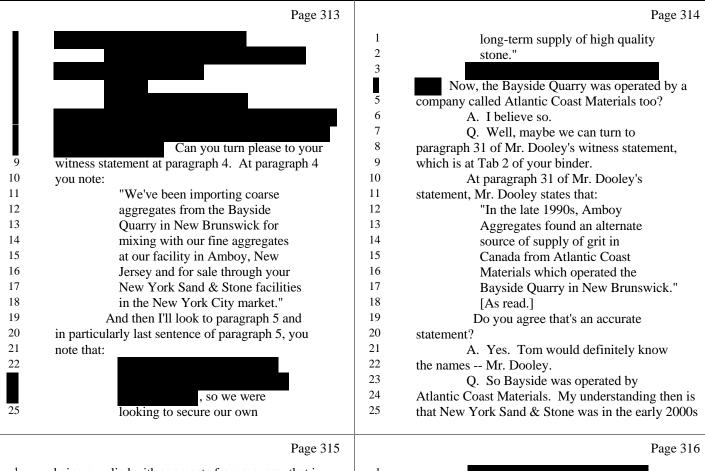

Q. If we could turn to Tab 4 which is Exhibit C-1015.

And this document is entitled "Operating Agreement of New York Sand & Stone." If you could turn, please, sir, to page 15 of that agreement. I'm sorry, page 15 on the actual agreement itself.

(613) 564-2727

Q. I have a couple of more questions on New York Sand & Stone and these relate to its purpose vis-a-vis the Whites Point Project.

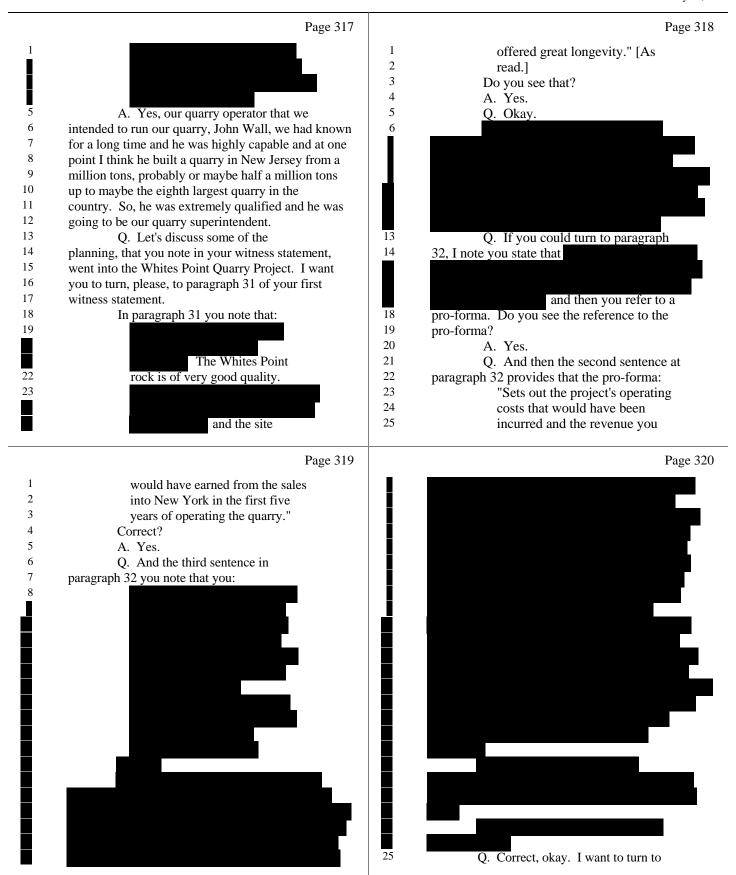

If you could turn to paragraph 51, please, of Mr. Dooley's statement. Actually paragraph 50, I'm sorry. Here Mr. Dooley states:

Is that an accurate statement? A. I would like to think so.

Q. In fact, Mr. Dooley in paragraph

51 notes that:

1

the pro-forma that you mentioned in 32 at Tab 5 and it is Exhibit C-1046 for the record.

If we look at the front page of the pro-forma that sets out the operating costs and revenues you would have incurred, the date on the pro-forma is December 7th, 2016; correct? Front page?

A. Oh, yes. Yes.

Q. So this pro-forma is not a document that was prepared back in the planning stages of the Whites Point Project; correct?

A. That's correct.

Q. This document was prepared for the purposes of this phase of the arbitration?

A. Yes.

Q. Okay. Now, I understand that the pro-forma was prepared by a Mr. Dan Fougere; is that right?

A. Yes, Mr. Fougere was a person who worked for, like, 15 years for Martin Marietta at their Nova Scotia quarry. And what I've seen in these -- in this process is that the quarry that he ran for Martin Marietta

shipped down the east coast to the US.

O. Okay. Mr. Fougere has filed two

Page 322

witness statements in this arbitration I believe.

Can you turn to Tab 6 which is the first witness statement of Mr. Fougere.

At paragraph three Mr. Fougere says from 1998 to 2011, as you've noted, he says:

"I was administrator manager of the Porcupine Mountain Tidewater Quarry located in Auld's Cove, Nova Scotia owned by Martin Marietta." [As read.]

So Martin Marietta I'll ask a question

about them,

Q. And then looking at paragraph 10 of Mr. Fougere's statement, he says:

"Since 2011 I have served as director of finance for the Sisters of St. Martha in Antigonish, Nova Scotia."

22 So just looking at these two 23 paragraphs during the time in which Bilcon was 24 planning, he was never employed by Bilcon group of 25 companies; is that correct?

Page 323

A. No, he never worked for us.

Q. Let's look back at the pro-forma at Tab 5. I'd like you to turn to page 3 of the pro-forma, 1046-003.

At the top of that page under the heading "Annual volumes", and that's production and shipment volumes. Here we see that you say you planned to produce and ship certain volumes from the Whites Point Project in the first five years of the project. Those volumes are reflected there on the production and shipment rows.

Now we were interested in the back up for these numbers and we made information requests for this and other data in the claimants' witness statement during the arbitration. And if you could turn please to Tab 7 of your binder, which is Exhibit C-1342 for the record. Are you there? Are you at the front page?

A. Yes.

Q. So, this is a letter from Mr. Nash to the Tribunal setting out the claimant's responses to Canada's information request. I'd like you to turn to page 11 please.

[As read.]

A. I didn't know that but yes, that's what it says.

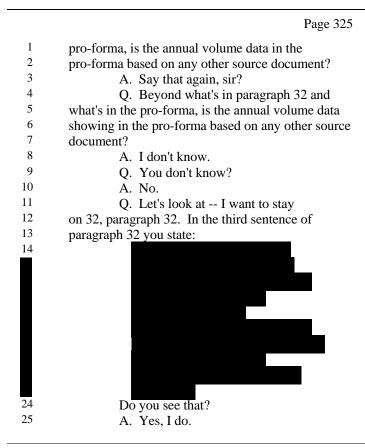

Q. If you look back to paragraph 32 of your witness statement, in the beginning of the third sentence you state -- sorry I'll wait for you.

There in paragraph 32 beginning of the third sentence you state:

A. Yes.

Q. So beyond paragraph 32 and the

Page 326 Q. If you can turn please to Tab 9 of your binder, and that's a documents that Exhibit R-7.17 for the record. This is a business plan for the Whites Point Quarry prepared by Clayton Concrete. And looking at the front page, it appears to have been prepared in April of 2004; correct? A. Yes. Q. If you could turn three pages in on this document, please. A. 504? Q. Sorry, 502. It is the third page of the document. You will see a heading entitled "Operations" and it provides:

20

21

22

23

24

25

O. Okay, Let's turn to Tab 10

Q. Okay. Let's turn to Tab 10 please, which is Exhibit R-581. This tab contains excerpts from Bilcon's Revised Project Description for the Whites Point Project.

It is dated November 2006. If you could please turn to page 19 which is the first document, the first page in. We've just provided excerpts.

A. The first page?

Q. Yes. One second. Actually, it is page 19 I would like you to go to, sir. Are you there?

A. Yes.

11

12

13

14

15

16

17

18

19

20

21

22

23

24

25

(613) 564-2727

Q. If you could read the first two sentences of the second paragraph. I'm sorry, the third paragraph starting:

"Land-based..."

"Land-based [quarries] of this type of massive, hard volcanic flow of basalt rock generally includes drilling and blasting rock faces. This means is considered to be the industrial standard for this type of basalt to produce the proposed production of 2 million tons per year." [As read.]

Q. Okay, can you please turn to page 40 of this document?

A. Yes.

Q. If you read the second sentence of the paragraph beginning with the words "Various" or the word "Various". It is the second-last paragraph on the page?

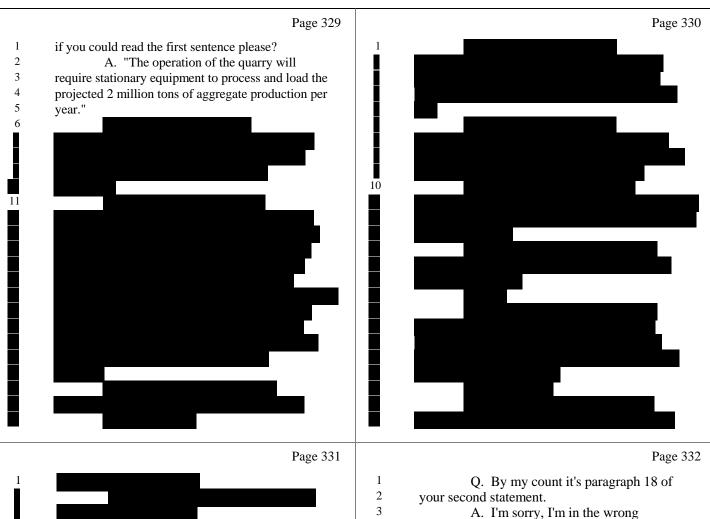

A. The second sentence?

Q. Yes.

A. "Approximately 40,000 tons is planned to be shipped each week for a total of 2 million tons per year."

Q. Okay, and then on page 96 of this document under the heading "Stationary equipment",

Page 328

Q. Let's turn to paragraph 28 please

Q. Let's turn to paragraph 28 please of your first witness statement. Are you there?

A. Yes.

(613) 564-2727

Q. The first paragraph of paragraph -- sorry, the first sentence of paragraph 28 you state:

"We had experience with other quarries so we knew what we were getting into." [As read.]

Now I'd like you to look at paragraph 18 of your second statement please. I'm looking at the second sentence of paragraph 18 and you state:

"We had extensive experience in operating aggregate operations. We were already importing stone from Canada for sale in New York City, and for use in our sand dredging operations." [As read.]

A. Is that number 18?

place.

Q. I will give you a chance to get there.

This is your second witness statement in that book.

A. Is it on page 5?

Q. Yes, it is.

A. Okay.

Q. So second sentence of paragraph 18. You state:

"We had extensive experience in operating aggregate operations. We were already importing stone from Canada for sale in New York City, and for use in our sand dredging operations." [As read.]

Can you see that?

A. Yes. Yes.

Q. Turn please to Tab 11 of your binder and that's Exhibit C-154. This is the June 16th, 2007 transcript of your testimony at the JRP hearing.

Page 333 Page 334 1 1 I'd like you to go to page 133. didn't have any experience running a project with an 2 2 international marine shipping component, did they? These are excerpts obviously. It is four pages in. 3 3 At the top of page 133 you will see A. Yes, we did. 4 that the chair of the JRP asks Mr. Buxton a question 5 and Mr. Buxton's response. The chair asks: "So it's correct to say that this 6 7 would be their first 8 international operation in which 9 they will be starting it up and running it; is that correct?" 10 11 And Mr. Buxton states: "That's correct." 12 13 So, on the basis of your testimony of 14 your project manager, is it correct that the Whites Point Project would have been the first international 15 16 course aggregates quarrying project that the Claytons 17 operated? 18 A. Yes, it would be the first 19 international operation that we had operated, but a 20 quarry is the same in New Jersey as it is in Canada. 21 Q. Okay. 22 A. So, the fact that it's the first 23 international, I don't really see where it really 24 makes any difference. 25 Q. Well, so the Clayton Group, they

JRP asks Mr. Buxton:

15

16

17

18

19

20

21

22.

23

24

25

(613) 564-2727

Clayton companies have

Page 336

They operate three sand pits in New Jersey. They also operate a fairly major dredging operation which actually dredges New York harbour and the aggregates are landed. To my knowledge they have little experience as a corporate entity with course aggregate mining." [As read.]

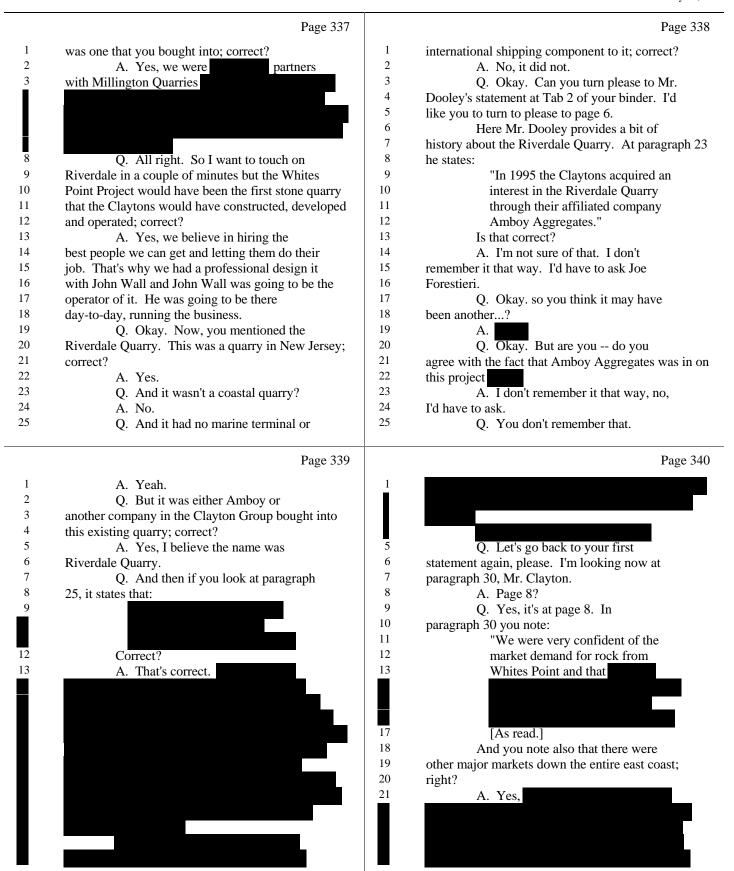

So, do you agree with the words of your project manager here before the JRP that the Clayton Group had little experience as a corporate entity in the operation of a course aggregate quarry?

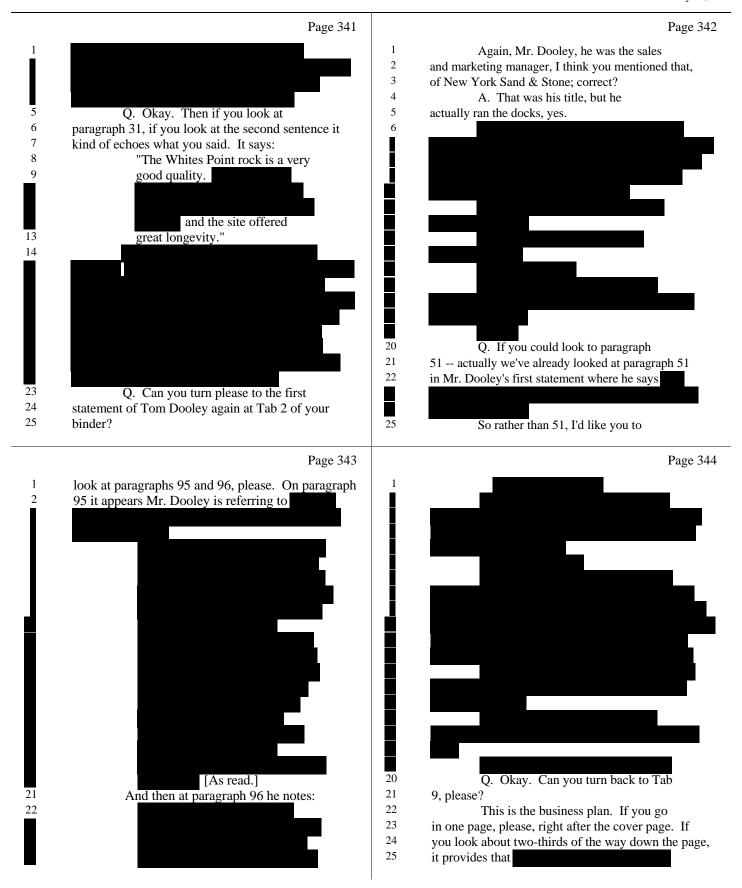

a quarry in A. We owned New Jersey, Riverdale Quarry with Millington Quarries was our partner which is where we first experienced John Wall working directly for us, and Tom Dooley who was the sales manager at Riverdale Quarry, and Mr. Buxton was the mine superintendent.

Q. Mr. Buxton was the --

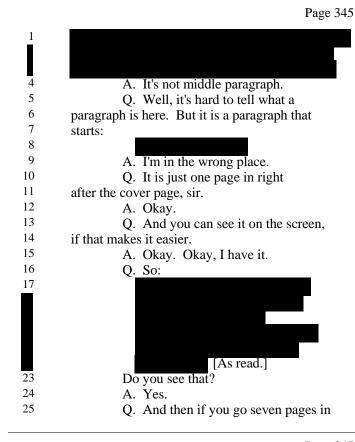

A. I'm sorry, Mr. -- I've lost the name. I have his thing right here. John Wall was the mine superintendent.

Q. Okay. So, the Riverdale Quarry

Page 348

and I'll give you the page number. It is BIL012506. And under a heading at the bottom of the page called "Revenues"?

A. Yes.

Q. Let's look at -- I want to look at a couple of documents that were prepared for the JRP process. And I'd like you to look please to Tab 12.

Tab 12 is an excerpt from volume 1 of the Environmental Impact Statement prepared by Bilcon in 2004 for the EA of the Whites Point Project and it is Exhibit R-575 for the record.

I have provided some excerpts from this doc. And if you could look to page four, four paragraphs down, it states that:

> "Bilcon will ship by common carrier the crushed rock and grits to New Jersey for use by its parent company, Clayton Concrete Block and Sand in the manufacture of concrete and concrete block." [As read.]

23

24

25

(613) 564-2727

Q. Right under the heading it states -- the heading 10.04 states:

"The development of the Whites Point Project by Bilcon is designed to supply Bilcon's parent company, Clayton Concrete Block and Sand, with washed aggregates to be used in the current concrete and block operations in New Jersey." [As read.]

So that was never your intention?

A. The term "Clayton Block Concrete and Sand" is kind of a generic term for our company which is made up of 33 companies. When you look at our logo, it says "Clayton Concrete Block and Sand".

Q. Turn back to Tab 10. This is the revised product description that we looked at earlier and it's Exhibit R-581 for the record.

I'd like you to turn, please, to page 7. Here we have a long description of the purpose of the Whites Point Project. I will have it highlighted on the screen and I'd like you to just read that please for the record.

A. Second paragraph?

Q. Yes, it appears on the screen if you'd like to --

A. (Reading):

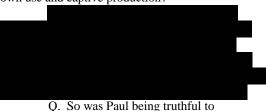

"Bilcon of Nova Scotia Corporation is a private, family-owned business. Its parent company, Clayton Concrete Block and Sand manufactures concrete products in New Jersey.

	Page 349		Page 350
1	Bilcon needs a source of raw	1	essence the stability of a
2	materials that is not subject to	2	guaranteed market eliminates the
3	market fluctuations or market	3	instability of the competitive
4	disruptions. Their development	4	marketplace which has contributed

23	control their own supply of	23	in the future." [As read.]
24	aggregate exclusively for Clayton	24	
25	concrete block and sand. In		

Page 352

So first question: Would you agree with me that Bilcon repeatedly represented in its EA documents and as late as June of 2007 to the Joint Review Panel that the purpose of the Whites Point Quarry was

but rather to ship the stone exclusively to New Jersey for the Clayton companies own use and captive production?

Q. So was Paul being truthful to regulators or --

A. I think he was mistaken.

Q. Okay. Those are my questions.

Thank you.

PRESIDING ARBITRATOR: Thank you, Mr.

23 Little. Mr. Nash?24 RE-EXAMINATI

RE-EXAMINATION BY MR. NASH:

Q. Mr. Clayton, was Mr. Buxton

employed in New Jersey or New York?

A. No, he worked out of his office in the Digby area.

Q. Was Mr. Buxton intimately familiar with all of the internal operations, all of the companies of the Clayton Group of companies when he was doing work for you in Nova Scotia?

A. Paul was inundated for a handful of years in trying to get this EIS approved and he had his hands full preparing this five year journey he was on which consumed his time.

He worked out of his Digby area office and a little bit into it he worked out of the Bilcon of Delaware office which was in that town. We opened an office there to have a place to meet. And so John Wall would go up in the early stages almost weekly or bi-weekly until he finally moved there in '06. And Paul was working very hard at keeping up with the requests for new studies, new findings. I forget the number of the count that it went up to. It was incredible but, you know, we had given him instructions that it's pretty much carte blanche, get the best people that you can find to answer the questions as they come up because the --to us, it seemed normal at the time. As they came

up with questions it was something, okay, we have to address this question. It is another study. And we gave Paul permission to go ahead and find the best people that were available at the time to try and get it done.

Well, that went on for four and a half years or something like that, so he was quite busy. He did make trips down to visit us now and then but he was pretty much consumed in the Nova Scotia market.

Q. Did you have an understanding at what stage of the development of the Whites Point Project the EIS was prepared? You've been asked questions and pointed to the EIS. You've referred to the 40,000 tons. You've been referred to the 2 million tons.

A. It was quite early -- it was quite early in the process that he was having to prepare the EIS and the business questions that were, in my opinion, included in that were very preliminary stuff that he was just using to get this EIS prepared to be finished and presentable.

It was never -- I mean, what is in the EIS is not a business plan. It is Environmental Impact Study and the business plan developed later. Page 354

I mean, this is -- you don't put a full business plan in an EIS that something that you're not sure how many years it's going to take you to even get heard.

O. You were referred to the Global Quarries Business Plan in one of the tabs of the binder that was put before you. Do you know for what purpose that document, which is called a "business plan" was prepared and who prepared it?

A. I don't recall, but if -- if the name was Global Quarry, it had to be very early into the project because Global Quarry was a name that was used when we had a joint venture partner there and I think the same year we got put to a Joint Review Panel we had to buy out that partner which was the other half of Global Quarries

So we bought him out and took it forward ourselves through the Joint Review.

Q. And who prepared, to your knowledge, the document called the EIS?

A. Paul Buxton pretty much was doing all of the leg work up there. We had no time to go up there and help him or participate. He was our man on the ground there who happened to be, lucky

Page 355

for us, a local engineer who had worked there for maybe 40 years or something. He was the engineer to go to in the area. Any project that had gotten done in that area basically was done by Paul. And we actually found Paul through our joint venture partner who we bought out and it was just a stroke of luck because Mr. Buxton turns out to be probably the most honest man I've ever met and he treated every penny of our money like it was his own. So it was a unique find by sheer luck, so, but he was very good for us.

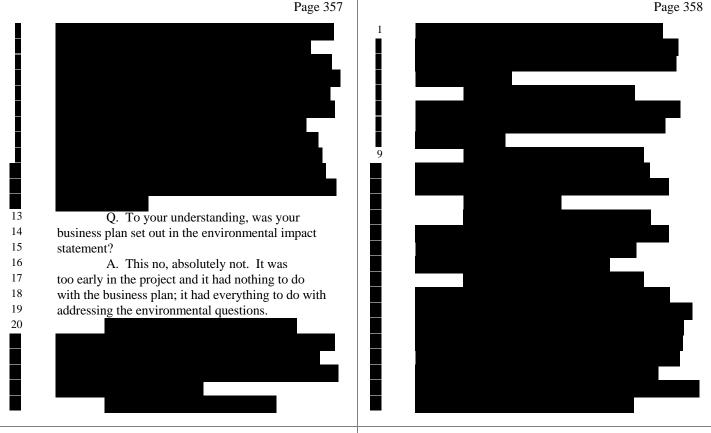

Q. You've been referred to the EIS, the project description which refers to one of the Clayton companies. To your recollection, did you ever have discussions with Mr. Buxton about the details of which company exactly would be purchasing the stone from Whites Point? Where it was located and exactly where it would be going?

A. I don't recall having that conversation. It may have taken place, I don't recall. But, like I said, Paul's total focus was on trying to get clear of this Environmental Impact Study which we felt, and I think we proved, that had we given it enough attention and with the right experts, that we could prove that we could in the

Page 356

end mitigate any of the problems that they had thought would come up. And I believe even, you know, with the way the Joint Review Panel conducted itself, they were so desperate to turn this down had they been able to poke holes in any of our finding, they would have. Instead, they took a more difficult path. And it is my understanding that the departments of the Canadian government that were involved in -- normally involved in the course of such an undertaking, there wasn't one person in the Canadian government that told that Joint Review Panel that they thought that this quarry should be rejected.

Page 360

Q. I think you drew a blank on John Wall's name earlier?

A. I did.

Q. And can you just comment on that and then you pulled something out of your pocket I noticed. Can you comment on that please?

A. Well I had a -- I blanked out on a guy I know forever.

This was just a -- I had a thing here that was given out at John's funeral. It is a memorial of him.

Q. How long have you known John Wall?

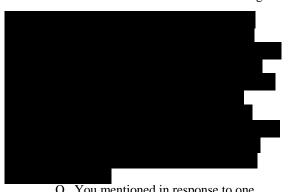

A. I don't remember exactly the year, but it was -- we've known him a long time and he was a very -- he was very accomplished at his job. He worked his whole life in quarries, and he was tireless. He worked -- I mean, that's why he died. He had congestive heart failure and he came out of the hospital and they told him he needed to take some weeks off and he went right back to work 12 hours a day and he died.

Q. You were asked about the

experience that you've had in an international setting and Mr. Little asked you about this being your first international venture. Was there anything about this particular project, including the plant, a marine terminal, shipping, receiving, the crushing, was there anything about this that you didn't know?

A. No. Like I said to Mr. Little, you know, a quarry looks the same in Canada as it does in New Jersey when they actually get built. And when you hire the right people like John Wall, and our people that design the plant from scratch through all the revisions to get it the way John wanted, you need to hire the best people and let

Page 361

Q. You mentioned in response to one of Mr. Little's questions about your experience in ready-mix concrete. What is ready-mix concrete?

(613) 564-2727

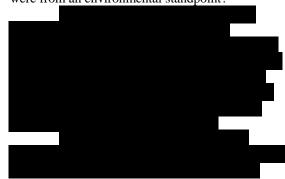

A. The, you know, the ready-mix comes from the term where you load the truck and the truck is spinning. You see them on the streets here. They are mixing the concrete while it's on the way to the job, so it was ready-mix was a term, a very old term. It's just the concrete business.

Q. And when your father started the business, had he had any experience at that very point in ready-mix concrete when he started back in the '50s?

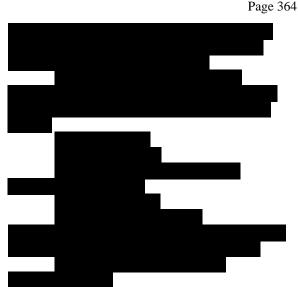

A. No. We were in a very remote

area and nobody had any experience with ready-mix concrete because it didn't existed. There was one other operator in the county. The cities had ready-mix concrete but the rural areas, it was still done by hand. When you dug a footing, the material that came out of the footing, you mixed with bag cement and it went right back in the hole again. That was the footing. So ready-mix concrete was kind of a new concept when he first got into it. It was early '50s.

Q. So, when Mr. Buxton -- I think you said that he made a mistake in the EIS. What did you understand the implications of that mistake were from an environmental standpoint?

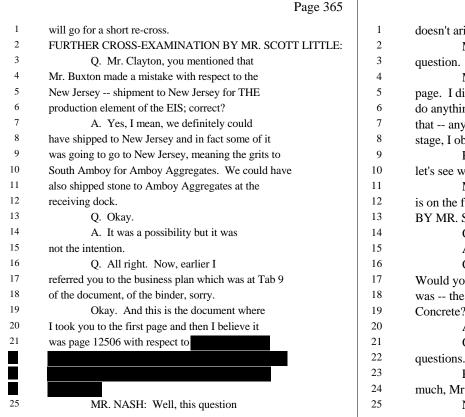

Q. Thank you, Mr. Clayton. Those are my questions.

PRESIDING ARBITRATOR: Thank you, Mr. Nash. I see Mr. Little looking at me, but not asking for anything; is that correct?

MR. SCOTT LITTLE: I did have one follow-up question.

PRESIDING ARBITRATOR: Okay. So we

Page 366 doesn't arise from anything I asked Mr. Clayton.

MR. SCOTT LITTLE: I have one

question.

MR. NASH: I didn't take him to that page. I didn't take him to the pricing. I didn't do anything with respect to that. So I object to that -- any question about this document at this stage, I object to.

PRESIDING ARBITRATOR: Mr. Little, let's see what you have to say and then ...

MR. SCOTT LITTLE: My only question is on the first page of the document.

BY MR. SCOTT LITTLE:

Q. The very first page.

A. Yes, I'm --

Q. No, the very first page, sir.

Would you agree with me that it states that it was -- the business plan was prepared by Clayton Concrete?

A. Yes, that's what it says.

Q. Okay. Thank you. Those are my

PRESIDING ARBITRATOR: Thank you very much, Mr. Little.

Next point would be are there

questions from the Tribunal? I have a couple of questions to Mr. Clayton.

PRESIDING ARBITRATOR: ... (off record comments). The entire exercise has been going on for nine years, I think --

MR. CLAYTON: We've been at it 17 --PRESIDING ARBITRATOR: -- for us. QUESTIONS BY THE ARBITRAL TRIBUNAL

PRESIDING ARBITRATOR: My first question is: Now, after all the work you have invested a ton on Whites Point quarry and the high

quality of the stone there, when the -- when it became clear that or when the Ministers had decided that they would not -- they would deny the environmental, let's say, approval. Why did you not consider going to the Canadian courts?

Mr. Little vesterday referred to that is that I called it some kind of an elephant in the room and it is still in the room a bit for me so my question is: What made you, let's say, just to

choose to go to arbitration before and not TO Canadian courts?

THE WITNESS: The process, maybe four and a half year process that they put Mr. Buxton through basically because he was the one there

living it every day, the process that they put him to and the absolute unfairness of it and that was our opinion before we went to this group and found out what was really going on behind the scenes with the Canadian Ministers, and the actions that were taken from the very beginning of our process. We weren't even aware of all that at the time. We were just aware of how the review panel was handled. So, going back to their courts after the way this was handled, all I can say would have been tantamount to throwing yourself on the mercy of Kim Jung Ung.

There was no reasonable person that would have even considered going back to the Canadian courts for this. We would have gone through five years of struggle to end up back where we were, possibly being dealt with by the same people. So there was no law, rule or ordinance in the Canadian law that we knew of that said we had to, there was no obligation to. And we had a right to go to the NAFTA and we chose to go to the NAFTA because going back to them and being dealt that way for another ten years is absolutely unreasonable.

It wasn't even an option to us. And I know he seems to think that was the only method that we had of redressing what went on, and like I said,

PRESIDING ARBITRATOR: And of course that decision not to go to the Canadian courts for the reasons that you mentioned was done in -- you were advised by lawyers?

THE WITNESS: Yes, yes. To go to NAFTA, yes.

PRESIDING ARBITRATOR: Okay.

THE WITNESS: I mean we're not, you know, we've been in business like since '52. We are not in the business of suing. We are in -day-to-day you are in the business of avoiding lawsuits because it's just -- it needs to be avoided. So we are not in the business of filing lawsuits.

This, obviously, you know, this is extraordinary going on for this many years but I think the problem they had was that when you are in business for a long time in New Jersey, it kind of like means that you don't -- you are not smart enough to give up. Because New Jersey is year in and year out the 50th worst place of the 50 states to do

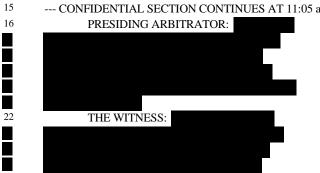

- 2 life, you don't give up easily. So, when we were
- 3 going through that extended process, we kind of
- 4 thought "Well, they have a question on this. Go get
 - the right guy, Paul, to answer it," and it went on
- 6 and it went on and it went on. So, you know, we gave 7
 - Paul wide latitude to do what needed to be done, but,
- 8 you know, once we found out what was really going on, 9
- then it, you know, has a tendency to focus your
- 10 attention on what was really going on then. So there

11 was no going back to their courts. 12

PRESIDING ARBITRATOR: For my second question, I think we need to go into confidential session.

--- CONFIDENTIAL SECTION CONTINUES AT 11:05 a.m.

22

23

24

25

A. Yes.

Q. And you are the Chief Financial Officer of the Clayton Group of Companies?

A. Yes, I am.

O. And you've been the CFO of the Clayton Group of Companies since 2003?

A. That is correct.

Q. And you're responsible for operating the financial affairs of the Clayton Group of Companies?

A. Yes.

Q. And before becoming the CFO, you were the controller from 1994 to 2003; is that right?

A. Yes, that is also correct.

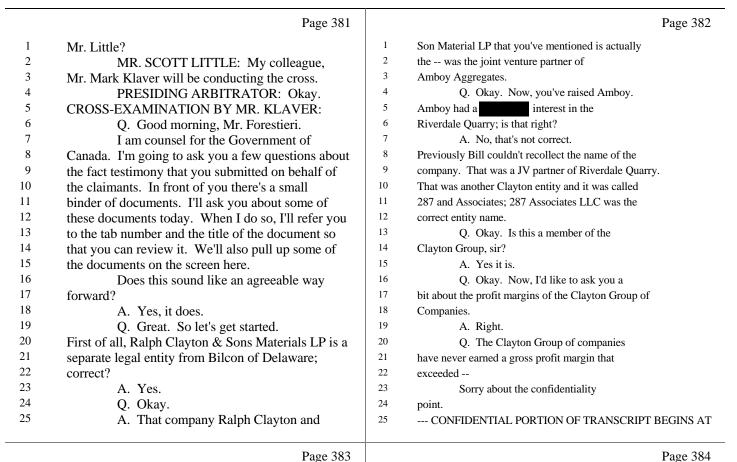

Q. And you have over 35 years' experience in the accounting profession; is that correct?

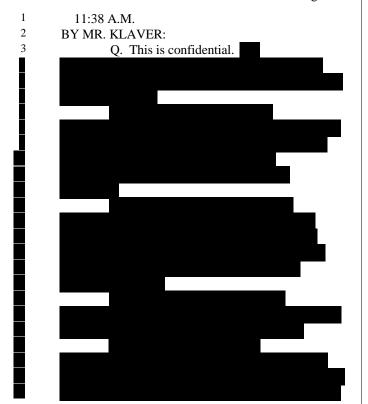

A. Yes, I do.

O. Thank you very much.

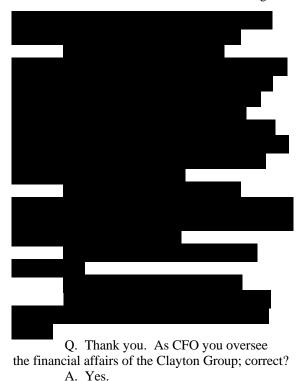

PRESIDING ARBITRATOR: Thank you.

24

(613) 564-2727

Q. And you are aware of the concept

22

5

Q. Now, an economic feasibility study would typically include analysis of factors such as anticipated production levels, pricing potential fluctuations, demand in the target market and consumer base, competitors in the industry and their market share, sales, marketing strategy and cost of construction operations and distribution; correct?

A. So, we put Paul Buxton in charge of that EIS and it was an environmental document and I -- that is not a business plan. It was a very, very early document just like Bill Clayton Junior had just mentioned.

Q. I haven't asked you about this document that you are referring to right now. I just asked you about your understanding of an economic feasibility study.

MR. NASH: Well. I think the witness should be allowed to answer the question as he understands it and then further clarification may be required.

MR. KLAVER: That's fine.

PRESIDING ARBITRATOR: Okay, good.

BY MR. KLAVER:

Q. Please clarify what you mean.

A. So I'm not aware of an EIS document having to have all of that information provided within it.

Q. Okay.

A. I'm not aware of that.

Q. Just to be clear on what you said there, you are not aware of an economic feasibility study that was conducted for the Whites Point Project?

A. No, I'm aware of a feasibility study that was conducted and what was included in it. I am just answering you saying that I was not aware that it needed to have that information that you had mentioned to me that should have been in it.

Q. I understand. So you are aware of an economic feasibility study that was produced on the record, sir?

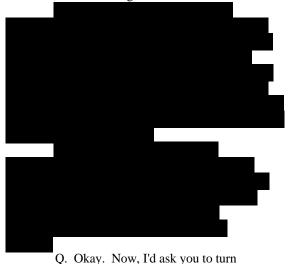

A. Are you talking about the EIS?

Q. No. I'm asking you if any economic feasibility study was create the by the Claytons and produced on the record.

A. Okay. So we did not produce an economic feasibility study for this quarry. We are

Page 387

in the business of the aggregate business, have been for 50 years. I'm well aware, completely aware of what an aggregate financial statement and P&L looks like. How much it costs to a manufacturer a ton of aggregate, and how much it costs, how much we would sell it for, what the margins look like.

to Tab 6 of your binder, please.

This is Exhibit R-17 for the record.

Page 388

We will pull it up on the screen as well. This is the April 2004 business plan prepared by Clayton Concrete. If you could turn to the bottom of page 507. And this contains a pro-forma revenue and expense statement for 2006.

Are you familiar with this document, sir?

A. I have seen it before. I think it was part of the EIS application that Paul Buxton had created and Paul and Bill Clayton Junior testified earlier that this was an early document and that Paul Buxton provided the information the way he saw it, but it is not really a business plan and this is not a pro-forma.

Q. So this is not a business plan?

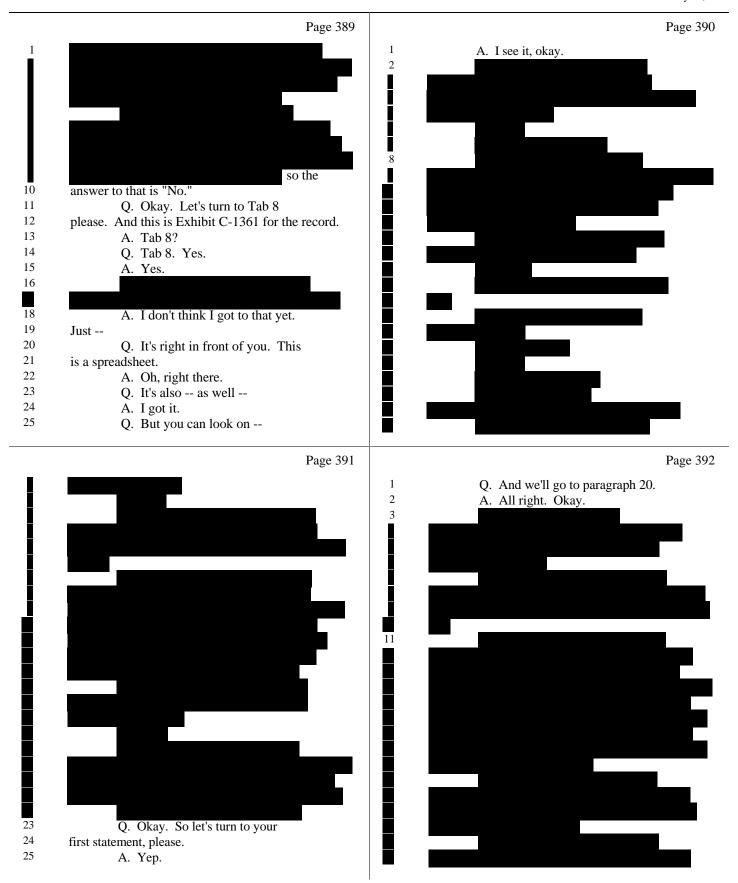

A. Right.

Q. And so it does not constitute an economic feasibility study either does it, sir?

A. Correct.

Q. Are you aware of any other financial forecasts that the claimants did conduct and that have been produced on the record for the Whites Point Project?

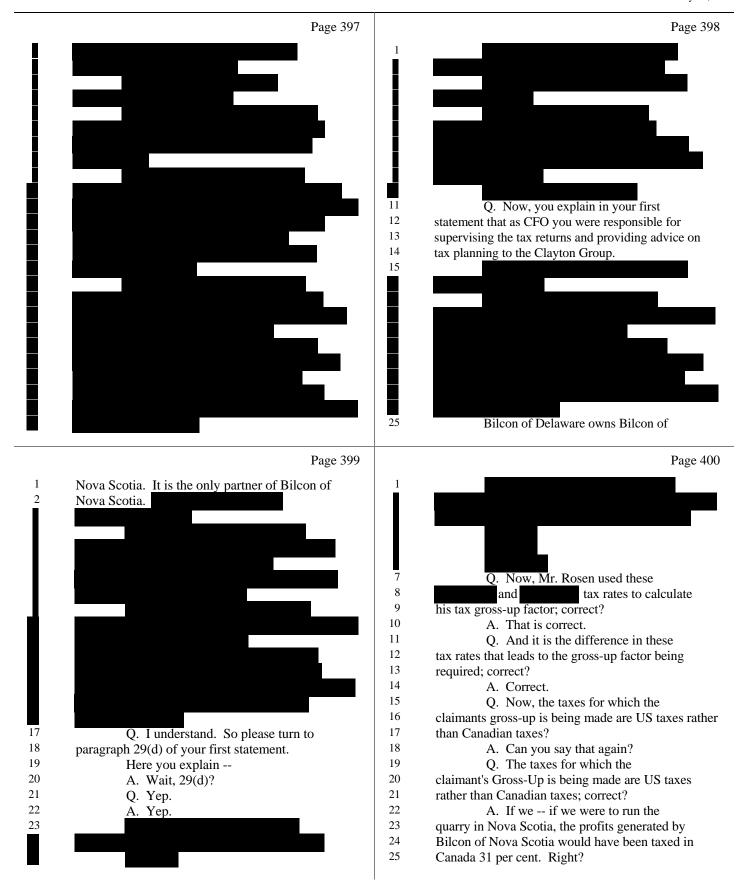

24

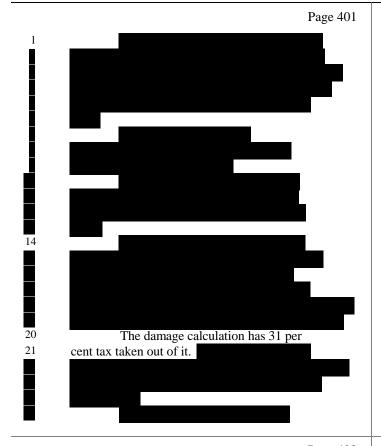

(613) 564-2727

(613) 564-2727

Q. So, you do acknowledge that the claimant's tax gross-up is made under US taxes; correct?

A. Yes.

Q. And you also did explain that the US recently changed its tax laws.

A. Uh-hmm.

Q. But, sir, you are confirming after conducting analysis as CFO that none of your analysis changes based on the reforms to the tax law?

A. Yeah, I can't answer to that 100 per cent in my, you know, entirety. I would, you know, much rather consult our long-term tax accountants.

However, the way I see it is that my statement stands. I don't think there's a significant change. The Code is to stimulate businesses in the United States, and this, you know, the some -- some things out there on the Code that allows for 20 per cent deductions. But that has nothing to do with an international company. And

Page 403

Page 404

even though the rate has been reduced two per cent, it is minimal because it does not allow a taxpayer in the United States to deduct their State of New Jersey taxes.

I know I'm getting into detail, but I think at the end of the day, this -- these rates are very accurate.

Q. Okay, sir. Now, the new tax law eliminates the US foreign tax regime in most circumstances, does it not?

 $A. \ I \ don't \ have \ -- \ I \ don't \ -- \ I'm$ not aware of that. I don't have knowledge of that. And I don't --

Q. Well, sir, you just explained that the analysis --

MR. NASH: Sorry, Mr. Forestieri was not finished his answer.

MR. KLAVER: Sorry.

THE WITNESS: I -- maybe you can rephrase your question?

BY MR. KLAVER

(613) 564-2727

Q. Sure, no problem.

A. Or ask me the question again.

Q. Absolutely. So the new tax law in the United States --

A. Right.

Q. -- it eliminates the US foreign tax credit regime in most circumstances; correct?

A. I don't know that.

O. You don't know that?

A. No.

Q. But you did just here testify that you maintained that your tax analysis of the and tax rates is correct.

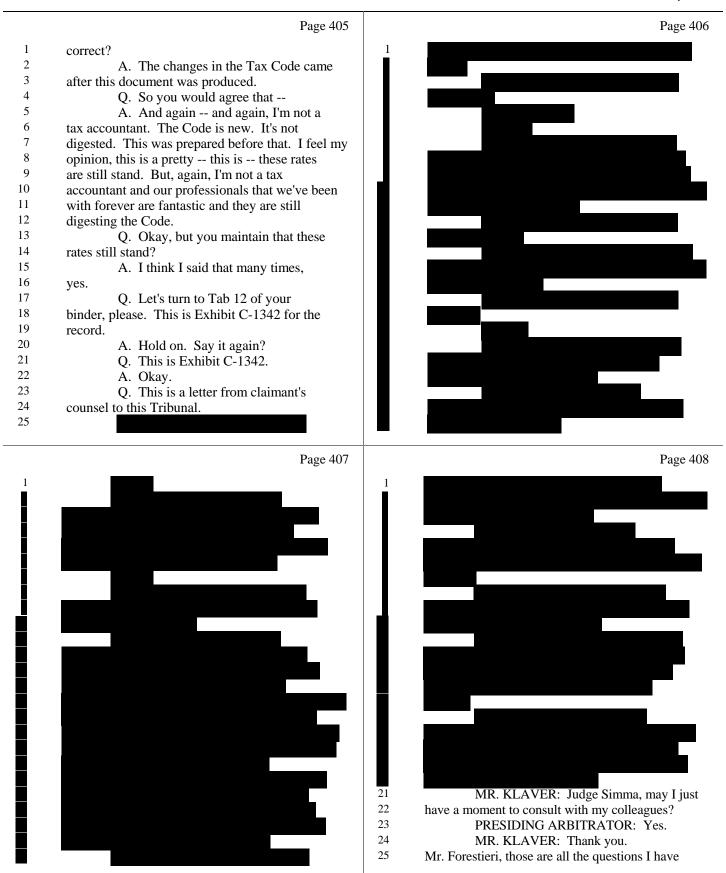

A. To my knowledge, this is correct. And a change in the Code does not change this analysis.

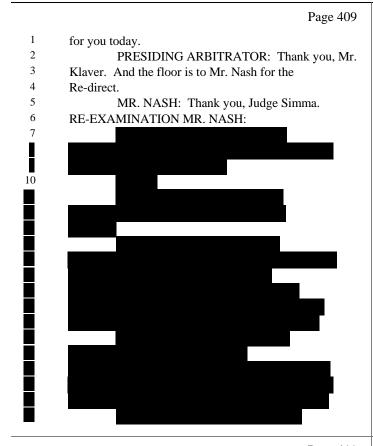

Q. The change in the Code does not change this analysis?

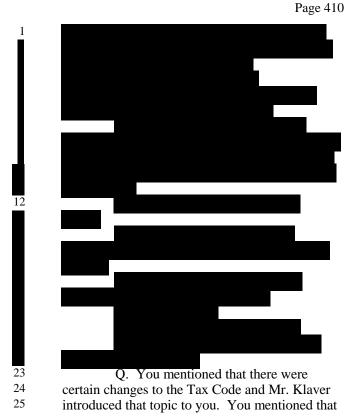

A. I could not even speak to the change in the Code at this moment. I don't know if the accountants and tax accountants have completely digested it. It's too new. And I am not a tax expert. And this was advised to me by our tax accountants and we engage them currently to this day and they will continue to advise us. But that's the best I can answer that question.

Q. Okay, so it sounds like the changes in the Tax Code are not accounted for in your calculation of the and per cent rate;

CONFIDENTIAL February 20, 2018

Page 411

there were tax credits that you understand had been discontinued.

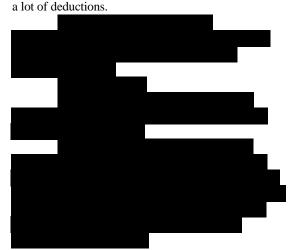

(613) 564-2727

Can you just itemize a few of the ones that you know about or deductions that you are able?

A. The largest one is that when you file a -- when you used to file a Federal tax return, you would get, as a deduction, the taxes you paid by individual States. So these are, the state tax in New Jersey is nine per cent. So when you filed your Federal tax return, you'd have your taxable income and your taxable income would be lowered by the taxes you paid to the States.

So, you know, I mean, whatever your number is, if you are looking at that, its reduced by the taxes you are paying to the State of New Jersey, then you have an effective tax rate. So they lowered it two per cent to 37 per cent.

However, the taxable income which the jury is still out there. This is pretty clear. So your income is not going to be reduced by your State taxes. So they lowered your percentage, but your taxable income will be higher and there are also other things that phase out from high income. You know, higher income level tax returns will phase out

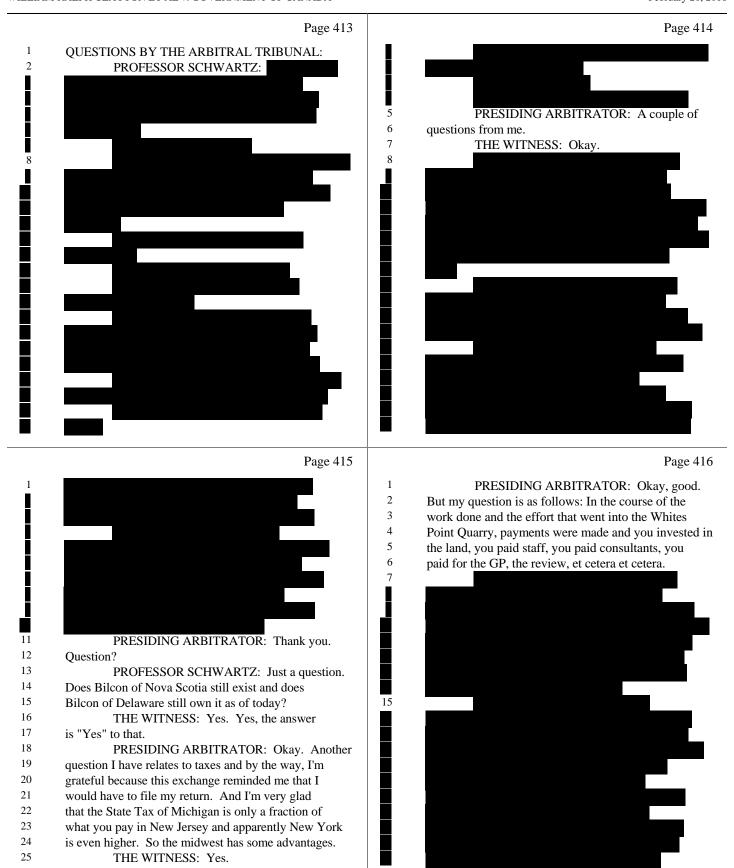

MR. NASH: Thank you. Those are my questions.

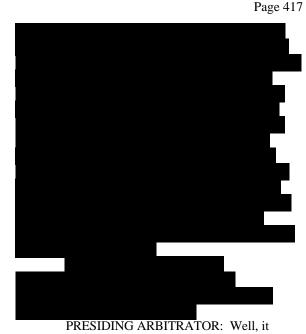

PRESIDING ARBITRATOR: Thank you, Mr. Nash. Any demand for --

MR. KLAVER: No.

PRESIDING ARBITRATOR: Then it's on the Tribunal.

Are there questions from my colleagues?

occurs to me, it just occurs to me that maybe both the questions I asked could have been, should have been under the heading of confidential. There is a confidence session, but I think it's borderline because we all share these tax miseries, et cetera,

and so I think it's all right. (Laughter) But maybe

my last question should be in confidential session and it refers to a document which you find in the Brattle Report by Mr. Chodorow of 9 June 2017. There is a document. I think it's called "Appendix C".

And maybe if either party could put that on the screen for Mr. Forestieri, that would be helpful.

It is Appendix C, Historical Costs and then there is a page which reads "Total historical cost in Canadian dollars." Okay.

I think it is better to look for Appendix C than for a page because a lot of pages vary.

THE WITNESS: I see a lot of pages before me.

PRESIDING ARBITRATOR: No, that's not it.

THE WITNESS: Maybe I can just answer your question.

PRESIDING ARBITRATOR: Then I would have to read out. Now it's on there.

And my question to you is this: In this table, the Brattle Group guy estimates the

them.

PRESIDING ARBITRATOR: Okay. Thank you very much.

THE WITNESS: Yes.

PRESIDING ARBITRATOR: Mr. Nash?

MR. NASH: If that document could be put back up on the screen? I have a follow-up question.

FURTHER RE-EXAMINATION BY MR. NASH:

Q. So Mr. Forestieri, you just answered "Yes" to Judge Simma's question as to whether you would agree to the figures.

If you look down to number five,

under the column "Total cost" it says "

Is that the amount that's been invested by the three brothers in this project?

A. Up to that date, yes.

O. Up to that date?

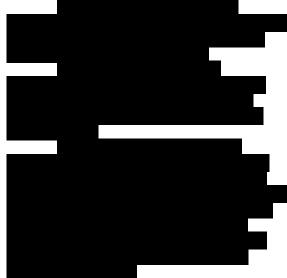

A. The is kind of like

Page 420 what I was looking at and I was in my head knowing

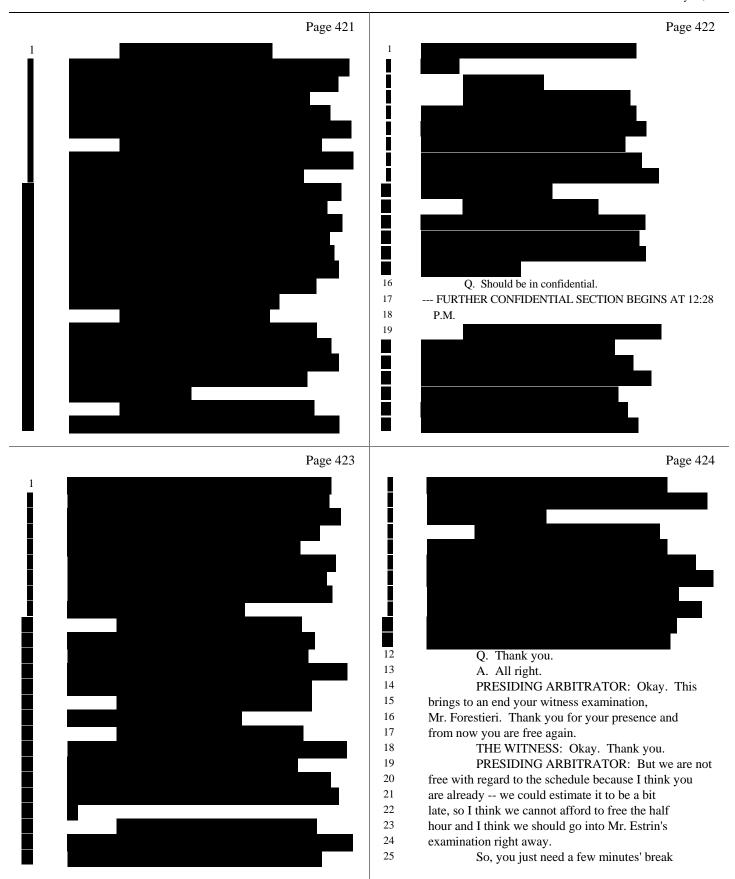

we spent that. I did not focus on the other two columns too much.

Q. So you are saying that in answer to Judge Simma's question, that figure of is the correct figure; is that right?

A. Yes.

(613) 564-2727

	Page 425		Page 426

Well, we PRESIDING ARBITRATOR: You might get a bit closer to the microphone. THE WITNESS: Okay, sure. I'm happy

Page 433 Page 434 1 1 something quickly and I can't. not cheating. But it's also private notes, not 2 2 BY MS. KAM: available for other counsel. 3 3 Q. Mr. Estrin, to the extent you PRESIDING ARBITRATOR: Thank you. 4 4 refer to any notes, we would need any copies of THE WITNESS: There is another 5 5 those. So I see you still have notes on your table, problem. Sorry, there is a bit of a problem using would you be willing to provide those copies to 6 your copies because they don't have all the 6 7 7 footnotes, all the references to the exhibit which Canada? 8 8 A. These are just for my purposes, is why I prepared a corrigendum.. 9 9 BY MS. KAM thank you. 10 10 Q. But our usual procedure in Q. Right, so I have that copy as 11 11 arbitration is that if an expert brings up notes for well. 12 12 their testimony, that the other party would be able A. But I have those in my copy and 13 to see a copy of those notes. Would that be a 13 I, for that reason, I would like to use my report. 14 reasonable approach? You could put them away if 14 Q. But that's why I would like a 15 copy as well so that we could both have the same 15 you'd like. 16 16 document to refer to, if that's the reason why. A. I'm putting them away at the 17 17 moment. A. Well, no, I'll use your clean PRESIDING ARBITRATOR: Mr. Nash? 18 18 copy and I'll have to take whatever time I require, 19 MR. NASH: There is a lot of 19 if that's all right with you, in order to look up 20 20 the right exhibit number by having reference to the information in these reports and in these binders. 21 21 And if, for any reason, Mr. Estrin has to refresh corrigenda. How's that? 22 22 his memory about where something is in all of these Q. Okay. So we'll proceed on the 23 documents, it is only fair that he has an 23 documents in front of you. 24 24 opportunity to look at his private notes to remind A. Okay. 25 25 himself this is where it is in the report. It is PRESIDING ARBITRATOR: Maybe the Page 435 Page 436 1 matter of the recourse to your private notes and 1 environmental lawyer; correct? 2 what's to happen to them, can we play that by ear 2 A. I specialized in environmental 3 and see? 3 law. I've also been an advocate before the courts 4 4 on civil litigation and judicial reviews and so it THE WITNESS: Yes, I think so. 5 5 PRESIDING ARBITRATOR: And of course would not, in terms the area on which I focus, these 6 6 have arisen in the context of environmental matters. the hope is that you won't resort to them too 7 7 frequently. Q. Okay but you are a lawyer; 8 8 THE WITNESS: No. correct? 9 9 PRESIDING ARBITRATOR: Thank you. A. I hope so. 10 10 BY MS. KAM: Q. Great. Well, I just need you to 11 Q. And just so you know, there is a 11 answer my questions. 12 document of binders -- or sorry, a binder of 12 You've never -- but you've never been 13 document in front of you. And to the extent that I 13 appointed by the Canadian government to conduct a 14 refer to these documents in my questions I will let 14 review panel assessment? 15 you know what tab number to turn to so you can 15 A. No. 16 16 return refer to the document. And just for the Q. Okay, and just to be clear then, record, I will also refer to the exhibit number and 17 17 for the record, you've been appointed by the Nova 18 Derek will also be helping me pull up those 18 Scotia government to conduct a review panel 19 19 documents on the screen. So you won't be without assessment? 20 any reference materials. 20 A. No. but I've reviewed assessments 21 A. Terrific. 21 by Nova Scotia for clients. I participated in major 22 Q. Great. So I'd like to start by 22 project on in Nova Scotia on behalf of a major 23 asking you a questions about your background and 23 utility company that was seeking to get approval for

experience and I know that Mr. Nash just went over a

large chunk of your resumé, but you are an

an undersea cable from Newfoundland to the top end

of Newfoundland Island and to take that power from

	Page 437		Page 438
1	Newfoundland to Nova Scotia which was the proponent	1	A. All right. I refer to it as my
2	was a Nova Scotia company. And I was legal counsel	2	expert report.
3	to that company in terms of the environmental	3	Q. I'll refer to it as your damages
4	assessment process which was both a Federal and Nova	4	memorial report.
5	Scotia process.	5	A. I'll have to make a note so
6	Q. Okay, but you've never chaired a	6	I know what you're talking about. Damages memorial
7	environmental assessment review panel?	7	report.
8	A. No.	8	Q. So, at paragraph 6 of this
9	Q. And so you've never served as an	9	report, you state that:
10	independent review panel member either?	10	"The WPQ project was approvable
11	A. Correct.	11	and would be approved if
12	Q. And you've never drafted a review	12	standard, Federal Canada and Nova
13	panel report?	13	Scotia Environmental Assessment
14	A. I hope not, if I wasn't a member.	14	Evaluation criteria and practices
15	Q. So let's start by turning to	15	were fairly and objectively
16	paragraph 6 of your damages memorial report, which	16	applied to the project." [As
17	is in front of you.	17	read.]
18	A. Sorry, which? Which report are	18	Right?
19	you referring to?	19	A. Yes.
20	Q. Your damages memorial report,	20	Q. Just so I understand, your
21	please.	21	opinion is that the Whites Point Project would have
22	A. Well, my I don't have a	22	been approved if standard, federal and Nova Scotia
23	damages memorial.	23	Environmental Assessment Evaluation criteria and
24	Q. The first report in the damages	24	practices were applied?
25	phase, your March 17th report.	25	A. Yes.
	Page 439		Page 440
1	Q. In the case of the Whites Point	1	Q. And starting if you turn to
2	Project, you would agree that the project was	2	page 8, there is a part of the Act that is entitled
3	subject to both an environmental assessment under	3	"The Environmental Assessment Process." Do you see
4	the Canadian Environmental Assessment Act as well as	4	that?
5	the Nova Scotia Environment Act?	5	A. I don't see that where is it.
6	A. Yes.	6	Q. At the bottom of page 8.
7	Q. So, let's start by turning to Tab	7	THE COURT: Where's page 8? Oh, page
8	2 of your binder, which is Exhibit R-1.	8	8.
9	A. Sorry, what is Exhibit R-1?	9	Q. You are there?
10	Q. Sorry, exhibit it is just for	10	A. Yes.
11	the record, sir.	11	Q. And if you go on to page 9,
12	A. Sorry, sorry, which?	12	section 16(1) of the Act, it sets out the factors to
13	Q. I'm asking you to turn to your	13	consider?
14	binder, and Tab 2, please, sir.	14	A. Right.
15	Just for the record, this document is	15	Q. And you would agree that
16	titled "The Canadian Environmental Assessment Act	16	section 16 sets out the review panel's required
17	1992", which I'm going to refer to as the CEAA.	17	factors for consideration in a federal environmental
18	A. Yes, I understand that, and every	18	assessment?
19	time I'm going to refer to it, unless I say	19	A. Yes.
20	otherwise, I'm talking about CEAA 1992, all right?	20	Q. Okay, ad under the CEAA, a review
21	Q. Understood. We are on the same	21	panel must consider whether or not a project is
22		22	likely to cause significant adverse environmental
22	page. And you would agree that the CEAA was the		
23	statute governing the Whites Point federal	23	effects?
23 24	statute governing the Whites Point federal environmental assessment process?	23 24	effects? A. Yes.
23	statute governing the Whites Point federal	23	effects?

	Page 441		Page 442
1	section 16(1)(a), the environmental effects that the	1	CEAA; correct?
2	review panel must consider are the environmental	2	A. It is the guide issued by the
3	effects of the project?	3	bureau office at that time, yes.
4	A. Yes.	4	Q. But it provides a framework,
5	Q. So, let's turn now to Exhibit	5	correct, for determining likely significant adverse
6	R-20, which is at Tab 3 of the binder.	6	environmental effects?
7	It is titled "A Reference Guide for	7	A. I don't see the word "framework",
8	the Canadian Environmental Assessment Act	8	but it does set out steps.
9	determining whether a project is likely to cause	9	Q. Sir, if you look at the screen,
10	significant adverse environmental effects".	10	section 4, it's called "a framework", "This
11	And you would agree that this	11	section provides a framework for guiding RAs in
12	reference guide was prepared by the Environmental	12	determining whether"
13	Assessment Review Office?	13	A. You're right, I missed that word.
14	A. Yes.	14	Q. Thank you. Sir, do you mind
15	Q. And you would also agree that	15	reading out the steps of the framework which are on
16	this reference guide sets out an approach to	16	the screen in front of you?
17	determining whether a project is likely to cause	17	A. (Reading):
18	significant adverse environmental effects?	18	"Step 1: Deciding whether the
19	A. Yes.	19	environmental effects are
20	Q. Okay. And so let's turn to page	20	adverse.
21	187 of the reference guide. Let's take a look under	21	Step 2: Deciding whether the
22	section 4.	22	adverse environmental effects are
23	You would agree that this reference	23	significant.
24	guide provides a framework for determining likely	24	Step 3: Deciding whether the
25	significant adverse environmental effects under the	25	significant adverse environmental
	significant adverse environmental effects under the		Significant adverse environmental
	Page 443		Page 444
1	effects are likely." [As read.]	1	different paragraphs, but in any event I just want
2	Q. Thank you. Let's look at the	2	to focus on the words "using some or all of the
3	4.1, which is step 1, deciding whether the	3	criteria shown in Table 1 as variables". Let me
4	environmental effects are adverse.	4	have a look at the criteria in Table 1 to see if I
5	If you look at paragraph 3 of the	5	agree with that.
6	section, you would agree that the most common way of	6	Yeah, what Table 1 is setting out,
7	determining whether a project's environmental	7	Judge Simma, Members of the Tribunal, is what later
8	effects are adverse is to compare the quality of the	8	became known as VECs or valuable ecosystem
9	existing environment with the predicted quality of	9	components.
10	the environment once a project is in place?	10	Q. So, Mr. Estrin, I'm not asking
11	A. I don't disagree with that.	11	about Table 1 yet. I'm asking you to answer my
12	Q. So you agree with that statement?	12	question.
13	A. If you like.	13	A. That's what it seems
14	Q. I just need your answer to the	14	appropriate, yes.
15	record, sir, "yes" or "no"?	15	Q. But my question is fairly simple:
16	A. Most common way? Using some or	16	Do you agree with the statement on the screen that
17	all of the criteria shown as Table 1 as variables	17	the most common way of determining whether a
18	SO	18	project's environmental effects are adverse is to
19	Q. So, sir, do you	19	compare the quality of the existing environment with
20	A. I can't agree until I you left	20	the predicted quality of the environment once the
21	off those words. So I want to make sure I'm fully	21	project is in place?
22	answering your question. So let me just see what it	22	A. If you also consider potential
23	says more carefully.	23	mitigation measures. You can't compare the effects
24		24	- ·
	So the quote you have up on the	24	
25	board, on the screen, is running together two	25	Q. Yes.

	Page 445		Page 446
1	A until you've also considered	1	"List the major factors that
2	effective or potentially useful mitigation measures	2	should be used to determine
3	because the whole purpose of environmental	3	whether environmental effects are
4	assessment is not just to say what might be the	4	adverse." [As read.]
5	effect, but what will be the net effects after	5	Do you see that?
6	mitigation is applied.	6	THE WITNESS: Yes.
7	Q. Right. But the most common way	7	Q. Could you please read the next
8	of determining whether a project's environmental	8	sentence:
9	effects are adverse, so not-significant, but	9	"Obviously, the importance of
10	adverse, is to compare the quality of the existing	10	individual characteristics will
11	environment with the predicted quality of the	11	be different in different EAs.
12	environment once the project is in place?	12	To assist the RA and the Minister
13	A. I think I would agree, if you	13	in deciding whether the
14	understand and it's understood that that's a way of	14	environmental effects are
15	identifying potential adverse environmental effects.	15	adverse, the proponent should be
16	Q. Okay, thank you. I just want you	16	required to submit information on
17	to look up at paragraph 2 under section 4.1. It's	17	these factors." [As read.]
18	on the previous page of the report.	18	Q. Thank you. So the Table 1, just
19	A. Sorry, under what? What page?	19	for reference, that was the table that you were just
20	Q. It's page 187	20	referring to in your testimony prior which is on the
21	A. Uh-hmm.	21	next page; you were talking about VECs?
22	Q of the report.	22	A. That's what the paragraph is
23	A. Yes.	23	referring to, yes.
24	Q. So the second paragraph that	24	Q. And you would agree that that
25	starts with Table 1:	25	table lists changes in the environment and effects
	Page 447		
	1 agc ++/		Page 448
1	•	1	•
1 2	on people resulting from environmental changes?	1 2	biophysical sense that are actually potentially
2	on people resulting from environmental changes? A. Sorry, where are you focussing?	2	biophysical sense that are actually potentially causing the effects in the right-hand column.
2 3	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1.	2 3	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes
2 3 4	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where?	2	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project?
2 3	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it	2 3 4 5	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes.
2 3 4 5	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on	2 3 4 5 6	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to
2 3 4 5 6	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the	2 3 4 5	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2:
2 3 4 5 6 7	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just	2 3 4 5 6 7	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse
2 3 4 5 6 7 8	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title.	2 3 4 5 6 7 8	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are
2 3 4 5 6 7 8	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the	2 3 4 5 6 7 8 9	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.]
2 3 4 5 6 7 8 9	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the Canadian Environmental Assessment Act, you can't	2 3 4 5 6 7 8 9	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.] Do you see that?
2 3 4 5 6 7 8 9 10	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the Canadian Environmental Assessment Act, you can't evaluate any of the factors in the right-hand column	2 3 4 5 6 7 8 9 10	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.] Do you see that? A. Yes.
2 3 4 5 6 7 8 9 10 11 12	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the Canadian Environmental Assessment Act, you can't evaluate any of the factors in the right-hand column unless they arise from environmental effects that	2 3 4 5 6 7 8 9 10 11 12	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.] Do you see that? A. Yes. Q. Okay, and according to the
2 3 4 5 6 7 8 9 10 11 12 13	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the Canadian Environmental Assessment Act, you can't evaluate any of the factors in the right-hand column unless they arise from environmental effects that are in the left-hand column. We've already been	2 3 4 5 6 7 8 9 10 11 12 13	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.] Do you see that? A. Yes. Q. Okay, and according to the reference guide, there are several criteria that
2 3 4 5 6 7 8 9 10 11 12 13 14	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the Canadian Environmental Assessment Act, you can't evaluate any of the factors in the right-hand column unless they arise from environmental effects that	2 3 4 5 6 7 8 9 10 11 12 13 14	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.] Do you see that? A. Yes. Q. Okay, and according to the
2 3 4 5 6 7 8 9 10 11 12 13 14 15	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the Canadian Environmental Assessment Act, you can't evaluate any of the factors in the right-hand column unless they arise from environmental effects that are in the left-hand column. We've already been through all this, I think.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.] Do you see that? A. Yes. Q. Okay, and according to the reference guide, there are several criteria that should be taken into account in deciding whether the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the Canadian Environmental Assessment Act, you can't evaluate any of the factors in the right-hand column unless they arise from environmental effects that are in the left-hand column. We've already been through all this, I think. Q. Right, but sir, you are not	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.] Do you see that? A. Yes. Q. Okay, and according to the reference guide, there are several criteria that should be taken into account in deciding whether the adverse environmental effects are significant;
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the Canadian Environmental Assessment Act, you can't evaluate any of the factors in the right-hand column unless they arise from environmental effects that are in the left-hand column. We've already been through all this, I think. Q. Right, but sir, you are not disagreeing that the table lists I'm just asking	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.] Do you see that? A. Yes. Q. Okay, and according to the reference guide, there are several criteria that should be taken into account in deciding whether the adverse environmental effects are significant; correct?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the Canadian Environmental Assessment Act, you can't evaluate any of the factors in the right-hand column unless they arise from environmental effects that are in the left-hand column. We've already been through all this, I think. Q. Right, but sir, you are not disagreeing that the table lists I'm just asking what the table lists. It lists changes in the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.] Do you see that? A. Yes. Q. Okay, and according to the reference guide, there are several criteria that should be taken into account in deciding whether the adverse environmental effects are significant; correct? A. Yes.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the Canadian Environmental Assessment Act, you can't evaluate any of the factors in the right-hand column unless they arise from environmental effects that are in the left-hand column. We've already been through all this, I think. Q. Right, but sir, you are not disagreeing that the table lists I'm just asking what the table lists. It lists changes in the environment and effects on people resulting from	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.] Do you see that? A. Yes. Q. Okay, and according to the reference guide, there are several criteria that should be taken into account in deciding whether the adverse environmental effects are significant; correct? A. Yes. Q. Okay. And these criteria, just
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the Canadian Environmental Assessment Act, you can't evaluate any of the factors in the right-hand column unless they arise from environmental effects that are in the left-hand column. We've already been through all this, I think. Q. Right, but sir, you are not disagreeing that the table lists I'm just asking what the table lists. It lists changes in the environment and effects on people resulting from environmental charges.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.] Do you see that? A. Yes. Q. Okay, and according to the reference guide, there are several criteria that should be taken into account in deciding whether the adverse environmental effects are significant; correct? A. Yes. Q. Okay. And these criteria, just for the record, they are listed in the following
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the Canadian Environmental Assessment Act, you can't evaluate any of the factors in the right-hand column unless they arise from environmental effects that are in the left-hand column. We've already been through all this, I think. Q. Right, but sir, you are not disagreeing that the table lists I'm just asking what the table lists. It lists changes in the environment and effects on people resulting from environmental charges. A. It does, but I'm saying that you	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.] Do you see that? A. Yes. Q. Okay, and according to the reference guide, there are several criteria that should be taken into account in deciding whether the adverse environmental effects are significant; correct? A. Yes. Q. Okay. And these criteria, just for the record, they are listed in the following paragraphs as the magnitude, geographical extent, duration and frequency, reversibility, and ecological context of the adverse environmental
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	on people resulting from environmental changes? A. Sorry, where are you focussing? Q. Table 1. A. Yes, where? Q. So the headings of that table, it refers to changes in the environment and effects on people resulting from environmental changes in the two columns, the title of the two columns. I'm just reading the title. A. If we are talking about the Canadian Environmental Assessment Act, you can't evaluate any of the factors in the right-hand column unless they arise from environmental effects that are in the left-hand column. We've already been through all this, I think. Q. Right, but sir, you are not disagreeing that the table lists I'm just asking what the table lists. It lists changes in the environment and effects on people resulting from environmental charges. A. It does, but I'm saying that you have to understand, as I'm sure this tribunal does,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	biophysical sense that are actually potentially causing the effects in the right-hand column. Q. But you would agree that changes in the environment can vary from project to project? A. Well, yes. Q. Okay. So let's move on to section 4.2 of the guide which describes step 2: "Deciding whether adverse environmental effects are significant." [As read.] Do you see that? A. Yes. Q. Okay, and according to the reference guide, there are several criteria that should be taken into account in deciding whether the adverse environmental effects are significant; correct? A. Yes. Q. Okay. And these criteria, just for the record, they are listed in the following paragraphs as the magnitude, geographical extent, duration and frequency, reversibility, and

25

unless you have environmental effects in the

25

A. You are looking at the headings?

	Page 449		Page 450
1	Q. Yes.	1	relevant in the determination of
2	A. Yes, those are often used as	2	significance under the CEAA"?
3	guidelines.	3	A. Where's the statement?
4	Q. And just so that you and I have	4	Q. The second-last paragraph on page
5	an understanding, I am going to refer to those as	5	190.
6	significant criteria going forward; okay?	6	A. Well, they say it says, all of
7	A. No, you can refer to them as	7	them should be considered in deciding whether the
8	that, but as I said, if you're as long as we	8	adverse environmental effects are significant, not
9	understand that you are trying to address potential	9	different criteria will be important in different
10	adverse environmental effects because even if you	10	EAs.
11	come within these factors, unless you actually then	11	Q. Right, so Mr. Estrin, you would
12	start applying mitigation, you don't know in the net	12	agree that all of these criteria, the significance
13	result whether they are adverse. So these are all	13	criteria, which I'm going to refer to them as that,
14	potential adverse environmental effects, not	14	they are all relevant to the determination of
15	environmental effects per se, adverse environmental	15	significance; correct?
16	effects per se. These are criteria that would help	16	A. They are generally accepted as
17	identify potential environmental adverse effects.	17	that.
18	Q. All I'm saying though for the	18	Q. Okay, and you would also agree
19	next set of questions, I'll just refer to these	19	A. Potential significance.
20	criteria as significant criteria, okay?	20	Q. And you would also agree with the
21	A. If you like.	21	following statement that "Different significance
22	Q. And looking at the second-last	22	criteria will be different in different EAs"?
23	paragraph on page 190, you would agree with the	23	A. Well, you know, this was written
24	statement that:	24	in 1974. That was 11 years before the Canadian
25	"All of these criteria are	25	Environmental Assessment Act came into force, which
	Page 451		Page 452

2 3	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated	2 3	significant? A. Yes, and Q. Right, so you would agree that
2 3 4	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct?	2 3 4	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria
2 3 4 5	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five	2 3 4 5	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria
2 3 4 5 6	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994,	2 3 4 5 6	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that
2 3 4 5 6 7	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're	2 3 4 5 6 7	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs
2 3 4 5 6 7 8	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is	2 3 4 5 6 7 8	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project
2 3 4 5 6 7 8 9	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect.	2 3 4 5 6 7 8	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated
2 3 4 5 6 7 8 9	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question	2 3 4 5 6 7 8 9	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially
2 3 4 5 6 7 8 9 10	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that	2 3 4 5 6 7 8 9 10	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common
2 3 4 5 6 7 8 9 10 11	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that different significance criteria will be important in	2 3 4 5 6 7 8 9 10 11 12	A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common approach.
2 3 4 5 6 7 8 9 10 11 12 13	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that different significance criteria will be important in different EAs?	2 3 4 5 6 7 8 9 10 11 12 13	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common approach. Q. Right, but there are potential
2 3 4 5 6 7 8 9 10 11 12 13 14	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that different significance criteria will be important in different EAs? A. These no, I can't agree with	2 3 4 5 6 7 8 9 10 11 12 13 14	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common approach. Q. Right, but there are potential differences amongst these factors when evaluating
2 3 4 5 6 7 8 9 10 11 12 13 14 15	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that different significance criteria will be important in different EAs? A. These no, I can't agree with that statement because what you have in this what	2 3 4 5 6 7 8 9 10 11 12 13 14 15	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common approach. Q. Right, but there are potential differences amongst these factors when evaluating the significance of adverse environmental effects?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that different significance criteria will be important in different EAs? A. These no, I can't agree with that statement because what you have in this what you've asked me to look at are criteria to evaluate	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common approach. Q. Right, but there are potential differences amongst these factors when evaluating the significance of adverse environmental effects? A. Well, yes, there could well be.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that different significance criteria will be important in different EAs? A. These no, I can't agree with that statement because what you have in this what you've asked me to look at are criteria to evaluate whether something is going to be adverse effects.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common approach. Q. Right, but there are potential differences amongst these factors when evaluating the significance of adverse environmental effects? A. Well, yes, there could well be. Q. Okay, and you would you agree
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that different significance criteria will be important in different EAs? A. These no, I can't agree with that statement because what you have in this what you've asked me to look at are criteria to evaluate whether something is going to be adverse effects. Whether or not there are differences	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common approach. Q. Right, but there are potential differences amongst these factors when evaluating the significance of adverse environmental effects? A. Well, yes, there could well be. Q. Okay, and you would you agree with the following statement after that, in the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that different significance criteria will be important in different EAs? A. These no, I can't agree with that statement because what you have in this what you've asked me to look at are criteria to evaluate whether something is going to be adverse effects. Whether or not there are differences in individual EAs is a matter of what comes up in	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common approach. Q. Right, but there are potential differences amongst these factors when evaluating the significance of adverse environmental effects? A. Well, yes, there could well be. Q. Okay, and you would you agree with the following statement after that, in the second-last paragraph of section or page 190,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that different significance criteria will be important in different EAs? A. These no, I can't agree with that statement because what you have in this what you've asked me to look at are criteria to evaluate whether something is going to be adverse effects. Whether or not there are differences in individual EAs is a matter of what comes up in that particular assessment.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common approach. Q. Right, but there are potential differences amongst these factors when evaluating the significance of adverse environmental effects? A. Well, yes, there could well be. Q. Okay, and you would you agree with the following statement after that, in the second-last paragraph of section or page 190, that "The extent to which individual criteria will
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that different significance criteria will be important in different EAs? A. These no, I can't agree with that statement because what you have in this what you've asked me to look at are criteria to evaluate whether something is going to be adverse effects. Whether or not there are differences in individual EAs is a matter of what comes up in that particular assessment. Q. Right, sir, but this part of the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	significant? A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common approach. Q. Right, but there are potential differences amongst these factors when evaluating the significance of adverse environmental effects? A. Well, yes, there could well be. Q. Okay, and you would you agree with the following statement after that, in the second-last paragraph of section or page 190, that "The extent to which individual criteria will influence the overall determination of significance,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that different significance criteria will be important in different EAs? A. These no, I can't agree with that statement because what you have in this what you've asked me to look at are criteria to evaluate whether something is going to be adverse effects. Whether or not there are differences in individual EAs is a matter of what comes up in that particular assessment. Q. Right, sir, but this part of the report is under section 4.2, right, this statement?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common approach. Q. Right, but there are potential differences amongst these factors when evaluating the significance of adverse environmental effects? A. Well, yes, there could well be. Q. Okay, and you would you agree with the following statement after that, in the second-last paragraph of section or page 190, that "The extent to which individual criteria will influence the overall determination of significance, that will vary between assessments"?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that different significance criteria will be important in different EAs? A. These no, I can't agree with that statement because what you have in this what you've asked me to look at are criteria to evaluate whether something is going to be adverse effects. Whether or not there are differences in individual EAs is a matter of what comes up in that particular assessment. Q. Right, sir, but this part of the report is under section 4.2, right, this statement? A. Uh-hmm.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common approach. Q. Right, but there are potential differences amongst these factors when evaluating the significance of adverse environmental effects? A. Well, yes, there could well be. Q. Okay, and you would you agree with the following statement after that, in the second-last paragraph of section or page 190, that "The extent to which individual criteria will influence the overall determination of significance, that will vary between assessments"? A. Sorry, where is that?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	was 1995. And the reality is that there are the it evolved from 1974. Q. But this guide, sir, it's dated November 1994; correct? A. Sorry, did I miss out by five years? Yeah, I guess the copy wasn't too 1994, well that's still yes, you're right, you're right. Sorry about that. You're right. It is one-year before CEAA took effect. Q. So I'll just repeat my question to you then: You would agree with the statement that different significance criteria will be important in different EAs? A. These no, I can't agree with that statement because what you have in this what you've asked me to look at are criteria to evaluate whether something is going to be adverse effects. Whether or not there are differences in individual EAs is a matter of what comes up in that particular assessment. Q. Right, sir, but this part of the report is under section 4.2, right, this statement?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A. Yes, and Q. Right, so you would agree that the significance different significance criteria will be important in different EAs? So the criteria that we're looking at here, you would agree that ecological context could differ in differ EAs depending on where the project A. The factors that are evaluated under each of these headings could be potentially different but, generally speaking, there is a common approach. Q. Right, but there are potential differences amongst these factors when evaluating the significance of adverse environmental effects? A. Well, yes, there could well be. Q. Okay, and you would you agree with the following statement after that, in the second-last paragraph of section or page 190, that "The extent to which individual criteria will influence the overall determination of significance, that will vary between assessments"?

	Page 453		Page 454
1	"Different criteria will be	1	correct?
2	important in different EAs and	2	A. If you have any effects that are
3	the extent to which individual	3	identified that need to be evaluated under those
4	criteria will influence the	4	headings, yes.
5	overall determination of	5	Q. Yes, okay.
6	significance will vary between	6	A. If, if.
7	assessments." [As read.]	7	Q. Let's turn now to page 186 of the
8	A. Yes, that is a very general	8	reference guide.
9	statement and it certainly could, but on the other	9	A. 180
10	hand, given the experience we've had to date under	10	Q. 186, so we're going
11	CEAA in looking at various types of projects that	11	A. That's turning backwards.
12	normally came under CEAA, it's been quite accepted	12	Q backwards.
13	in the practice of environmental assessment, not	13	You would agree with the statement
14	just by environmental lawyers but by the consultants	14	here that in all cases
15	in the industry who prepare environmental	15	A. Sorry, where are you?
16	assessments that they generally agree on what these	16	Q. We're in the second full
17	common criteria should be that are evaluated in	17	paragraph. So you would agree with the statement
18	environmental assessment. So, if you look at the	18	here that "In all cases, significance and the
19	environmental assessments for any number of quarry	19	related matters are determined only after taking
20	projects, you will find essentially that the same	20	into account mitigation measures"?
21	criteria are evaluated in each one.	21	A. That's what I said.
22	Q. But considering the criteria that	22	Q. Correct? I'm just asking you to
23	we have listed here, so magnitude, duration of	23	confirm your agreement with that statement. So you
24	frequency, reversibility and ecological context,	24	agree with that statement, "yes" or "no"?
25	those criteria can differ from project to project;	25	A. Yes. Well, taking into account
	Page 455		Page 456
1	any mitigation measures the RA considers	1	is required to eliminate, reduce or control an
2	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the	2	is required to eliminate, reduce or control an environmental effect; correct?
	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or	2 3	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or
2 3 4	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"?	2 3 4	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the
2 3 4 5	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my	2 3 4 5	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration,
2 3 4 5 6	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the	2 3 4 5 6	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means."
2 3 4 5 6 7	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that:	2 3 4 5 6 7	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says.
2 3 4 5 6 7 8	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that: "In all cases significance in the	2 3 4 5 6 7 8	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says. Q. Right. But, so I'm asking you to
2 3 4 5 6 7 8 9	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that: "In all cases significance in the related matters are determined	2 3 4 5 6 7 8 9	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says. Q. Right. But, so I'm asking you to confirm, a mitigation measure must eliminate, reduce
2 3 4 5 6 7 8 9	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that: "In all cases significance in the related matters are determined only after taking into account	2 3 4 5 6 7 8 9	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says. Q. Right. But, so I'm asking you to confirm, a mitigation measure must eliminate, reduce or control an adverse environmental effect?
2 3 4 5 6 7 8 9 10	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that: "In all cases significance in the related matters are determined only after taking into account any mitigation measures",	2 3 4 5 6 7 8 9 10	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says. Q. Right. But, so I'm asking you to confirm, a mitigation measure must eliminate, reduce or control an adverse environmental effect? A. That's the intention of
2 3 4 5 6 7 8 9 10 11 12	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that: "In all cases significance in the related matters are determined only after taking into account any mitigation measures", correct?	2 3 4 5 6 7 8 9 10 11 12	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says. Q. Right. But, so I'm asking you to confirm, a mitigation measure must eliminate, reduce or control an adverse environmental effect? A. That's the intention of discussing mitigation, yes.
2 3 4 5 6 7 8 9 10 11 12 13	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that: "In all cases significance in the related matters are determined only after taking into account any mitigation measures", correct? A. Yes.	2 3 4 5 6 7 8 9 10 11 12 13	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says. Q. Right. But, so I'm asking you to confirm, a mitigation measure must eliminate, reduce or control an adverse environmental effect? A. That's the intention of discussing mitigation, yes. Q. Okay. And you would agree that
2 3 4 5 6 7 8 9 10 11 12 13 14	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that: "In all cases significance in the related matters are determined only after taking into account any mitigation measures", correct? A. Yes. Q. So, let's turn back to the CEAA,	2 3 4 5 6 7 8 9 10 11 12 13 14	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says. Q. Right. But, so I'm asking you to confirm, a mitigation measure must eliminate, reduce or control an adverse environmental effect? A. That's the intention of discussing mitigation, yes. Q. Okay. And you would agree that what a measure that eliminates, reduces or
2 3 4 5 6 7 8 9 10 11 12 13 14 15	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that: "In all cases significance in the related matters are determined only after taking into account any mitigation measures", correct? A. Yes. Q. So, let's turn back to the CEAA, which is Exhibit R-1 at Tab 2 of your binder. Tab	2 3 4 5 6 7 8 9 10 11 12 13 14 15	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says. Q. Right. But, so I'm asking you to confirm, a mitigation measure must eliminate, reduce or control an adverse environmental effect? A. That's the intention of discussing mitigation, yes. Q. Okay. And you would agree that what a measure that eliminates, reduces or controls an adverse environmental effect, that would
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that: "In all cases significance in the related matters are determined only after taking into account any mitigation measures", correct? A. Yes. Q. So, let's turn back to the CEAA, which is Exhibit R-1 at Tab 2 of your binder. Tab 2. I'd like you to turn to page 4 of this exhibit.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says. Q. Right. But, so I'm asking you to confirm, a mitigation measure must eliminate, reduce or control an adverse environmental effect? A. That's the intention of discussing mitigation, yes. Q. Okay. And you would agree that what a measure that eliminates, reduces or controls an adverse environmental effect, that would depend on what the adverse environmental effect is?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that: "In all cases significance in the related matters are determined only after taking into account any mitigation measures", correct? A. Yes. Q. So, let's turn back to the CEAA, which is Exhibit R-1 at Tab 2 of your binder. Tab 2. I'd like you to turn to page 4 of this exhibit. If you look at the third definition in this page,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says. Q. Right. But, so I'm asking you to confirm, a mitigation measure must eliminate, reduce or control an adverse environmental effect? A. That's the intention of discussing mitigation, yes. Q. Okay. And you would agree that what a measure that eliminates, reduces or controls an adverse environmental effect, that would depend on what the adverse environmental effect is? A. And also what the mitigation
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that: "In all cases significance in the related matters are determined only after taking into account any mitigation measures", correct? A. Yes. Q. So, let's turn back to the CEAA, which is Exhibit R-1 at Tab 2 of your binder. Tab 2. I'd like you to turn to page 4 of this exhibit. If you look at the third definition in this page, you see the definition of mitigation; "yes" or "no"?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says. Q. Right. But, so I'm asking you to confirm, a mitigation measure must eliminate, reduce or control an adverse environmental effect? A. That's the intention of discussing mitigation, yes. Q. Okay. And you would agree that what a measure that eliminates, reduces or controls an adverse environmental effect, that would depend on what the adverse environmental effect is? A. And also what the mitigation measure is.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that: "In all cases significance in the related matters are determined only after taking into account any mitigation measures", correct? A. Yes. Q. So, let's turn back to the CEAA, which is Exhibit R-1 at Tab 2 of your binder. Tab 2. I'd like you to turn to page 4 of this exhibit. If you look at the third definition in this page, you see the definition of mitigation; "yes" or "no"? Are you there?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says. Q. Right. But, so I'm asking you to confirm, a mitigation measure must eliminate, reduce or control an adverse environmental effect? A. That's the intention of discussing mitigation, yes. Q. Okay. And you would agree that what a measure that eliminates, reduces or controls an adverse environmental effect, that would depend on what the adverse environmental effect is? A. And also what the mitigation measure is. Q. Yes, but it would depend on what
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	any mitigation measures the RA considers appropriate. I mean, are you wanting me to read the whole sentence and agree to the whole sentence or just stopping at "measures"? Q. Please just listen to my question. My question is: You would agree with the statement that: "In all cases significance in the related matters are determined only after taking into account any mitigation measures", correct? A. Yes. Q. So, let's turn back to the CEAA, which is Exhibit R-1 at Tab 2 of your binder. Tab 2. I'd like you to turn to page 4 of this exhibit. If you look at the third definition in this page, you see the definition of mitigation; "yes" or "no"? Are you there? A. I'm reading it. Do you want me	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	is required to eliminate, reduce or control an environmental effect; correct? A. Well, "Elimination, reduction or control of the adverse environmental effects of the project, it includes restitution or restoration, compensation, or any other means." I mean just that's what it says. Q. Right. But, so I'm asking you to confirm, a mitigation measure must eliminate, reduce or control an adverse environmental effect? A. That's the intention of discussing mitigation, yes. Q. Okay. And you would agree that what a measure that eliminates, reduces or controls an adverse environmental effect, that would depend on what the adverse environmental effect is? A. And also what the mitigation measure is. Q. Yes, but it would depend on what the adverse environmental effect is; correct?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	any mitigation measures the RA considers appropriate. That's the intention of discussing mitigation, yes. Q. Okay. And you would agree that what a measure that eliminates, reduces or controls an adverse environmental effect, that would depend on what the adverse environmental effect is? A. And also what the mitigation measure is. Q. Yes, but it would depend on what the adverse environmental effect is; correct? A. Yes. Q. And whether a measure eliminates,

	Page 457		Page 458
1	A. It would certainly have a bearing	1	technically and economically feasible?
2	on it, yes.	2	A. No, because the sentence says:
3	Q. Let's go to section 16 of the	3	"Measures that are technically
4	Act, which is on page 9. Section 16(1)(d) specifies	4	and economically feasible and
5	that:	5	that would mitigate any
6	"Mitigation measures that are	6	significant adverse environmental
7	required to be considered are	7	effects." [As read.]
8	those that are both technically	8	It doesn't say "any adverse
9	and economically feasible;" [As	9	environmental effects". It doesn't say "any
10	read.] correct?	10	environmental effects". It says, "mitigate any
11	A. Well, you haven't read the whole	11	significant adverse environmental effects".
12	sentence:	12	Q. But, sir, you don't disagree that
13	"And that would mitigate any	13	the measures that are required to be considered must
14	significant adverse environmental	14	be technically and economically feasible?
15	effects of the project." [As	15	A. If you are speaking of SAEE, yes.
16	read.]	16	Q. Okay.
17	So if you are discussing specifically	17	A. Because really that's the only
18	significantly adverse environmental effects, then	18	time in section 16 that, 16(1), that mentions the
19 20	mitigation measures are defined in that term. They	19 20	word mitigation
21	would have to be technically and economically feasible.	21	Q. Right, I understand.A in connection with SAEE.
22	Q. So to answer just so I can	22	
23	restate my question, you would agree then that the	23	Q. Okay. And Mr. Estrin, you would agree that the types of mitigation measures that are
24	mitigation measures that must be considered in an	24	technically and economically feasible and would
25	environmental assessment are these are both	25	mitigate any significant adverse environmental
	environmental assessment are these are both		initigate any significant adverse environmental

You still have to consider A potential adverse effects that would arise in that MR. NASH: If the witness could be allowed to finish his sentence before he was interrupted. Thank you. MS. KAM: He finished and looked at me. Q. But you would agree though, you still need to consider the adverse environmental effects of the project even there is a common mitigation measure that you are referring to? A. You have to consider the potential adverse environmental effects and make a
2 3 4 5 6 7 8 9 10 11 12 13 14 15	effects, that would depend on the individual project? A. No, I think we all anyone who practices in this area, and I don't mean just lawyers, I mean environmental consultants, understand that and even Ms. Griffiths said in her when she was the chair of the Voisey's Bay panel, "Hey, we are looking at a mining project. Mining projects have basically common potential impacts and we can understand that they would probably all have common mitigation measures." So there's a kind of, with experience, consultants and even panel members understand that there can be a commonality to the approach, and if you are not dealing with something	2 3 4 5 6 7 8 9 10 11 12 13 14 15	Q. You still have to consider A potential adverse effects that would arise in that MR. NASH: If the witness could be allowed to finish his sentence before he was interrupted. Thank you. MS. KAM: He finished and looked at me. Q. But you would agree though, you still need to consider the adverse environmental effects of the project even there is a common mitigation measure that you are referring to? A. You have to consider the potential adverse environmental effects and make a determination, first of all, of whether or not they
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	effects, that would depend on the individual project? A. No, I think we all anyone who practices in this area, and I don't mean just lawyers, I mean environmental consultants, understand that and even Ms. Griffiths said in her when she was the chair of the Voisey's Bay panel, "Hey, we are looking at a mining project. Mining projects have basically common potential impacts and we can understand that they would probably all have common mitigation measures." So there's a kind of, with experience, consultants and even panel members understand that there can be a commonality to the approach, and if you are not dealing with something that is rocket science and you are dealing with	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	Q. You still have to consider A potential adverse effects that would arise in that MR. NASH: If the witness could be allowed to finish his sentence before he was interrupted. Thank you. MS. KAM: He finished and looked at me. Q. But you would agree though, you still need to consider the adverse environmental effects of the project even there is a common mitigation measure that you are referring to? A. You have to consider the potential adverse environmental effects and make a determination, first of all, of whether or not they are likely to be significant, and if you do that,
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	effects, that would depend on the individual project? A. No, I think we all anyone who practices in this area, and I don't mean just lawyers, I mean environmental consultants, understand that and even Ms. Griffiths said in her when she was the chair of the Voisey's Bay panel, "Hey, we are looking at a mining project. Mining projects have basically common potential impacts and we can understand that they would probably all have common mitigation measures." So there's a kind of, with experience, consultants and even panel members understand that there can be a commonality to the approach, and if you are not dealing with something that's well-known and you've done it for	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Q. You still have to consider A potential adverse effects that would arise in that MR. NASH: If the witness could be allowed to finish his sentence before he was interrupted. Thank you. MS. KAM: He finished and looked at me. Q. But you would agree though, you still need to consider the adverse environmental effects of the project even there is a common mitigation measure that you are referring to? A. You have to consider the potential adverse environmental effects and make a determination, first of all, of whether or not they are likely to be significant, and if you do that, then you would have to look at mitigation measures
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	effects, that would depend on the individual project? A. No, I think we all anyone who practices in this area, and I don't mean just lawyers, I mean environmental consultants, understand that and even Ms. Griffiths said in her when she was the chair of the Voisey's Bay panel, "Hey, we are looking at a mining project. Mining projects have basically common potential impacts and we can understand that they would probably all have common mitigation measures." So there's a kind of, with experience, consultants and even panel members understand that there can be a commonality to the approach, and if you are not dealing with something that's well-known and you've done it for 10 or 20 years, you have a feeling, just begin with,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	Q. You still have to consider A potential adverse effects that would arise in that MR. NASH: If the witness could be allowed to finish his sentence before he was interrupted. Thank you. MS. KAM: He finished and looked at me. Q. But you would agree though, you still need to consider the adverse environmental effects of the project even there is a common mitigation measure that you are referring to? A. You have to consider the potential adverse environmental effects and make a determination, first of all, of whether or not they are likely to be significant, and if you do that, then you would have to look at mitigation measures that are technically and economically feasible.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	effects, that would depend on the individual project? A. No, I think we all anyone who practices in this area, and I don't mean just lawyers, I mean environmental consultants, understand that and even Ms. Griffiths said in her when she was the chair of the Voisey's Bay panel, "Hey, we are looking at a mining project. Mining projects have basically common potential impacts and we can understand that they would probably all have common mitigation measures." So there's a kind of, with experience, consultants and even panel members understand that there can be a commonality to the approach, and if you are not dealing with something that is rocket science and you are dealing with something that's well-known and you've done it for 10 or 20 years, you have a feeling, just begin with, of what type of mitigation measures you have to look	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. You still have to consider A potential adverse effects that would arise in that MR. NASH: If the witness could be allowed to finish his sentence before he was interrupted. Thank you. MS. KAM: He finished and looked at me. Q. But you would agree though, you still need to consider the adverse environmental effects of the project even there is a common mitigation measure that you are referring to? A. You have to consider the potential adverse environmental effects and make a determination, first of all, of whether or not they are likely to be significant, and if you do that, then you would have to look at mitigation measures that are technically and economically feasible. If you don't identify SAEE, there is
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	effects, that would depend on the individual project? A. No, I think we all anyone who practices in this area, and I don't mean just lawyers, I mean environmental consultants, understand that and even Ms. Griffiths said in her when she was the chair of the Voisey's Bay panel, "Hey, we are looking at a mining project. Mining projects have basically common potential impacts and we can understand that they would probably all have common mitigation measures." So there's a kind of, with experience, consultants and even panel members understand that there can be a commonality to the approach, and if you are not dealing with something that is rocket science and you are dealing with something that's well-known and you've done it for 10 or 20 years, you have a feeling, just begin with, of what type of mitigation measures you have to look at, right?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Q. You still have to consider A potential adverse effects that would arise in that MR. NASH: If the witness could be allowed to finish his sentence before he was interrupted. Thank you. MS. KAM: He finished and looked at me. Q. But you would agree though, you still need to consider the adverse environmental effects of the project even there is a common mitigation measure that you are referring to? A. You have to consider the potential adverse environmental effects and make a determination, first of all, of whether or not they are likely to be significant, and if you do that, then you would have to look at mitigation measures that are technically and economically feasible. If you don't identify SAEE, there is nothing in Section 16 that says you have to address
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	effects, that would depend on the individual project? A. No, I think we all anyone who practices in this area, and I don't mean just lawyers, I mean environmental consultants, understand that and even Ms. Griffiths said in her when she was the chair of the Voisey's Bay panel, "Hey, we are looking at a mining project. Mining projects have basically common potential impacts and we can understand that they would probably all have common mitigation measures." So there's a kind of, with experience, consultants and even panel members understand that there can be a commonality to the approach, and if you are not dealing with something that is rocket science and you are dealing with something that's well-known and you've done it for 10 or 20 years, you have a feeling, just begin with, of what type of mitigation measures you have to look	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Q. You still have to consider A potential adverse effects that would arise in that MR. NASH: If the witness could be allowed to finish his sentence before he was interrupted. Thank you. MS. But you would agree though, you still need to consider the adverse environmental effects of the project even there is a common mitigation measure that you are referring to? A. You have to consider the potential adverse environmental effects and make a determination, first of all, of whether or not they are likely to be significant, and if you do that, then you would have to look at mitigation measures that are technically and economically feasible. If you don't identify SAEE, there is nothing in Section 16 that says you have to address mitigation measures.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	effects, that would depend on the individual project? A. No, I think we all anyone who practices in this area, and I don't mean just lawyers, I mean environmental consultants, understand that and even Ms. Griffiths said in her when she was the chair of the Voisey's Bay panel, "Hey, we are looking at a mining project. Mining projects have basically common potential impacts and we can understand that they would probably all have common mitigation measures." So there's a kind of, with experience, consultants and even panel members understand that there can be a commonality to the approach, and if you are not dealing with something that is rocket science and you are dealing with something that's well-known and you've done it for 10 or 20 years, you have a feeling, just begin with, of what type of mitigation measures you have to look at, right? Q. But Mr. Estrin, you'd agree, even	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q. You still have to consider A potential adverse effects that would arise in that MR. NASH: If the witness could be allowed to finish his sentence before he was interrupted. Thank you. MS. KAM: He finished and looked at me. Q. But you would agree though, you still need to consider the adverse environmental effects of the project even there is a common mitigation measure that you are referring to? A. You have to consider the potential adverse environmental effects and make a determination, first of all, of whether or not they are likely to be significant, and if you do that, then you would have to look at mitigation measures that are technically and economically feasible. If you don't identify SAEE, there is nothing in Section 16 that says you have to address
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	effects, that would depend on the individual project? A. No, I think we all anyone who practices in this area, and I don't mean just lawyers, I mean environmental consultants, understand that and even Ms. Griffiths said in her when she was the chair of the Voisey's Bay panel, "Hey, we are looking at a mining project. Mining projects have basically common potential impacts and we can understand that they would probably all have common mitigation measures." So there's a kind of, with experience, consultants and even panel members understand that there can be a commonality to the approach, and if you are not dealing with something that is rocket science and you are dealing with something that's well-known and you've done it for 10 or 20 years, you have a feeling, just begin with, of what type of mitigation measures you have to look at, right? Q. But Mr. Estrin, you'd agree, even with a common mitigation measure, you would have to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q. You still have to consider A potential adverse effects that would arise in that MR. NASH: If the witness could be allowed to finish his sentence before he was interrupted. Thank you. MS. KAM: He finished and looked at me. Q. But you would agree though, you still need to consider the adverse environmental effects of the project even there is a common mitigation measure that you are referring to? A. You have to consider the potential adverse environmental effects and make a determination, first of all, of whether or not they are likely to be significant, and if you do that, then you would have to look at mitigation measures that are technically and economically feasible. If you don't identify SAEE, there is nothing in Section 16 that says you have to address mitigation measures. Q. But in order to make finding of

	Page 461		Page 462
1	mitigation measures, yes.	1	the context of what potential impacts the project
2	Q. And those mitigation measures	2	may have. And then you try and gather data and you
3	must be taken into account with the potential	3	try and then, in a reasoned way, use judgment to
4	adverse environmental effects of that project?	4	determine whether or not those VECs will be affected
5	A. Well, Section 16(1)(d) doesn't	5	and in what specific way. And then you try and
6	say that. It says:	6	determine whether or not there may be adverse
7	"Measures that are technically	7	effects.
8	and economically feasible and	8	Q. But I'm not asking that, sir.
9	that would mitigate any	9	I'm asking it says here, "The measures that are
10	significant adverse effects."	10	technically and economically feasible and that would
11	[As read.]	11	mitigate any significant adverse environmental
12	So I don't see anything in here that	12	effects of the project", correct?
13	specifically says that mitigation measures need to	13	So when you are taking into account
14	be taken into account in respect of matters that the	14	technically and economically feasible mitigation
15	consultants say, for example, they propose to a	15	measures, you measure those against the significant
16	project.	16	adverse environmental effects of the project?
17	Q. But I'm not asking that, sir, I'm	17	A. Assuming those have been
18	asking	18	identified.
19	A. Well, you are not letting me	19	Q. Yes.
20	finish my sentence.	20	A. Yes.
21	Q. Go ahead then.	21	Q. But you don't forego the analysis
22	A. That, you know, when you do an	22	of the mitigation measures against the environmental
23	when you do an environmental assessment, you set out	23	effects of the project; correct? You still consider
24	the VECs, the valuable ecosystem components that may	24	the environmental effects of that project?
25	likely are the ones that we want to protect in	25	A. You are always looking at that
	Page 463		Page 464

Lunch recess taken at 1:16 p.m. Upon resuming at 2:30 p.m. PRESIDING ARBITRATOR: Okay. We can resume the examination of Mr. Estrin. THE WITNESS: May I just say something about the dealing with the reports that were handed to me, my reports? They are not the way they are is prejudicial in the sense that I have some each report has several appendices. There is no tabs in their documents even as to where to find the appendices, and I wanted to be able to refer, to the extent that it would help answer the question, to the appendices. I'm quite happy if my friend would like to photocopy my reports with any writing I have
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	project, but as I said, the phrase occurs in the sentence that says "would mitigate any significant adverse effects of that project". Q. Yes. So you agree that the mitigation measures must be measured against the significant adverse environmental effects of that project? A. Right. Q. Okay. A. Assuming they have some. PRESIDING ARBITRATOR: Okay, and would that be a good moment or would you MS. KAM: I was just going to suggest that it might be a good time to take a break. PRESIDING ARBITRATOR: So you are suggesting it? MS. KAM: Yes. PRESIDING ARBITRATOR: Super. Okay.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	PRESIDING ARBITRATOR: Okay. Thank you. Lunch recess taken at 1:16 p.m. Upon resuming at 2:30 p.m. PRESIDING ARBITRATOR: Okay. We can resume the examination of Mr. Estrin. THE WITNESS: May I just say something about the dealing with the reports that were handed to me, my reports? A. Yes. Q. Okay, and A. Under that section. There are other sections that come up into that decision depending on the section is normally normally used, I think, to take a first cut at the registration document to determine whether or not

Page 469 Page 470 1 1 case, it may be used to immediate -- almost there, yes. 2 2 immediately reject a project, because Nova Scotia Q. And you would agree that under 3 has made it a priority to process quarry-like 3 the Nova Scotia legislation, there is no requirement 4 4 projects with a alacrity. that there be a finding of significant adverse 5 5 They have said it is their policy environmental effects in order for the Minister to that they are going to deal with a registration 6 reject the undertaking? 6 7 document within 25 days. 7 A. Significant -- what was your 8 In other words, they want the 8 phrase? Question? 9 9 industry to be going forward, and that's consistent Q. So under the Nova Scotia 10 with a document that's made Exhibit 7 to Mr. Lizak's 10 legislation, there's no requirement that there be a 11 finding of significant adverse environmental effects 11 first report which is Mineral Policy for Nova Scotia 12 12 1996, and the one-window approach, which is another in order for the Minister to reject the undertaking? 13 important document in understanding Nova Scotia's 13 A. Right, but you -- it says -- it 14 desire and it's really a desire and a policy to 14 will either cause adverse effects, will cause 15 15 really, in effect, give as smooth a path forward for adverse effects or significant adverse environmental 16 these kinds of applications as possible because they 16 effects which are unacceptable, which really implies 17 17 think it's important for their economy. that there are obviously some negativity to those 18 So there is an ability under this 18 effects. 19 section for the Minister to say, you know, it's just 19 Q. But I'm not asking about 20 too much -- there is nothing here. Goodbye. 20 negativity, sir. I'm just asking, there is no 21 21 Q. Pursuant to section 13(1), the requirement to make a finding of significant adverse 22 22 approval or rejection is based on the likelihood environmental effects? 23 23 that the project will cause adverse effects or A. The word "adverse" doesn't appear 24 significant environmental effects? 24 there. That is in one respect how the wording 25 25 A. Those are words that are used differs from SAEE. Page 471 Page 472 1 Q. But if you look at 13(1)(e) it 1 Q. Which are unacceptable, and the 2 2 says that a review of the information indicates that undertaking is rejected. 3 there is a likelihood that the undertaking will 3 A. I think the words "which are 4 cause adverse effects or significant environmental 4 unacceptable" in my opinion modify the words 5 5 effects? "significant environmental effects". That's my 6 6 opinion. A. Which are unacceptable. You 7 can't stop reading --7 O. But this provision does not state Q. Which are unacceptable and the 8 that there must be a finding of significant adverse 8 9 environmental effects in order to reject an 9 undertaking is rejected; correct? 10 A. Yes, so if you are trying to 10 undertaking? 11 suggest that -- I agree with you as to the fact 11 A. The word "adverse" is not used in 12 that, of course, the word "adverse" doesn't apply. 12 clause (e) yes, you're right. 13 It doesn't appear in this -- doesn't appear in --13 Q. So you would agree that this 14 14 "significant adverse" doesn't appear in that clause. provision does not state that there must be a 15 But if you are trying to say it is significant 15 finding of significant adverse environmental effects 16 16 adverse environmental effects then that is not a in order to reject the undertaking? 17 A. That would be the fair 17 fair reading because the way environmental effects 18 is defined under the Nova Scotia statute, as I think 18 implication of what I just said. 19 19 you would be aware, is that it can be positive or O. Great. 20 negative effects. 20 According to subparagraph (b) of 21 Q. Right, but in this provision it 21 section 13.1, the extent to which adverse effects or 22 refers to "adverse effects" or "significant 22 significant environmental effects are mitigable, 23 environmental effects", correct? Looking at the 23 that is also a relevant consideration in the 24 wording of this provision. 24 Minister's decision: correct? 25 A. Which are unacceptable. 25 A. Yes, that's what it says.

	Page 473		Page 474
1	Q. So let's turn to page 2 of the	1	compensation or any other means."
2	regulations and let's look at the definition of	2	[As read.]
3	mitigation under section 2(r).	3	A. Yes.
4	A. Sorry, where is that?	4	Q. Now let's turn to section 12 of
5	Q. So that would be page 2 of the	5	the regulations.
6	regulations.	6	A. While we're on that page, the
7	A. Where's the regulation? Sorry.	7	definition of environmental effects is on the same
8	Q. You're in the regulations.	8	page and you'll see, I think, what I was saying
9	A. Oh, we're in the	9	before that it is sort of one of those ambiguous
10	Q. 2(r), about halfway down the	10	terms. It says any change, whether positive or
11	page.	11	negative that the undertaking may cause, so that's
12	It is also on the screen in front of	12	why I think it is important to understand that in
13	you.	13	the clause you directed me to, it said environmental
14	A. Yes.	14	effects that are unacceptable, which is connoting
15	Q. And so you would agree that the	15	something that is not obviously positive.
16	definition of mitigation under the NSEA also means:	16	Q. Let's go to section 12 of the
17	"With respect to an undertaking,	17	regulations, which is "Factors Relevant to the
18	the elimination, reduction or	18	Minister's Decision."
19	control of the adverse effects or	19	A. Where is that? At the beginning
20	significant environmental effects	20	of bottom of page 6?
21	of the undertaking and may	21	Q. Bottom of page 6. Looking at
22	include restitution for any	22	this provision, you would agree that the factors
23	damage to the environment caused	23	that that the provision lists the information
24	by such effects through	24	that shall be considered by the in the Minister's

Let's go now to Exhibit R-081? A. And that's not my position. I hope you understand that. There is nothing that requires approval. Obviously, there are criteria, but what I am saying is when you look at the track record of what has happened in Nova Scotia, they have all been approved with terms and conditions, but for one that Mr. Geddes came up with was hidden in records that are not publicly available. Q. I understand you have an opinion but I'm only asking about this document.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	document? A. Yes. Q. Just for the record, you would agree that these factors include information such as the location of the proposed undertaking and the nature and sensitivity of the surrounding area? A. Yes. Q. It also includes the size and scope of the proposed undertaking? A. Yes. Q. It also includes concerns expressed by the public about adverse effects or the environmental effects of the proposed undertaking? A. Yes. Q. It also includes steps taken by the proponent to address environmental concerns? A. Yes. Q. And I won't read them all, but	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. Yes. Q. And just looking at these regulations, you would agree that there is nothing in the regulations that requires the approval of all quarry projects in Nova Scotia? A. Correct. Q. Let's go now to Exhibit R-081? A. And that's not my position. I hope you understand that. There is nothing that requires approval. Obviously, there are criteria, but what I am saying is when you look at the track record of what has happened in Nova Scotia, they have all been approved with terms and conditions, but for one that Mr. Geddes came up with was hidden in records that are not publicly available. Q. I understand you have an opinion but I'm only asking about this document. A. Right.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	document? A. Yes. Q. Just for the record, you would agree that these factors include information such as the location of the proposed undertaking and the nature and sensitivity of the surrounding area? A. Yes. Q. It also includes the size and scope of the proposed undertaking? A. Yes. Q. It also includes concerns expressed by the public about adverse effects or the environmental effects of the proposed undertaking? A. Yes. Q. It also includes steps taken by the proponent to address environmental concerns? A. Yes. Q. And I won't read them all, but you would agree that each of these factors under	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. Yes. Q. And just looking at these regulations, you would agree that there is nothing in the regulations that requires the approval of all quarry projects in Nova Scotia? A. Correct. Q. Let's go now to Exhibit R-081? A. And that's not my position. I hope you understand that. There is nothing that requires approval. Obviously, there are criteria, but what I am saying is when you look at the track record of what has happened in Nova Scotia, they have all been approved with terms and conditions, but for one that Mr. Geddes came up with was hidden in records that are not publicly available. Q. I understand you have an opinion but I'm only asking about this document. A. Right. Q. So let's turn now to Exhibit
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A. Yes. Q. Just for the record, you would agree that these factors include information such as the location of the proposed undertaking and the nature and sensitivity of the surrounding area? A. Yes. Q. It also includes the size and scope of the proposed undertaking? A. Yes. Q. It also includes concerns expressed by the public about adverse effects or the environmental effects of the proposed undertaking? A. Yes. Q. It also includes steps taken by the proponent to address environmental concerns? A. Yes. Q. And I won't read them all, but you would agree that each of these factors under section 12 relates specifically to the project	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A. Yes. Q. And just looking at these regulations, you would agree that there is nothing in the regulations that requires the approval of all quarry projects in Nova Scotia? A. Correct. Q. Let's go now to Exhibit R-081? A. And that's not my position. I hope you understand that. There is nothing that requires approval. Obviously, there are criteria, but what I am saying is when you look at the track record of what has happened in Nova Scotia, they have all been approved with terms and conditions, but for one that Mr. Geddes came up with was hidden in records that are not publicly available. Q. I understand you have an opinion but I'm only asking about this document. A. Right. Q. So let's turn now to Exhibit R-081, which is at Tab 8, 7 of your binder, and it
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. Yes. Q. Just for the record, you would agree that these factors include information such as the location of the proposed undertaking and the nature and sensitivity of the surrounding area? A. Yes. Q. It also includes the size and scope of the proposed undertaking? A. Yes. Q. It also includes concerns expressed by the public about adverse effects or the environmental effects of the proposed undertaking? A. Yes. Q. It also includes steps taken by the proponent to address environmental concerns? A. Yes. Q. And I won't read them all, but you would agree that each of these factors under section 12 relates specifically to the project that's being assessed?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. Yes. Q. And just looking at these regulations, you would agree that there is nothing in the regulations that requires the approval of all quarry projects in Nova Scotia? A. Correct. Q. Let's go now to Exhibit R-081? A. And that's not my position. I hope you understand that. There is nothing that requires approval. Obviously, there are criteria, but what I am saying is when you look at the track record of what has happened in Nova Scotia, they have all been approved with terms and conditions, but for one that Mr. Geddes came up with was hidden in records that are not publicly available. Q. I understand you have an opinion but I'm only asking about this document. A. Right. Q. So let's turn now to Exhibit R-081, which is at Tab 8, 7 of your binder, and it is titled, "The guide to preparing an assessment
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	A. Yes. Q. Just for the record, you would agree that these factors include information such as the location of the proposed undertaking and the nature and sensitivity of the surrounding area? A. Yes. Q. It also includes the size and scope of the proposed undertaking? A. Yes. Q. It also includes concerns expressed by the public about adverse effects or the environmental effects of the proposed undertaking? A. Yes. Q. It also includes steps taken by the proponent to address environmental concerns? A. Yes. Q. And I won't read them all, but you would agree that each of these factors under section 12 relates specifically to the project that's being assessed? A. Yes.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	A. Yes. Q. And just looking at these regulations, you would agree that there is nothing in the regulations that requires the approval of all quarry projects in Nova Scotia? A. Correct. Q. Let's go now to Exhibit R-081? A. And that's not my position. I hope you understand that. There is nothing that requires approval. Obviously, there are criteria, but what I am saying is when you look at the track record of what has happened in Nova Scotia, they have all been approved with terms and conditions, but for one that Mr. Geddes came up with was hidden in records that are not publicly available. Q. I understand you have an opinion but I'm only asking about this document. A. Right. Q. So let's turn now to Exhibit R-081, which is at Tab 8, 7 of your binder, and it is titled, "The guide to preparing an assessment registration document for pit and quarry developments in Nova Scotia." A. Right.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. Yes. Q. Just for the record, you would agree that these factors include information such as the location of the proposed undertaking and the nature and sensitivity of the surrounding area? A. Yes. Q. It also includes the size and scope of the proposed undertaking? A. Yes. Q. It also includes concerns expressed by the public about adverse effects or the environmental effects of the proposed undertaking? A. Yes. Q. It also includes steps taken by the proponent to address environmental concerns? A. Yes. Q. And I won't read them all, but you would agree that each of these factors under section 12 relates specifically to the project that's being assessed? A. Yes. Q. All of these factors would be	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. Yes. Q. And just looking at these regulations, you would agree that there is nothing in the regulations that requires the approval of all quarry projects in Nova Scotia? A. Correct. Q. Let's go now to Exhibit R-081? A. And that's not my position. I hope you understand that. There is nothing that requires approval. Obviously, there are criteria, but what I am saying is when you look at the track record of what has happened in Nova Scotia, they have all been approved with terms and conditions, but for one that Mr. Geddes came up with was hidden in records that are not publicly available. Q. I understand you have an opinion but I'm only asking about this document. A. Right. Q. So let's turn now to Exhibit R-081, which is at Tab 8, 7 of your binder, and it is titled, "The guide to preparing an assessment registration document for pit and quarry developments in Nova Scotia."

	Page 477		Page 478
1	284 of your second report which is in front of you.	1	A. Yes.
2	A. Uh-hmm.	2	Q. And can you please read out the
3	Q. You state that:	3	rest of this sentence?
4	"Importantly, the purpose of this	4	A. " however, there may be
5	guide is to provide consistency	5	project-specific issues that the proponent needs to
6	and a greater degree of certainty	6	address in the registration document that have not
7	regarding the information	7	been identified in the guide. Similarly, there may
8	submitted to register a pit or	8	be issues outlined in this guide that are not
9	quarry undertaking" [As read.]	9	relevant to the project."
10	Do you see that?	10	Do you want me to keep reading?
11	A. I do.	11	Q. No, I just asked you to read the
12	Q. And you would agree that this	12	rest of the sentence.
13	statement is taken from the second paragraph of page	13	A. Oh, sorry. Okay.
14	I of the guide?	14	Q. But thank you. So you would
15	A. I don't know, I'd have to look.	15	agree that project-specific issues may need to be
16	Q. It is the first page after the	16	addressed may need to be addressed in an EA of a
17	cover page in the second paragraph.	17 18	quarry?
18 19	A. Yes, yes, thank you.	19	A. Yes, I would hope so.
20	Q. Okay. If we continue down to the	20	Q. In the third sentence of this
21	third paragraph below, do you see the statement that	20	paragraph it states that coming upon-specific
22	says: "The issues addressed in this	22	information will vary according to the project type, location and surrounding environment."
23	guide are those typically	23	A. Yes.
24	associated with pit and quarry	24	Q. Do you see that? And you would
25	developments"	25	agree that information about quarry projects will
	or viopinona in		agree that marming acoust quarry projects with

This is the whole purpose of this document, as you've pointed out, is to provide consistency and a greater degree of certainty regarding information submitted to so the government is telling proponents of quarries, here's what we want in order for us and you to be successful, and that's very important, very helpful. Q. And you would agree though, Mr. Estrin, that project-specific information would be relevant to the Minister's decision with respect to an undertaking?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	vary according to the project type, location, and surrounding environment"? A. I can't agree with that statement without qualification, no. In fact, when you look at what is addressed in quarry registration documents, and I have a whole I have appendix of typical quarry registration documents as an appendix to my reply report. It is Appendix A: "Tables Of Contents From Class I EA Registration Documents For Three Nova Scotia Quarry Projects - Seabrook Quarry Expansion, Elmsdale Quarry Expansion Project And Nictaux Pit And Quarry Development." Generally speaking, if you look at the table of contents as to what is being dealt with in a registration document, you will see that they are generally similar. Q. But in terms of project-specific	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	may have little particularities that need to be considered. Q. And you are not disputing that project-specific information can also vary depending on the project type? A. No. Q. Okay. And you A. But having regard to what happens in Nova Scotia, Nova Scotia has given guidance. This is the whole purpose of this document, as you've pointed out, is to provide consistency and a greater degree of certainty regarding information submitted to so the government is telling proponents of quarries, here's what we want in order for us and you to be successful, and that's very important, very helpful. Q. And you would agree though, Mr. Estrin, that project-specific information would be relevant to the Minister's decision with respect to an undertaking? A. Well, it won't even get to the Minister probably if it doesn't have project-specific information. It would be said to
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	vary according to the project type, location, and surrounding environment"? A. I can't agree with that statement without qualification, no. In fact, when you look at what is addressed in quarry registration documents, and I have a whole I have appendix of typical quarry registration documents as an appendix to my reply report. It is Appendix A: "Tables Of Contents From Class I EA Registration Documents For Three Nova Scotia Quarry Projects - Seabrook Quarry Expansion, Elmsdale Quarry Expansion Project And Nictaux Pit And Quarry Development." But having regard to what happens in Nova Scotia, Nova Scotia has given guidance. This is the whole purpose of this document, as you've pointed out, is to provide consistency and a greater degree of certainty regarding information submitted to so the government is telling proponents of quarries, here's what we want in order for us and you to be successful, and that's very important, very helpful. Q. And you would agree though, Mr. Estrin, that project-specific information would be relevant to the Minister's decision with respect to an undertaking? A. Well, it won't even get to the Minister probably if it doesn't have

Page 484

Page 481 1 statement that project-specific information would be 2 relevant to the Minister's decision? 3 A. Every registration document will 4 have project-specific information -- it -- it won't 5 comply with what's required. Q. So you agree, "yes"? 6 7 A. I think, in general terms, yes. 8 Q. I just need a clear answer for 9 the record. 10 A. But it doesn't seem to me --11 it's -- it's an observation about -- that doesn't 12 really necessarily -- well, I'll let you do with it 13 what you want. 14 Q. Well, if we look at this 15 document, there is nothing in this guide that

> A. I thought I answered that question.

> Q. But I'm asking about this document here.

A. There is nothing -- of course not. There is nothing in -- no government would say all projects are prior approved except -- there can be an environmental assessment process. Actually,

requires the approval of all quarry projects in Nova

in Ontario, for example, we have class environmental assessments.

Environmental assessments started out as a project-specific assessment, as a planning tool, and is appropriate for larger projects. But then it was recognized that many projects go on that have similar characteristics and it doesn't necessarily do any good to reinvent the wheel every time you are proposing to, let's say, widen a street or extend a highway by a bit or extend a quarry, for example.

You can publish or you can regard those things as common features, common elements, to which we know what are the common -- likely common environmental attributes. So they provided for class environmental assessments which made it a much simpler document. And so it's been recognized and even the Canadian Environmental Assessment Act provides for class environmental assessments. So, really, yes, there will be individual differences between projects to some extent but when you look at this guide, what it's really saying is -- we are talking about sui generis, we are talking about a type of project, pits and quarries that have common characteristics that will require an application,

generally speaking, of common considerations and common mitigation measures. Yes, there might be a specific difference between that project over there and this one over there, and that would be taken care of by terms and conditions. That is why all of these quarries are approved, because the proponents actually pay attention to the guide, know what information they're supposed to provide, and to the extent that the government feels that there's something missing, they say, "Well, you haven't done this quite right, you haven't done this. We don't have enough information. We will give you an approval subject to preparing a blasting plan that we'll approve or preparing a groundwater protection plan that we'll approve". So, yeah, there is some -- they do take those things into account but they generally know that they are not approving a nuclear stockpile.

Q. Mr. Estrin, let's turn to tab 9 of your binder, which is Exhibit R-163, and this is titled "A proponent's guide to environmental assessment".

A. Tab 9. Yes.

O. Yes. And just for the record I want to ask you, there is nothing in this guide that requires the approval of all quarry projects in Nova Scotia?

A. There is nothing in anything I've seen that would require that.

Q. But nothing in this document; I'm just asking you to confirm.

A. I'd have to read it carefully again but, if there was, I would have said that. I would have pointed it out, you can be sure.

Q. So let's go to page 43 of your second report.

A. Yep. Which I recall my reply report or August report.

O. Yes, the second one. And it's page 43, please.

A. Okay.

Q. Part 2 of your report is titled "Reply to Ms. Griffiths and Dr. Blouin expert reports that prognosticate approvability challenges for WPQ if considered by a further review panel."

Do you see that?

A. Yes.

Q. And paragraph A states that, "Looking at approvability through a review panel lens is the wrong focus"?

[As read.] Do you see that? A. Yes. Q. And this was a key factor that	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A. It is one of them, but it is a key one. Q. So, I'd like to turn now to the rejoinder expert reports of Robert Connelly, which is at tab 10 of your binder. A. Yes. Q. And prior to your testimony today, you have reviewed Mr. Connelly's report? A. Yes. Q. Let's turn to page 15 of Mr. Connelly's report. A. Right. Q. In paragraph 38 of Mr. Connelly's report, he refers to three Federal Review Panels which found a likely SAEE without a federal department stating that one was likely; do you see that? A. Sorry, where is that exactly? Q. It's in paragraph 38 of Mr. Connelly's report. It is also up on the screen. A. Right. Right. Yes, I'm quite aware of that. Q. Okay. And you don't disagree
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	or "no", but keep it because otherwise I think we will go on for too long a time. THE WITNESS: Sure. PRESIDING ARBITRATOR: So if you could try, please. THE WITNESS: Sure. BY MS. KAM: Q. Please turn to paragraph 49 of your first report, in the damages phase. This would be your March report. A. Sorry, page or paragraph? Q. Paragraph 49. Here you state that: "No federal or provincial government agency or official took the position before the JRP that the WPQ should not be approved or that after mitigation it would look likely cause SAEE." [As read.] Do you see that? A. Yes.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A. It is one of them, but it is a key one. Q. So, I'd like to turn now to the rejoinder expert reports of Robert Connelly, which is at tab 10 of your binder. A. Yes. Q. And prior to your testimony today, you have reviewed Mr. Connelly's report? A. Yes. Q. Let's turn to page 15 of Mr. Connelly's report. A. Right. Q. In paragraph 38 of Mr. Connelly's report, he refers to three Federal Review Panels which found a likely SAEE without a federal department stating that one was likely; do you see that? A. Sorry, where is that exactly? Q. It's in paragraph 38 of Mr. Connelly's report. It is also up on the screen. A. Right. Right. Yes, I'm quite aware of that.

Page 490 Page 489 1 1 find SAEE even -- even if -- even if a department Q. And if you turn to page 3 of the 2 2 submission, you get to the table of contents. It is doesn't say that it it's going to be, and as I 3 3 acknowledged, you know, it isn't all the time that also up on the screen here. 4 4 departments get up and say in their opinion there A. Right. 5 5 will be SAEE but sometimes they do. Q. And you would agree that 6 Chapter 2 identifies Environment Canada's mandates, 6 Q. So let's turn to Exhibit 1405 at 7 roles and responsibilities as including the 7 tab 11 of your binder and this is a letter from 8 8 Environment --Fisheries Act, Pollution Prevention Provisions, the 9 9 A. Sorry, which tab? Migratory Bird Convention Act 1994 and the Species 10 10 Q. Tab 11. at Risk Act? 11 11 A. Yeah, okay. A. Yes. 12 12 O. And it is a letter from Q. So let's turn to page 6 of the 13 Environment Canada to the co-chairs of the Lower 13 submission. And could you please read out 14 14 Environment Canada's conclusion which starts in the Churchill JRP? 15 first sentence of the last paragraph? 15 A. Yes. 16 A. Overall... 16 O. And you are familiar with the 17 17 Lower Churchill JRP assessment? O. Yes. 18 A. Well, I think -- not as familiar 18 A. Yes. 19 19 "Overall, if the project and as Ms. Griffiths, who was a co-chair. 20 associated mitigation activities 20 Q. But you've cited it to your 21 21 report, so you are aware of the process. Okay, so are well executed, Environment 22 this letter attaches Environment Canada's 22 Canada expects there will not be 23 23 any significant adverse submission, which starts at page 4 of the exhibit. 24 environmental effects on 24 Do you see the submission on page 4? 25 25 A. Yeah, I did. All right. environmental matters within the Page 491 Page 492 1 department's mandate." 1 department's responsibility. So it is very 2 2 Q. So you'd agree, Mr. Estrin, this important in that case. And I understand 3 is an example where a government department 3 Ms. Griffiths, at the end of the panel of Lower 4 expressly states its opinion that there would be no 4 Churchill and her cohorts decided they disagreed 5 5 likely significant adverse environmental effects in with Environment Canada, right? 6 respect of a project? Q. Right. So let's turn to tab --6 7 7 A. Yes, exactly, and it confirms sorry. what I'm saying, that these departments will use the 8 8 A. And then the cabinet didn't agree opportunity, should they find likelihood of 9 9 with Ms. Griffiths. 10 10 significant adverse environmental effects, to advise Q. Okay, but let's turn to tab 12 of 11 a panel of it. 11 the binder then since you referred to the 12 Q. And you would agree here, 12 JRP Report. 13 Environment Canada's opinion is broadly stated in 13 A. All right. 14 14 respect of environmental matters within the Q. And let's go to page 110 of the 15 department's mandate? 15 report. And for the record, this is Exhibit C-81, 16 16 A. Of course. That's all I'd they'd the Lower Churchill JRP. 17 17 be focussing on. Somehow someone was trying to A. Page 110, the heading "Caribou" 18 misconstrue my view that you could not possibly have 18 or something? Sorry, where are you? 19 19 one government official try and say that -- you Q. Page 110, and I'm looking under 20 would never expect to have one government official 20 the heading "Caribou". And you would agree that it 21 come to a review panel with an opinion about the 21 states in the first paragraph, in the context of 22 whole project at SAEE. I never, ever said that. I 22 this EA, "The Red Wine Mountain ..." 23 said they would be very careful to act within their 23 A. Sorry, I'm not with you. Where 24 24 own jurisdiction, within their own framework, and does that start? 25 evaluate whether there would be SAEE within their 25 Q. I'm going to start with the

	Page 493		Page 494
1	second sentence under this paragraph.	1	legislation identified in Environment Canada's
2	A. The second sentence says, "The	2	submission as being part of its mandate?
3	Red Wine Mountain Caribou."	3	A. Yes.
4	Q. Yes, I'm not quoting it directly,	4	Q. So let's turn to the panel's
5	but you would agree	5	conclusions and recommendations which are at page
6	A. Let me read it please.	6	117 of the report.
7	All right, go ahead, sorry.	7	A. Uh-hmm.
8	Q. So looking at this sentence, you	8	Q. Could you please read the panel's
9	would agree that in the context of this EA, the Red	9	conclusion in the box at the bottom of the page?

And I give the floor to Mr. Nash for re-direct. RE-EXAMINATION BY MR NASH: Q. Mr. Estrin, in follow-up to one of Ms. Kam's questions, you were going to refer to a letter in the documents that you felt was significant with respect to a question that Ms. Kam asked. Could you go to that letter now and direct the tribunal to that document and the point you were
2 3 4 5 6 7 8 9 10 11	read, if you need. A. But, yes, go ahead. Q. And now if we turn to page 100 of the report. And there is another conclusion in a box. Could you please read that out loud for the record? A. (Reading): "The panel concludes that the residual adverse effects of the project on wetlands and riparian habitat, even with the appropriate mitigation is	2 3 4 5 6 7 8 9 10 11 12	A. Okay. PRESIDING ARBITRATOR: Thank you, Ms. Kam. And I give the floor to Mr. Nash for re-direct. RE-EXAMINATION BY MR NASH: Q. Mr. Estrin, in follow-up to one of Ms. Kam's questions, you were going to refer to a letter in the documents that you felt was significant with respect to a question that Ms. Kam asked. Could you go to that letter now and direct the tribunal to that document and the point you were going to make.
2 3 4 5 6 7 8 9 10 11 12 13	read, if you need. A. But, yes, go ahead. Q. And now if we turn to page 100 of the report. And there is another conclusion in a box. Could you please read that out loud for the record? A. (Reading): "The panel concludes that the residual adverse effects of the project on wetlands and riparian habitat, even with the appropriate mitigation is significant."	2 3 4 5 6 7 8 9 10 11 12 13	A. Okay. PRESIDING ARBITRATOR: Thank you, Ms. Kam. And I give the floor to Mr. Nash for re-direct. RE-EXAMINATION BY MR NASH: Q. Mr. Estrin, in follow-up to one of Ms. Kam's questions, you were going to refer to a letter in the documents that you felt was significant with respect to a question that Ms. Kam asked. Could you go to that letter now and direct the tribunal to that document and the point you were going to make. A. Yes. It's the document it's
2 3 4 5 6 7 8 9 10 11 12 13 14	read, if you need. A. But, yes, go ahead. Q. And now if we turn to page 100 of the report. And there is another conclusion in a box. Could you please read that out loud for the record? A. (Reading): "The panel concludes that the residual adverse effects of the project on wetlands and riparian habitat, even with the appropriate mitigation is significant." Q. So based on this example, you	2 3 4 5 6 7 8 9 10 11 12 13 14	A. Okay. PRESIDING ARBITRATOR: Thank you, Ms. Kam. And I give the floor to Mr. Nash for re-direct. RE-EXAMINATION BY MR NASH: Q. Mr. Estrin, in follow-up to one of Ms. Kam's questions, you were going to refer to a letter in the documents that you felt was significant with respect to a question that Ms. Kam asked. Could you go to that letter now and direct the tribunal to that document and the point you were going to make. A. Yes. It's the document it's Environment Canada letter that is found at tab 11 of
2 3 4 5 6 7 8 9 10 11 12 13 14 15	read, if you need. A. But, yes, go ahead. Q. And now if we turn to page 100 of the report. And there is another conclusion in a box. Could you please read that out loud for the record? A. (Reading): "The panel concludes that the residual adverse effects of the project on wetlands and riparian habitat, even with the appropriate mitigation is significant." Q. So based on this example, you would agree that even if a panel recommends	2 3 4 5 6 7 8 9 10 11 12 13 14 15	A. Okay. PRESIDING ARBITRATOR: Thank you, Ms. Kam. And I give the floor to Mr. Nash for re-direct. RE-EXAMINATION BY MR NASH: Q. Mr. Estrin, in follow-up to one of Ms. Kam's questions, you were going to refer to a letter in the documents that you felt was significant with respect to a question that Ms. Kam asked. Could you go to that letter now and direct the tribunal to that document and the point you were going to make. A. Yes. It's the document it's Environment Canada letter that is found at tab 11 of the binder which I assume the panel or the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	read, if you need. A. But, yes, go ahead. Q. And now if we turn to page 100 of the report. And there is another conclusion in a box. Could you please read that out loud for the record? A. (Reading): "The panel concludes that the residual adverse effects of the project on wetlands and riparian habitat, even with the appropriate mitigation is significant." Q. So based on this example, you would agree that even if a panel recommends mitigation, it can still conclude that a project is	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	A. Okay. PRESIDING ARBITRATOR: Thank you, Ms. Kam. And I give the floor to Mr. Nash for re-direct. RE-EXAMINATION BY MR NASH: Q. Mr. Estrin, in follow-up to one of Ms. Kam's questions, you were going to refer to a letter in the documents that you felt was significant with respect to a question that Ms. Kam asked. Could you go to that letter now and direct the tribunal to that document and the point you were going to make. A. Yes. It's the document it's Environment Canada letter that is found at tab 11 of the binder which I assume the panel or the tribunal has.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	read, if you need. A. But, yes, go ahead. Q. And now if we turn to page 100 of the report. And there is another conclusion in a box. Could you please read that out loud for the record? A. (Reading): "The panel concludes that the residual adverse effects of the project on wetlands and riparian habitat, even with the appropriate mitigation is significant." Q. So based on this example, you would agree that even if a panel recommends mitigation, it can still conclude that a project is likely to result in significant adverse	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	A. Okay. PRESIDING ARBITRATOR: Thank you, Ms. Kam. And I give the floor to Mr. Nash for re-direct. RE-EXAMINATION BY MR NASH: Q. Mr. Estrin, in follow-up to one of Ms. Kam's questions, you were going to refer to a letter in the documents that you felt was significant with respect to a question that Ms. Kam asked. Could you go to that letter now and direct the tribunal to that document and the point you were going to make. A. Yes. It's the document it's Environment Canada letter that is found at tab 11 of the binder which I assume the panel or the tribunal has. And I think it is important to
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	read, if you need. A. But, yes, go ahead. Q. And now if we turn to page 100 of the report. And there is another conclusion in a box. Could you please read that out loud for the record? A. (Reading): "The panel concludes that the residual adverse effects of the project on wetlands and riparian habitat, even with the appropriate mitigation is significant." Q. So based on this example, you would agree that even if a panel recommends mitigation, it can still conclude that a project is likely to result in significant adverse environmental effects?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. Okay. PRESIDING ARBITRATOR: Thank you, Ms. Kam. And I give the floor to Mr. Nash for re-direct. RE-EXAMINATION BY MR NASH: Q. Mr. Estrin, in follow-up to one of Ms. Kam's questions, you were going to refer to a letter in the documents that you felt was significant with respect to a question that Ms. Kam asked. Could you go to that letter now and direct the tribunal to that document and the point you were going to make. A. Yes. It's the document it's Environment Canada letter that is found at tab 11 of the binder which I assume the panel or the tribunal has. And I think it is important to recognize here that this letter and the accompanying
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	read, if you need. A. But, yes, go ahead. Q. And now if we turn to page 100 of the report. And there is another conclusion in a box. Could you please read that out loud for the record? A. (Reading): "The panel concludes that the residual adverse effects of the project on wetlands and riparian habitat, even with the appropriate mitigation is significant." Q. So based on this example, you would agree that even if a panel recommends mitigation, it can still conclude that a project is likely to result in significant adverse environmental effects? A. Certainly, I would hope they	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	A. Okay. PRESIDING ARBITRATOR: Thank you, Ms. Kam. And I give the floor to Mr. Nash for re-direct. RE-EXAMINATION BY MR NASH: Q. Mr. Estrin, in follow-up to one of Ms. Kam's questions, you were going to refer to a letter in the documents that you felt was significant with respect to a question that Ms. Kam asked. Could you go to that letter now and direct the tribunal to that document and the point you were going to make. A. Yes. It's the document it's Environment Canada letter that is found at tab 11 of the binder which I assume the panel or the tribunal has. And I think it is important to recognize here that this letter and the accompanying document that I was taken to, was generated in
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	read, if you need. A. But, yes, go ahead. Q. And now if we turn to page 100 of the report. And there is another conclusion in a box. Could you please read that out loud for the record? A. (Reading): "The panel concludes that the residual adverse effects of the project on wetlands and riparian habitat, even with the appropriate mitigation is significant." Q. So based on this example, you would agree that even if a panel recommends mitigation, it can still conclude that a project is likely to result in significant adverse environmental effects? A. Certainly, I would hope they would take that into account in reaching because the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	A. Okay. PRESIDING ARBITRATOR: Thank you, Ms. Kam. And I give the floor to Mr. Nash for re-direct. RE-EXAMINATION BY MR NASH: Q. Mr. Estrin, in follow-up to one of Ms. Kam's questions, you were going to refer to a letter in the documents that you felt was significant with respect to a question that Ms. Kam asked. Could you go to that letter now and direct the tribunal to that document and the point you were going to make. A. Yes. It's the document it's Environment Canada letter that is found at tab 11 of the binder which I assume the panel or the tribunal has. And I think it is important to recognize here that this letter and the accompanying document that I was taken to, was generated in response to a request from the review panel to that
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	read, if you need. A. But, yes, go ahead. Q. And now if we turn to page 100 of the report. And there is another conclusion in a box. Could you please read that out loud for the record? A. (Reading): "The panel concludes that the residual adverse effects of the project on wetlands and riparian habitat, even with the appropriate mitigation is significant." Q. So based on this example, you would agree that even if a panel recommends mitigation, it can still conclude that a project is likely to result in significant adverse environmental effects? A. Certainly, I would hope they would take that into account in reaching because the test is likely significant adverse environmental	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A. Okay. PRESIDING ARBITRATOR: Thank you, Ms. Kam. And I give the floor to Mr. Nash for re-direct. RE-EXAMINATION BY MR NASH: Q. Mr. Estrin, in follow-up to one of Ms. Kam's questions, you were going to refer to a letter in the documents that you felt was significant with respect to a question that Ms. Kam asked. Could you go to that letter now and direct the tribunal to that document and the point you were going to make. A. Yes. It's the document it's Environment Canada letter that is found at tab 11 of the binder which I assume the panel or the tribunal has. And I think it is important to recognize here that this letter and the accompanying document that I was taken to, was generated in response to a request from the review panel to that department, that expert department, to provide its
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	read, if you need. A. But, yes, go ahead. Q. And now if we turn to page 100 of the report. And there is another conclusion in a box. I understand your response to be that there is commonality between certain projects and that there are certain common features of projects which need to be taken into account. Can you elaborate on that, please, and why what the basis is for your statement in that regard? A. Sure. Well, I think one of the best rationales for that is the government of Nova Scotia's own documents that weren't referred that weren't referred to. One of them is which is

	Page 505		Page 506
1	"A user's guide to the one window	1	industry. The 'one window'
2	process for mine development and	2	process facilitates an informed,
3	approvals in Nova Scotia." [As	3	timely and consistent review of
4	read.]	4	new and existing mining projects
5	And that was issued in March 2000.	5	in the province." [As read.]
6	And very important statements are made in that	6	And they basically say we are going to
7	document which, I think, helps put all this into	7	get all the government departments together to have,
8	focus. They say, the preface:	8	in effect, a one window approach and have a one
9	"The Government of Nova Scotia	9	window standing committee. And then they go on to
10	has undertaken a one window	10	say, in the next paragraph:
11	approach for reviewing,	11	"This users' guide has been
12	permitting and monitoring mine	12	prepared by the Department of
13	development projects in Nova	13	Natural resources to assist
14	Scotia." [As read.]	14	interested parties to understand
15	Stopping there, I take it that	15	the approvals process for mine
16	throughout this proceeding I think we've all taken it	16	development in Nova Scotia. It
17	that quarries and aggregate are generically part of	17	contains information on
18	mining for Nova Scotia's purposes.	18	environmental approvals, binding
19	It goes on to say:	19	leases, et cetera. The guidebook
20	"This approach formalizes how	20	focuses on the early stages of
21	government departments involved	21	the project screening through
22	with mine development activities	22	planning and implementation,
23	act collectively to streamline	23	thorough planning and
24	the review process for both	24	implementation provide the
25	government and the mining	25	strongest likelihood for the
	government and the mining		strongest inclinioud for the

Page 509 Page 510 1 1 to the department. Whites Point Quarry's environmental impact statement 2 2 was comprehensive, thousands of pages, considered And that's -- that's really, I think, 3 3 fundamental. I'm from Alberta, I grew up in Alberta, things in much more detail, and yet didn't reveal 4 and I went to law school in Alberta, and I've 4 anything startling or unique. So if it had been 5 5 appeared before the Energy Resources Conservation handled in the ordinary regular way by regulators, it 6 6 Board in Alberta and the National Energy Board, and would have been approved by Nova Scotia. 7 7 I've actually acted for ratepayers in Alberta trying Q. Could you turn, please, to tab 6 8 8 to oppress a petrochemical complex, and you just get of the white binder in front of you, Environmental 9 9 the feeling that you shouldn't even be in the room Assessment Regulations. 10 10 when a petrochemical complex is being proposed A. Yes. 11 11 because government favour petrochemical development Q. You were taken by Ms. Kam to page 12 12 in Alberta. 7, tab 6, page 7. Paragraph 13. And that is the 13 paragraph which refers to the Minister's decision 13 Well, similarly, it seems to me, in 14 upon registration of Class I undertaking; do you see 14 Nova Scotia, it's quite clear from their policy 15 15 documents that they favour very highly the advantages that? 16 16 of aggregate and other mineral resources being A. Yes. 17 17 developed. They want to have an expeditious and O. And 13(1) says: "No later than 25 days following 18 consistent process for the proponents, and so that's 18 19 the date of registration, the 19 why they help -- tell everyone, here's the kind of 20 20 information you need, and that, I think, helps administrator shall advise the 21 21 proponent in writing of the explain why things do get approved, because they set 22 decision of the Minister within 22 it out and proponents listen. 23 23 25 days. And I can't understand how Whites 24 See that? 24 Point Quarry could be any different than a pit or 25 A. Yes. 25 quarry that goes through the standard process. Page 511 Page 512

Q. And 13 (1) says: 2 "No later than 25 days following the date of registration, the 4 administrators shall advise the proponent in writing of the decision of the Minister within 25 days." Was the Whites Point Project handled

under that paragraph by your understanding?

A. No.

24

25

Q. And why do you say that?

A. Because it was referred by the Minister to a review panel. So that particular -so that would not be the process that was applied to Whites Point.

Q. So by your understanding, did the provisions of paragraph 13 apply to the Whites Point Project?

A. No. There is other specific wording in the statute and regulations that pertain to the Minister's decision-making ability following referral of a project to the Environmental Assessment Board in Nova Scotia. So there's other sections, other sections to which this one -- that are relevant. This one isn't specifically.

Q. Ms. Kam also made the distinction for you between significant environmental effect and adverse effect. Is it your understanding that every human activity has an effect and often an adverse effect on the environment?

A. Well, the -- it goes back to the definition in Nova Scotia of environmental effect on page 2 of that same regulation. Environmental effect means, in respect of an undertaking, any change, whether positive or negative, that the undertaking may cause in the environment.

So, you know, it could be -- allow more hiking trails, if you clear some bush. That could be an environmental effect.

Q. Thank you. And you've indicated that it was significant for you that government -no government official stated or took the position before the Whites Point JRP that the project should not be approved or that after mitigation it would likely have SAEEs. What is the significance of that for you? How is that significant?

A. Well, as a lawyer who's practised in front of Environmental Assessment Tribunals for several years, for many years, it's always critical to have a -- some idea of where the government is

Page 513 coming from in respect of my project, if I'm acting

2 for the proponent -- or even if I'm acting for the

3 opponent -- because government officials' opinions 4

will matter most to an Environment Assessment Tribunal. Even though they are independent of the

government, an Environmental Assessment Panel member

will obviously have close regard to opinions of a

government scientists unless they are shown to be

9 completely off base or incredible. 10 So just in the same way that

Ms. Griffiths in Lower Churchill wrote to Environment Canada and DFO and everybody else "say come and tell me whether or not you believe there is significant adverse environmental effects or effect or what are the impacts of the project" and Mr. Connelly wrote in the Prosperity Goldmine case and several other examples that I've provided and in the Whites Point Quarry wrote panel, JRP, wrote to a government department saying please come and tell us what you think the effects are. If these people, they are invited to come and they have a responsibility under the Act to provide their expertise under the Canadian Environmental

Assessment Act and so they know that they have some

real concerns, they have an obligation to identify

it. Or if they have a concern that can be taken care of by a term and condition later without effecting of approvability, they should say that.

And it is the latter that happened in Whites Point. Government officials were invited to come, both Nova Scotia and Canadian and I reviewed the transcripts and everything they've said and not one of them ever said there would be likely SAEE. They said in some cases "we have a concerns but these can be taken care of by either by terms and conditions". Mostly the Nova Scotia folks said that. And the other people would say, "well, yeah, and by appropriate conditions or follow-up work afterward."

So, it's significant and contrast that with what happened with Mr. Connelly and the Prosperity Gold case. He wrote a witness statement that said "oh, no it would be really a bad thing. It would be bias if a government official came to a tribunal and told the tribunal that in his or her opinion there would be SAEE". That's in his first report.

And I was quite perplexed by how he could say that because that's actually opposite what government officials do if they have to do it. And

Page 515

lo and behold -- and Mr. Connelly only has chaired two panels under SAEE and one of them, Prosperity, the government officials came and told his panel that in their view there would be significant adverse environmental effects and Mr. Connelly and

his panel accepted that. And in fact, acknowledged it in their panel report on Prosperity Gold that they relied on the opinion of, I think it was

Transport Canada, that there would be significant adverse impacts for the aboriginal community on navigation.

So I was very perplexed by Mr. Connelly's first report when he said "it would be bias, almost bias" for a government official to say something like that when he knew it happened in front of one of his panels and he relied on it and he accepted it.

Q. I'm not sure exactly that I followed your evidence with respect to mitigation and its relationship to a finding of likely significant adverse environmental effects.

Can you just run us through the process of establishing likelihood, significance, an effect and how mitigation then folds into that analysis by your understanding?

Page 516

1 A. Yeah. I just want to get 2 section 16 in front of me if I could. So 3 section 16, one of SAEE, talks about -- and it was 4 put to me: 5

"Every screening or comp study of a project in every mediation or assessment by a review panel shall include a consideration of the following."

MR. NASH: Could I interrupt for one second? We are at tab 2 of the binder.

> THE WITNESS: Yeah, sorry. MR. NASH: At page 9.

THE WITNESS: Thanks.

Right, on paragraph -- section 16.

So they -- whether it's a screening, a comp study which are both done by government department officials or a review panel, they shall include a consideration of the following factors.

A) is the environmental effects of the project, including environmental effects of malfunctions or accidents, and any cumulative effects that are likely to result from the project. So, right. So, you have to consider the environmental effects of the project. That's one thing. So that's

Page 517

l

Page 518

whether or not there is any change, in affect, to a valued ecosystem component like birds or water quality.

Then they have to, under (b) look at the significance of any effects that they identify. And they have to take into accounts into account comments by the public and then (d)take into account and consider measures that are technically and economically feasible and that would mitigate any significant adverse environmental effects of the project and then any other matters that they are told to look at by terms of reference, if there are.

So what's really quite simple in a way is you identify environmental effects of a project and then you consider potentially the significance of those effects and then you need to determine whether or not they are going to be with -- with reasonable mitigation measures, whether or not they are likely to result in SAEE or not.

But, there's, you know, the only thing that specifically in section 16 that says that mitigation measures need to be technically and economically feasible and need to be particularized is in respect of significant adverse environmental effects because, as Mr. Connelly says the cabinet

would like it have some help if they want to overturn a finding of SAEE. But otherwise, a panel strictly speaking, can go with the proponent's environmental impact study because all these studies say here's the effect, here's the potential mitigation measure and here is the net result and we consider it not to be significant.

And I made an analysis of these, of these factors, Mr. Chair -- Mr. Simma, in Appendix D, for example, to my first report. I actually looked at a comparison of valued ecosystem components, potential environmental effect and residual environmental effects for Whites Point, Black Point, Aguathuna, Belleoram and Tiverton.

And this is my March report 2017. What it does is it actually -- so I've got a list of the VECs that were considered in each one and they are set out side by side.

I've got a list and then we look at -- I don't know if you have it handy, if you want to look at it. But, for example, let's take the VEC for birds which is about four pages into the appendix under the heading "Birds". So there is a VEC of migratory land birds for Whites Points; Black Point said effects on birds; Aguathuna was

Page 519

Page 520

considering the effects on migratory birds; and Belleoram, marine birds.

Anyway, then potential effects. Each one considered potential effects and they describe them and they are quite similar in each case. What are the potential effects from lighting, from alteration of the habitat? And then they at the end of the day come up with residual effects after mitigation. So they have to make a determination, if we apply certain mitigation measures.

And so what I found for each one of these things, for all of these VECs, that after these proponents went through their documents and in the case of Belleoram and Aguathuna and Black Point this had to be the Federal government at the end of the day agreeing with these, civil servants, in all cases they found residual effects after mitigation as not-significant, not-significant, nonsignificant, insignificant, same terms. And that was the same assessment as was contained in Whites Points Environmental Impacts Statement.

So it's quite important to at least look at and see is there some reason when you consider all these things, when you evaluate these VECs, when you think about mitigation measures, what is it that makes one project so bad that it can't be approved considering the comparable projects all ended up being evaluated as having nonsignificant environmental effects with certain measures being taken.

And I can't find anything in the years that I've spent on this project now, going through the documents that suggest to me there's anything unique about Whites Point Quarry and had it been processed in the normal way, for those reasons, among other things, it would have been approved.

Q. If you, Mr. Estrin, those are my questions.

No request for -- sorry, no request for? So

questions from the tribunal and Mr. Schwartz. QUESTIONS BY THE TRIBUNAL:

PROFESSOR SCHWARTZ: If there had been a judicial review and an order that, a determination that things had been done below the legal standard from the point of view of judicial review, the same officials or a different panel would have done the do-over?

THE WITNESS: Well, often the court might suggest -- the court may or may not say anything on the topic. But if they do say anything

(613) 564-2727

Page 521

they might suggest that it should be different

people.

PROFESSOR SCHWARTZ: I'm looking at the table you just referred to, sir, and the conclusions about residual effect after mitigation, your source for that is the proponent's own environmental impact statement?

THE WITNESS: Right. But what's important, I guess in that regard, is that federal official had to consider that and determine whether or not in each case they agreed with those conclusions. And in each case government in Aguathuna, and Belleoram, Tiverton, they all agreed that those mitigation measures that would be applied would be appropriate to make it nonsignificant.

There's -- I mean I found -- so we could go back and look at the details, but the fact is it isn't just a proponent coming up and saying hey, we found them insignificant. Federal officials still have to apply the same degree of inquiry to those things as they would to anything else and they did. Both before and after Whites Point, they...

I actually prepared a document where I looked at the mitigation measures that were actually used in these projects. And I found that they were

Page 522

essentially similar, which explains why, in effect, there is reason to have confidence that they could be mitigated because government officials agreed in each case. But the mitigation measures -- and I compared them to Whites Point, Black Point, Aguathuna and they were essentially similar. So, again, that's another reason why I think it's, it's -- it can be objectively determined, if you like, that there isn't anything really unique about Whites Point that would stand in the way of some approvability, except politics.

PROFESSOR SCHWARTZ: Well, between approvability and rejection there is approval with mitigation measures?

THE WITNESS: Yes, yes.

PROFESSOR SCHWARTZ: And your table relies it seems entirely on the proponent's own identification of whether there is adverse effect. It doesn't say that the federal government agreed with the proponent in every case.

THE WITNESS: No, well, that's right. And actually if you go to the screening decisions by Canada, for example, with regard to Aguathuna and Belleoram and the actual approval document that they got at the end of the day from the government --

Page 523

which are in the record and I can help you identify where they are in the exhibit.

Basically, the Federal Minister of Environment would approve -- approved Tiverton and Belleoram and Aguathuna or the Fisheries Minister did, essentially on condition that they apply the mitigation measures they identified in their report. And they might say, "and develop a follow-up program to be approved by the department".

So they normally -- I mean, consultants acting for proponents want to get an approval for their client so they have discussions with government officials and make sure that before they hand in their document, at least they have an understanding of what government officials would like. And so, that's why it isn't surprising, really, that government officials are able to -- I mean, they give consideration to it but they are not taken by surprise when a proponent hands in the document with these mitigation measures.

PROFESSOR SCHWARTZ: Right, but the Joint Review Panel or the Nova Scotia Minister or the Governor in Council could have attached terms and conditions as long as they did so reasonably within the terms of their statute.

Page 524

THE WITNESS: Right.

PROFESSOR SCHWARTZ: And could they not have reasonably come to different mitigation measures than the proponent itself identified?

THE WITNESS: Well, what I have identified I believe is that the mitigation measures proposed by Whites Point were actually very similar to the Black Point Quarry.

And if you turn to -- and I actually document this quite carefully. There is an appendix to my August report. It is Appendix C which is comparison of Black Point Quarry Federal Ministerial EA Mitigation and Measures Opposed to Whites Point Quarry proposed mitigation measures.

And I think it would be helpful to just look at that for a minute to help more meaningfully answer your question. So it's -- I don't know if your volume is tabbed or not but it is Appendix C and it is headed -- do you have it?

PROFESSOR SCHWARTZ: Yes.

THE WITNESS: Okay. Just, for example, go to the first page of that, well it is page 2.

So on the left-hand side I have the federal -- BPQ, Federal Ministerial Condition

	Page 525		Page 526
1	Statement which is actually the whole document is at	1	and the Nova Scotia pit and
2	Appendix F, the original copy of the federal	2	quarry guidelines."
3	decision. And I've extracted these things under	3	The measures shall include "measures
4	specific heading.	4	to control erosion and runoff". So then I put, okay,
5	So under the heading Prevent and	5	so what did about did Bilcon propose? And that's in
6	Mitigate Water Impact on Fish Habitat, the conditions	6	the right-hand column. And you can see exactly what
7	for BBQ was this is under the general public	7	Bilcon proposed in that regard. And these are all
8	measures to control erosion and runoff. They will	8	footnoted to various sections in the Bilcon
9	have measures to capture and treat runoff prior to	9	Environmental Impact Statement.
10	discharge in the environment.	10	Implementation, Bilcon committed to
11	And there is you can actually, I	11	implementation of erosion and sediment control plan.
12	think, go to appendix F and you see that there	12	Incremental reclamation procedures will reduce areas
13	is actually under that maybe it's not that useful.	13	susceptible to erosion. Recycling of soils for use
14	They just say that's all they say. They say:	14	in incremental reclamation will use existing
15	"The proponent shall implement	15	resources. The quarry floor will be back sloped to
16	under 3.1 generally, all	16	direct run off waters from Bay of Fundy," et cetera.
17	reasonable measures to prevent,	17	And you can see the same thing. Let's
18	mitigate adverse environment	18	go to the next I think it is even more helpful to
19 20	effects on fish and fish habitat	19	the go to the one about whales. So let's go to

The measures shall	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	inbound and outbound shipping lanes. They will consider new information at risk." Third bullet: "Employment of trained observers for citing mammals and water fowl within defined safety zones and vessel approach/departure route. Observation of shipping channel and safety zone for presence of marine mammals." [As read.] Let's go to 3.6.2. "The Minister at Black Point required that vessels respect speed profile applicable to the operation of the designated project subject to navigational safety to prevent, reduce the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Quarry which, as you've heard and is written about is a much larger quarry than Whites Point would be, much more blasting, much larger, much more shipping, all of those things. Anyway, it says for designate this is what they imposed on Black Point: "For designated project-related vessels transiting between shipping lanes in the marine terminal, the proponent shall implement measures to mitigate the risk of collisions with whales, harbour porpoises, and sea turtles taking into account the notice for mariners general guidelines for aquatic species at risk in important Marine Mammal Areas. The measures shall include conducting and recording	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	inbound and outbound shipping lanes. They will consider new information at risk." Third bullet: "Employment of trained observers for citing mammals and water fowl within defined safety zones and vessel approach/departure route. Observation of shipping channel and safety zone for presence of marine mammals." [As read.] Let's go to 3.6.2. "The Minister at Black Point required that vessels respect speed profile applicable to the operation of the designated project subject to navigational safety to prevent, reduce the risk of collisions between
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Quarry which, as you've heard and is written about is a much larger quarry than Whites Point would be, much more blasting, much larger, much more shipping, all of those things. Anyway, it says for designate this is what they imposed on Black Point: "For designated project-related vessels transiting between shipping lanes in the marine terminal, the proponent shall implement measures to mitigate the risk of collisions with whales, harbour porpoises, and sea turtles taking into account the notice for mariners general guidelines for aquatic species at risk in important Marine Mammal Areas. The measures shall include conducting and recording observations for whales, harbour	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	inbound and outbound shipping lanes. They will consider new information at risk." Third bullet: "Employment of trained observers for citing mammals and water fowl within defined safety zones and vessel approach/departure route. Observation of shipping channel and safety zone for presence of marine mammals." [As read.] Let's go to 3.6.2. "The Minister at Black Point required that vessels respect speed profile applicable to the operation of the designated project subject to navigational safety to prevent, reduce the risk of collisions between vessels and whales and harbour
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	Quarry which, as you've heard and is written about is a much larger quarry than Whites Point would be, much more blasting, much larger, much more shipping, all of those things. Anyway, it says for designate this is what they imposed on Black Point: "For designated project-related vessels transiting between shipping lanes in the marine terminal, the proponent shall implement measures to mitigate the risk of collisions with whales, harbour porpoises, and sea turtles taking into account the notice for mariners general guidelines for aquatic species at risk in important Marine Mammal Areas. The measures shall include conducting and recording observations for whales, harbour porpoises and sea turtles."	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	inbound and outbound shipping lanes. They will consider new information at risk." Third bullet: "Employment of trained observers for citing mammals and water fowl within defined safety zones and vessel approach/departure route. Observation of shipping channel and safety zone for presence of marine mammals." [As read.] Let's go to 3.6.2. "The Minister at Black Point required that vessels respect speed profile applicable to the operation of the designated project subject to navigational safety to prevent, reduce the risk of collisions between vessels and whales and harbour porpoises and sea turtles." [As
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Quarry which, as you've heard and is written about is a much larger quarry than Whites Point would be, much more blasting, much larger, much more shipping, all of those things. Anyway, it says for designate this is what they imposed on Black Point: "For designated project-related vessels transiting between shipping lanes in the marine terminal, the proponent shall implement measures to mitigate the risk of collisions with whales, harbour porpoises, and sea turtles taking into account the notice for mariners general guidelines for aquatic species at risk in important Marine Mammal Areas. The measures shall include conducting and recording observations for whales, harbour porpoises and sea turtles." Just to go the right-hand column on	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	inbound and outbound shipping lanes. They will consider new information at risk." Third bullet: "Employment of trained observers for citing mammals and water fowl within defined safety zones and vessel approach/departure route. Observation of shipping channel and safety zone for presence of marine mammals." [As read.] Let's go to 3.6.2. "The Minister at Black Point required that vessels respect speed profile applicable to the operation of the designated project subject to navigational safety to prevent, reduce the risk of collisions between vessels and whales and harbour porpoises and sea turtles." [As read.]
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Quarry which, as you've heard and is written about is a much larger quarry than Whites Point would be, much more blasting, much larger, much more shipping, all of those things. Anyway, it says for designate this is what they imposed on Black Point: "For designated project-related vessels transiting between shipping lanes in the marine terminal, the proponent shall implement measures to mitigate the risk of collisions with whales, harbour porpoises, and sea turtles taking into account the notice for mariners general guidelines for aquatic species at risk in important Marine Mammal Areas. The measures shall include conducting and recording observations for whales, harbour porpoises and sea turtles." Just to go the right-hand column on what Bilcon was proposing in that regard. First of	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	inbound and outbound shipping lanes. They will consider new information at risk." Third bullet: "Employment of trained observers for citing mammals and water fowl within defined safety zones and vessel approach/departure route. Observation of shipping channel and safety zone for presence of marine mammals." [As read.] Let's go to 3.6.2. "The Minister at Black Point required that vessels respect speed profile applicable to the operation of the designated project subject to navigational safety to prevent, reduce the risk of collisions between vessels and whales and harbour porpoises and sea turtles." [As read.] And what did Bilcon propose ten years
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Quarry which, as you've heard and is written about is a much larger quarry than Whites Point would be, much more blasting, much larger, much more shipping, all of those things. Anyway, it says for designate this is what they imposed on Black Point: "For designated project-related vessels transiting between shipping lanes in the marine terminal, the proponent shall implement measures to mitigate the risk of collisions with whales, harbour porpoises, and sea turtles taking into account the notice for mariners general guidelines for aquatic species at risk in important Marine Mammal Areas. The measures shall include conducting and recording observations for whales, harbour porpoises and sea turtles." Just to go the right-hand column on	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	inbound and outbound shipping lanes. They will consider new information at risk." Third bullet: "Employment of trained observers for citing mammals and water fowl within defined safety zones and vessel approach/departure route. Observation of shipping channel and safety zone for presence of marine mammals." [As read.] Let's go to 3.6.2. "The Minister at Black Point required that vessels respect speed profile applicable to the operation of the designated project subject to navigational safety to prevent, reduce the risk of collisions between vessels and whales and harbour porpoises and sea turtles." [As read.]

Page 529		Page 530
the hearing, so it was written in 2003, or 2004 or	1	read.]
2005. So Bilcon actually anticipated this issue and	2	Well, you're going to possibly hear
they said, this is the right-hand column, the bottom	3	about what the Minister has been doing in other
bullet on page 4 of appendix C:	4	areas, like the Gulf of St. Lawrence, about potential
"Vessel speed reductions and/or	5	risk of collisions with vessels. And if a fair
course alteration in case of	6	comparison, if it was trying to make a fair
whale sightings within designated	7	comparison, we would see that Bilcon actually
approach speed,		anticipated everything that's been imposed today in
approach/departure routes,	9	terms by the Minister in its concern about Right
reduced vessel speed, ten knots		whales. And so one maybe, just one more because this
or less, and/or alteration of		was an issue in the last hearing, on page 6:
course in case of sighting of	12	"Avoid harm to fish habitat when
marine mammals within designated		using explosives." [As read.]
shipping route." [As read.]	14	So the issue of what blasting might do
And they went on to say:		to fish was also an issue in both cases.
"Marine mammal interactions		In Black Point, under condition 3.7,
within the vessel turning radius	17	the Minister said:
are uniquely" [As read.]	18	"The proponent shall, unless
And then the last bullet:		otherwise authorized under the
"Bilcon also stated in its	20	Fisheries Act, implement measures
commitment table that it would	21	to prevent or avoid the
not permit a ship speed in excess	22	destruction of fish or any
of 12 kilometres an hour during		potentially harmful effects to
the transit from shipping lanes		fish during all phases of the
to the marine terminal." [As	25	project when using explosives in
Page 531		Page 532
or around waters frequented by	1	think it does help to compare what has happened and
	2	particularly because Black Point, what's unique about
	3	Black Point, Professor Schwartz, is that the
	4	mitigation, Black Point was considered, it wasn't a
fish and fish habitat under the	5	panel review but it was conducted by the Canadian
Nova Scotia pit and quarry	6	Environmental Assessment agency - this is the agency
guidelines." [As read.]	7	with all the expertise in it - to really look at and
What did Bilcon say, in the right-hand	8	basically handle possibly larger contentious projects
column:	9	that aren't sent to a panel. And so they have
"Blasting will be guided by	10	available to them all the resources of Canadian
Bilcon of Nova Scotia's	11	government departments and they are a full-time staff
Corporation's blasting protocol	12	of professionals within the CEAA Agency.
	13	So they actually conducted a detailed
	14	environmental assessment review and made a report,
	15	and it's an exhibit. Their environmental assessment
	16	report is actually contained in tab 13 of this binder
	17	of documents that was handed out by Canada.
Bilcon anticipated the very types of	18	They basically and it was so at
	19	the end of the day, they made recommendations to the
bigger Black Point quarry ten years later.	20	Ministers on what type of conditions would be
	21	mitigation measures would be appropriate. And the
fact compare these and you will see that, in almost	22	Minister, by and large, followed some followed
every case, Bilcon actually anticipated and in some	23	those recommendations, and so here we have an example
every case, bircon actuary anticipated and in some	1	those recommendations, and so here we have an example
cases had even more detailed mitigation measures	24	of Canadian government officials at the highest level
	the hearing, so it was written in 2003, or 2004 or 2005. So Bilcon actually anticipated this issue and they said, this is the right-hand column, the bottom bullet on page 4 of appendix C: "Vessel speed reductions and/or course alteration in case of whale sightings within designated approach speed, approach/departure routes, reduced vessel speed, ten knots or less, and/or alteration of course in case of sighting of marine mammals within designated shipping route." [As read.] And they went on to say: "Marine mammal interactions within the vessel turning radius are uniquely" [As read.] And then the last bullet: "Bilcon also stated in its commitment table that it would not permit a ship speed in excess of 12 kilometres an hour during the transit from shipping lanes to the marine terminal." [As Page 531 or around waters frequented by fish and shall conduct blasting by taking into consideration DFO measures to avoid causing harm to fish and fish habitat under the Nova Scotia pit and quarry guidelines." [As read.] What did Bilcon say, in the right-hand column: "Blasting will be guided by Bilcon of Nova Scotia's Corporation's blasting protocol and adhere to the Department of Fisheries and Oceans guidelines for the use of explosives in or near Canadian fishing waters." [As read.] Bilcon anticipated the very types of conditions that came up and were applied in the much bigger Black Point quarry ten years later. That's why I think it's helpful to in	the hearing, so it was written in 2003, or 2004 or 2005. So Bilcon actually anticipated this issue and they said, this is the right-hand column, the bottom bullet on page 4 of appendix C: "Vessel speed reductions and/or course alteration in case of whale sightings within designated approach/departure routes, reduced vessel speed, ten knots or less, and/or alteration of course in case of sighting of marine mammals within designated shipping route." [As read.] And they went on to say: "Marine mammal interactions within the vessel turning radius are uniquely" [As read.] And then the last bullet: "Bilcon also stated in its commitment table that it would not permit a ship speed in excess of 12 kilometres an hour during the transit from shipping lanes to the marine terminal." [As Page 531 or around waters frequented by fish and shall conduct blasting by taking into consideration DFO measures to avoid causing harm to fish and fish habitat under the Nova Scotia pit and quarry guidelines." [As read.] What did Bilcon say, in the right-hand column: "Blasting will be guided by Bilcon of Nova Scotia's 11 Corporation's blasting protocol and adhere to the Department of Fisheries and Oceans guidelines 14 for the use of explosives in or near Canadian fishing waters." [As read.] Bilcon anticipated the very types of conditions that came up and were applied in the much bigger Black Point quarry ten years later. That's why I think it's helpful to in

Page 533 Page 534 1 1 assessment process carefully. In the result they which were ordinary in the scheme of things, as we 2 2 see from my chart there, exhibit -- appendix C, came up with mitigation measures that were ones that 3 3 Bilcon had anticipated were required ten years ago cabinet could have actually rejected their SAEE 4 4 because of all the expertise that they had involved. finding and then said, "Here are some ways of 5 5 So I think that helps, it certainly confirms to me dealing with that." 6 6 and I think should have confirmed to Canada ten years The JRP did not want to hand the 7 7 before, that you know, there was -- everything that Governor in Council mitigation measures that the 8 8 they were -- might have been concerned about could governor in council could use, and it is really 9 9 have been handled, in terms and conditions. astounding how the Governor in Council considered 10 10 PROFESSOR SCHWARTZ: Let me go back a that report complete enough to act on. But 11 11 Mr. Connelly says it was complete. His evidence is step before pressing you a bit more on that. 12 12 If I understand your report correctly, they considered the report carefully and considered 13 13 your contention is that if Government of Nova Scotia it and were able to make a decision. 14 14 and the Government of Canada had seen any other So, what's fascinating, Professor 15 15 deficiencies in the JRP panel, they would have Schwartz, is I went through the JRP report just a 16 couple of days ago and found something, a couple of 16 identified them and sent them back to the panel. But 17 17 isn't it possible that because the CCV approach was important statements which I think will help you 18 considered sufficient to dispose of the applications 18 determine whether or not you agreed that, in fact, 19 that JRP panel did, in fact, assess the significance 19 that the Nova Scotia government and Canada didn't 20 20 think very hard, or at all, about these other issues? of environmental effects and did consider mitigation 21 21 measures but they just didn't bother to report them. THE WITNESS: I agree with that and I 22 22 For example, if you turn to page 84 of the think the JRP's report was intentionally designed to 23 23 JRP Report -- I don't know if I have a copy of it not provide mitigation measures to the GIC because 24 handy. I have the quote. Yeah. Sorry, it is page 24 they knew very well that the JRP understood very 25 20. Page 20. I'm very sorry. 25 well that, had they identified mitigation measures Page 535 Page 536 1 Let's look at page 20. 1 So, they say very clearly in that 2 I'm looking for a phrase that says, 2 statement that when determining -- and they are not 3 3 talking about SAEE here, they are talking about the begins: 4 4 "When determining the nature and normal kind of environmental effects. They say they 5 effects and significance of 5 looked at all of those things. Now, they say environmental effects," on page 6 6 something similar at page 83 and, in fact, they say 7 7 20. it even more clearly at page 83. They say -- and I'm 8 8 Anybody have that? sorry, my copy is not marked up. It is a phrase that begins "the panel's analysis"..." Can anybody help 9 9 PRESIDING ARBITRATOR: In the middle 10 10 of the right... me with that? Yes, it is at the bottom of page 83, 11 THE WITNESS: Yes, thank you. Thank 11 under the heading "Adequacy Summary". It is about 12 you, Judge Simma. 12 eight lines from the bottom of page 83: 13 Yes: 13 "The panel's analysis of the 14 14 project has identified the When determining the nature and 15 15 adverse and positive significance of environmental 16 16 effects, the panel analyzed and environmental effects expected 17 17 evaluated the information from the project." [As read.] 18 provided along with the 18 And that's when that other phrase that 19 19 monitoring and mitigation we've always looked at, most environmental effects 20 proposed in order to draw 20 would be judged not-significant, but they do say, 21 conclusions about the adequacy of 21 they do say: 22 the proposed measures and 22 "The panels' analysis identified 23 23 the adverse and positive predicted effects on valued

24

25

environmental components." [As

read.]

24

25

environmental effects ... on the

project." [As read.]

read.]

And then they say actually -- where

"Based on its comprehensive

information provided ..." [As

done a comprehensive job, that they looked at the

valuation, they looked at the mitigation, et cetera,

measures, but it can be clearly implied that they --

everything carefully. We looked at whether or not

reporting. That was a problem with the report in

doesn't necessarily mean -- mean that it can't be --

to anything else. Well, they clearly did not find

Governor in Council had wanted to act in a forthright way, they would have sent it back and say articulate those mitigation measures. They didn't want to hear them either because for political reasons they wanted to kill the project.

PROFESSOR SCHWARTZ: But I think you've actually reinforced the concern I was trying to get at. We don't know on a hypothetical do-over precisely what a panel acting absent the CCV issue would have identified as significant adverse effects or which specific mitigation measures it would have proposed. We can't project that on the basis of earlier decisions because earlier decisions seem to have been arguably have been overwhelmed by the CCV decision.

So you seem to be saying, yes, but if we look at comparable projects in the area, larger area, look at what mitigation measures were proposed by various panels or proposed by various governments and, as I understand your evidence, you believe that the proponent at Whites Point had anticipated all of those. So, we would have to accept that there's no possibility, no reasonable possibility, that a panel or the Nova Scotia government or the Government of Canada, acting reasonably, would have identified

Page 539

Page 540

adverse effects or would have specified mitigation measures beyond what the proponent itself proposed. I know that's a long sentence, but that seems to be the upshot of your evidence.

The counter concern is, you know, certainty is a big issue in these NAFTA case cases in assessing damages. Are we being unreasonably speculative about anticipating what adverse effects would be identified and what specific mitigation measures would be proposed on a reasonable consideration absent the CCV issue.

THE WITNESS: Well, I'm not sure what the burden of proof is on these issues because I've not appeared on a NAFTA panel before. But if the burden of proof is let's say the balance of probabilities for the sake of argument, in my opinion, having looked at the available comparative projects, all of which involve quarries or marine terminals and issues of whales and fish and explosives and all of that, every other one of them was approved, that I could find, by Canada or Nova Scotia, and with mitigation measures that are not in any way materially different from what is -- what was -- Whites Point came up with.

Now, Mr. Connelly has annexed to his

first witness report in which he summarizes what he said are 18 concerns that he found lingering in the Whites Point JRP panel about the project. I went through those 18 concerns and I asked myself: Have -to what extent have these concerns that he identified in his annex been actually taken care of in other projects in Nova Scotia or in Canada by terms and conditions? And I, without going through it -- I could go through it. I've got an analysis here that I just made in handwriting of those 18 concerns. I found, my general overall finding was they could certainly be and were in other cases taken care of by terms and conditions, none of which were much different, in any way materially different than those things that Bilcon had proposed. And to the extent that you think that this is an important issue, I'd be happy to provide a more articulated comparison of table of his concerns versus what has been -happened in other cases for the help of the tribunal.

PROFESSOR SCHWARTZ: I will just ask one or two more questions. You refer to "terms and conditions" but terms and conditions in your table is sometimes stated in a fairly general way. Not a criticism, but the fact of the matter is you could say we are going to comply with blasting guidelines

1 point, 100 million versus 400 million. 2 3

interesting point.

Annual rock production at White Point was going to be 2 million tons a year approximately versus 7.5 million tons a year peak at Black point. And then frequency of blasting, this is a very

What is the frequency of blasting going to happen at Black Point at full production? 200 days a year.

So they would potentially -- and yet the mitigation measures that were applied to them are the same mitigation measures, in effect, follow DFO guidelines. So, you know, I don't know how it can -you know, I think this helps put those guidelines in perspective.

If Black Point is proceeding after the approval, which I understand it is, they must not feel that they're -- that this has caused them to have a problem. And I don't know that that would be the case with any of the other mitigation measures. You know, actually, the Canadian Environmental Assessment Agency wanted to actually specify in conditions for Black Point a speed limit for vessels as it came into areas frequented by whales, and the Minister declined to do that. So it is just an

times of day. So if you have a general concept of complying, there still would seem to be a lot of flex in there for different terms and conditions. some of which might have a significant impact on the economics and viability of the project. THE WITNESS: Well, you are right. It could, but the -- let's consider that in Black Point they were going to blast, I've got it in here, but I think it's twice as much as Bilcon was proposing. They had to, in order to fill up many more ships. So it would be potentially much more difficult for them to restrict their blasting activity to certain days or hours or whatever than

or we'll have some set-off but, as a panel, we might

be wondering, well, there's a whole lot of different

ways you could comply with blasting guidelines or

set-offs. So, one way of complying, for example, is

you don't blast certain times of years or certain

Bilcon, which was only proposing to blast, I think it was 12 times -- here we go. If you go to my August reply report on this very point, you'll see page 53, there's a table where I compared statistics between White Point and Black Point. And you can

see that there are, you know, many more times rock reserves to be exploited at Black Point than White

Page 543

Page 544

example where these conditions are somewhat general.

But here's the fascinating point about Whites Point. As I understand it, and I think we heard that evidence today and it only entered my consciousness for the first time, Whites Point is not actually increasing vessel traffic through the Bay of Fundy more than existed prior to Whites Point.

As you heard, there's been one vessel coming from Baysville to fulfill their aggregate requirements in New York up till recently, or up till 2010, and so to the extent that Bilcon said we need -- they need one vessel a week, 52 ships per year to go in and get rock shipments, that would, in effect, be a replacement, a replacement of that vessel traffic. So, actually, in actuality, Bilcon's Whites Point Quarry would not have caused any adverse effects on whales or lobsters more than whatever vessel was transiting that Bay of Fundy for the ten or 15 years before that that they were contracting to get gravel from Baysville, which is on the Bay of Fundy.

This is a very fascinating point and yet it's not considered in the speculations of Dr. Blouin or Ms. Griffiths or anybody else when they talk about whales. This project, Whites Point, would

not have increased the shipping activity beyond that which was already occurring. So all this consideration of what restrictions there might be on economic viability because of whales or lobsters or anything like that has to be put in context, and the context is that this project, as I understand the evidence, is not actually going to increase it beyond that which already existed.

PROFESSOR SCHWARTZ: Just a few quick follow-ups.

So that your consideration of the -whatever it was, 18 points submitted by Connelly, that's in the material?

THE WITNESS: No, because I didn't have -- I wasn't able -- that came in his -- I think it's his November -- I don't know, it came in his first report. I could have actually articulated those things in writing before. I didn't really get around to that. I had four expert witness statements filed contrary to mine. I was pretty busy trying to read them all and coming and trying to analyse them, and I didn't get a chance. But since I knew that Mr. Connelly had referred again in his rejoinder witness statement to concerns of the JRP. I went back and looked at his annex 2 or 3.

25

2	whether, had the JRP not based	2	process, the Whites Point EA process; okay?
3	its findings on the CCV factor,	3	A. All right.
4	the Ministers could have	4	Q. So, first of all, the Whites
5	nonetheless refused approval for	5	Point JRP's mandate was to carry out a review of the
6	the project." [As read.]	6	Whites Point Project under the Canadian
7	So that's an encapsulation of the	7	Environmental Assessment Act and the Nova Scotia
8	first issue that you looked at in this report?	8	Environment Act; is that your understanding?
9	A. That is, subject to that same	9	A. That is my understanding.
10	clarification on cabinet and the Nova Scotia	10	Q. And just for ease of reference,
11	Minister being the more precise way to describe the	11	I'll refer to these statutes as the SAEE and the
12	decision-makers who were ultimately exercising the	12	NSEA.
13	statutory discretion.	13 14	A. Okay.
14 15	Q. Okay. And then also in your	15	Q. And as the Whites Point Project
16	second report, the report that was filed with the	16	was subject to an EA under both of these statutes,
17	reply, if you look in paragraph 14(b), you note that the second section of the report explored the	17	in order for it to be built and operated, it had to be approved under both of these statutes; correct?
18	recourses that were open to the claimants in	18	A. That is my understanding as well.
19	Canada's domestic courts and how these recourses	19	Q. So, you wouldn't take issue with,
20	interacted with the NAFTA process; correct?	20	if just one of the Nova Scotia or federal
21	A. That's correct.	21	governments decided not to approve the project or
22	Q. So, in light of what you've	22	decided not take action that would allow it to
23	addressed in your reports, I want to ask a few	23	proceed, then the project couldn't be built or
24	questions about the mandates of the Whites Point JRP	24	operated; correct?

Page 557 1 understanding is there was some coordination in this 2 case, as there often will be, to try to align 3 outcomes so that there is a more effective process 4 than simply what would have occurred if you had gone 5 to each level of government and pursued the environmental approval. So subject to that goal of 6 7 some coordination, it is clear that there was a 8 different statutory mandate in each of those 9 decision-makers case under the two statutes you 10 referenced. Two different documents conveying the 11 decision, again, in my understanding of the record, 12 are present, one from the federal cabinet and one 13 from the Nova Scotia Minister who I just referred 14 to. So, I think you're capturing my understanding 15 as well. 16 Q. I'd like you to turn, please, to 17 tab 1 of the binder which is Exhibit C-336, please. 18 Now, this is a document entitled the 19

Agreement Concerning the Establishment of a Joint

Review Panel for the Whites Point Quarry and the Marine Terminal Project, and it is between the Minister of Environment of Canada and the Minister of Environment and Labour of Nova Scotia.

Now, you reviewed this document in preparing your reports, correct?

Page 558

- A. I reviewed a number of documents relating to the JRP. I do believe that saw this document but, again, I don't recall referencing it in either of my reports.
- Q. Can you look at paragraph 35 of your Reply Expert Report, please? I'm at the bottom of page 10 in paragraph 35 and there you state:

"Since the language of the CEAA and NSEA differ, it is important to consider the terms of reference of the JRP itself which reflects the blended mandates of both Ministers under each governing Act."

Now this document contains the terms of reference so...

- A. And I did refer to the terms of reference and reviewed that in some detail.
 - Q. So did you review this document
 - A. I did.
- Q. So the document at Tab 1, it is a nine-page document and I'd like you to turn to the fourth page, please. In particular, at paragraph

then?

Q. Okay. So just to be clear then,

the JRP had to carry out its review in a manner that discharges the requirements of both CEAA and NSEA; is that correct?

A. That is my understanding.

Q. Okay.

A. Yes.

Q. And the JRP was also responsible for making recommendations to decision-makers on what it found in the course of its review: correct?

A. Yes.

Q. Okay. Let's look now at section 6 of this agreement. Section 6 is entitled "Record and Review". Sorry, "Record of Review and Report."

Now, this section of the agreement gets into how the JRP was supposed to convey its recommendations once it completed its review. I'll just note that paragraph 6.2 for context provides that once the panel completed its review, it was to prepare a report for submission to the Nova Scotia Minister of Environment and Labour and the Minister of Environment Canada.

Now I'd like you to look to paragraph 6.3, please.

Are you there?

A. I am.

Q. Now, this paragraph is contained under a heading entitled "Conduct of the Review by the Panel". Do you see that?

A. I do.

O. And paragraph 4.1 states that: "The panel shall conduct its review in a manner that discharges the requirements set out in the CEAA, Part IV of the NSEA, and the terms of reference attached hereto."

Dean Sossin, do you agree with me that paragraph 4.1 reflects the mandate of the Whites Point JRP in carrying out the Whites Point EA?

A. If I understand your question correctly, the document at this stage is indicating that there are these two different statutory schemes that are empowering the two Ministers in the conduct of this JRP, that is to say the JRP needs to fulfill a function that each of those statutes will then be able to adapt or adopt into the decision-maker's context and that is correct. That is my understanding.

Page 560

Page 561 Page 562 1 A. Yes, I have it. under CEAA or the Nova Scotia Environment Act 2 2 Q. Looking at paragraph 6.3 would indicates a range of things are to be considered, 3 3 you agree with me that as regards the federal side and the responsible decision-makers purport to enter 4 4 of the JRP's mandate, the JRP's report was to into an agreement that something less than that that 5 5 include recommendations on all factors set out in range will be considered, in my view, that certainly section 16 of the Canadian Environmental Assessment 6 raises a question about the extent to which there is 6 7 7 authority in those statutes for those Act? 8 8 A. Yes. decision-makers to fetter their discretion. 9 9 Q. Yes, you are agreeing? The broader point from my experience 10 A. Yes, I see that in 6.3 that the 10 and expertise is this authority is not the 11 Minister's or cabinet's or the government's. It's 11 report shall include recommendations on all the 12 12 the legislature and Parliament that has conferred a factors set out in section 16. 13 13 role on these decision-makers so it is not open to So I'm not clear on the question 14 14 you're asking in terms of my review or my experience them on their own to change or alter what is a 15 15 but I do see that reference. statutory authority that they are under an 16 16 Q. Okay. obligation to discharge. 17 17 A. And I guess the response is just So, again, I haven't addressed the 18 trying to make clear that the terms of reference 18 question because it wasn't asked to me about 6.3 and 19 clearly state what they state. I think there was a 19 its consistency with the full palate of obligations 20 question or is a question. It's not one I was asked 20 that each of those decision-makers would be under, 21 under various sections of their Act. 21 to opine on specifically as to whether, in terms of 22 22 reference of a JRP it's open to the relevant Again, but with that question aside, 23 statutory decision-makers to fetter their discretion 23 I don't want to be unduly cumbersome to the 24 24 questioning and I certainly take your point that in any way. 25 25 In other words, if the discretion this is an agreement that the decision-makers Page 563 Page 564 1 entered into and it clearly states that all the 1 the report and with the approval of the Governor in 2 2 factors under section 16 of CEAA would be Council respond to the report; right? 3 considered. 3 A. That is what it indicates, yes. 4 Q. Okay, if you can look at 4 Q. Okay, yes, that's all I was 5 5 asking. I think you gave me a response to a paragraph 6.7. Would you agree with me that this question I didn't ask there, but so we can just keep 6 provision reflects the decision-making mandate of 6 7 7 it simple. My questions are going to be pretty the Nova Scotia Minister after getting the JRP's 8 8 simple. report? 9 9 A. Well, let's hope that will be the A. Again, that's a question that first and only time. 10 10 speaks more to the statutory scheme than to this 11 Q. Okay, thank you. So looking at 11 agreement. So the Nova Scotia Minister is under the 12 paragraph 6.3, would you agree with me that as 12 authority of that Environment Act and its 13 regards to the provincial side the JRP's mandate, 13 provisions. And as I indicated earlier, that can't 14 14 the report to the JRP was required pursuant to Part be altered simply by entering into an agreement --15 IV of the Nova Scotia Environment Act to recommend 15 Q. I'm not suggesting it can. I 16 16 asked you if you agree that this provision reflects either the approval including mitigation measures or 17 the decision-making mandate of the Nova Scotia 17 the rejection of the project? Minister after getting the JRP's report? 18 A. That is what it indicates, yes. 18 19 19 Q. If we can look now at paragraph A. It is what the document indicates 20 6.6. Paragraph 6.6 sets out the mandate of federal 20 it reflects. I think it's fair to infer what the

21

22

23

24

25

absolutely.

21

22

23

24

25

correct?

A. Yes.

decision-makers once they receive the JRP's report;

O. And what it provide is that the

responsible authority shall take into consideration

Minister believed the appropriate role to be since

The only point I don't want to be

heard to be giving an opinion on is whether or not

this is an agreement between those Ministers so

Page 565 Page 566 1 1 this captures the entirety of the Minister's force. But just to confirm that we're on the same 2 2 statutory discretion under the Act. In other words, page, it was the CEAA 1992 that applied to the EA of 3 3 these options and only these options, that's the the Whites Point Project? 4 A. That's correct. 4 analysis I haven't had a chance to undertake but would be important to before answering in the 5 5 Q. Okay, if you could turn, please, 6 6 affirmative the question as I heard you pose it. to section 16 CEAA. It's at page 9. 7 A. Yes, I have it. 7 Q. Okay. But it's not -- I wasn't 8 8 suggesting that the Minister had to take one of O. This is a section called "Factors 9 9 these options. It simply provides that the Minister to be Considered." Looking at subsection 16(1) 10 10 would you agree with me that pursuant to this had to consider the recommendation of the JRP and 11 subsection, every environmental assessment by a 11 then exercise one of these options; correct? 12 12 review panel is to consider the environmental A. Yes. 13 13 effects of a project, the significance of those Q. Now, all of these provisions of 14 14 effects and measures that are technically or the JRP agreement, they refer to the CEAA and the 15 economically feasible that would mitigate against 15 NSEA as you've noted so I want to drill down a 16 any significant environmental effects of the 16 little bit into these statutes. 17 17 If you could please turn to Tab 2 of project. 18 the binder which is Exhibit R-1. 18 A. Broadly speaking, yes. 19 19 Q. Okay. And there are other A. Right. 20 20 factors set out in 16(1) such as comments received Q. And that is a document I'll refer 21 21 to as the CEAA 1992 if it's okay? from the --22 22 A. That's why I said "broadly A. That's fine. 23 23 speaking", but again I take your point to have on Q. All right. And there is another 24 24 the record the relevant key aspects that were document that you've referred to in your report or 25 25 another statute called the CEAA 2012 that's now in guiding the discretion and certainly that's the Page 567 Page 568 1 point of departure for my analysis as well. 1 A. Yes. 2 Q. Okay. And then if we get to 2 Q. There in you say in reference to 3 section 16(2) on the next page. This provision 3 section 37 that: 4 provides that every assessment by a review panel is 4 "A responsible authority with 5 to include consideration of other factors, 5 approval of the government in 6 6 council, must take one of two additional factors. 7 7 courses of action following a EA If we look at paragraph (d) those 8 8 by a review panel". include the: 9 9 "The capacity of renewable And then you summarize those. You 10 10 resources that are likely to be say: "First, if the project is not likely to cause 11 significantly affected by the 11 significant adverse environmental effects or if such 12 project to meet the needs of the 12 effects are likely but GIC believes these negative 13 present and those of the future." 13 environmental effects can nevertheless be justified, 14 14 the Responsible Authority may exercise any power or [As read.] 15 A. Yes, I see that section 2(d) 15 perform any duty that would allow the project to 16 proceed." 16 provision. 17 And your reference here is paragraph 17 Q. Now, let's look at subsection 18 18 37(1)(a) of the CEAA; is that correct? 37(1) of the CEAA. It's at page 17 of the document. 19 19 A. Yes I have it. A. Yes, I see that reference there 20 Q. And it's contained under heading 20 as well. 21 called "Decision of Responsible Authority." 21 Q. And turning the page you say: 22 22 "If the project is likely to cause A. Yes. 23 23 significant adverse effects that cannot be Q. And you mention this one in your 24 24 justified, the RA may not exercise any power or reply expert opinion so I want you to turn to that, 25 25 perform any duty that would allow the project to please, particularly at paragraph 20. Okay?

Page 570 Page 569 1 1 approval of the Governor in Council. proceed." 2 2 And your reference here is paragraph A. My understanding is that the 3 3 37(1) (b); is that right? Governor in Council is the decision-maker and that 4 4 A. Yes, that's right. these references, while there are some differences 5 5 Q. If we could look back to in the relationship between the Responsible 6 6 section 37(1) it might be easier in the statute. Authority and Cabinet, particularly in that later 7 7 piece of legislation you were referring to in 37(1), Now I take it from your summary of 8 8 subsection 37(1) of paragraph 20 you don't take if that's the question, was Cabinet the responsible 9 9 issue with the fact that any course of action by a decision-maker for the ultimate determination, yes. 10 10 And if the Responsible Authority was going to take Responsible Authority under this provision is 11 action under this, would that have to be in 11 subject to the approval of the Governor in Council; 12 12 would that be correct? alignment with Cabinet; is that -- do I have the 13 13 A. Under 37(1) you are referring to? question right? 14 14 Q. Yes. And for ease of reference Q. Yes. So I'll say is it again to 15 15 you can look to what you say in paragraph 20. you just so we're on the same page. 16 16 A. Yes. A. Sure. 17 17 Q. So it's any decision or course of Q. So you don't take any issue with 18 action by an RA under CEAA subsection 37(1) is 18 the fact that any course of action by a Responsible 19 subject to the approval of the GIC; is that correct? 19 Authority under SAEE subsection 37(1) is subject to 20 20 A. Where there is the presence of the approval of the Governor in Council? 21 21 the significant adverse environmental effects that A. I don't take issue with that, no. 22 22 cannot be justified; is that your question or just Q. Okay. And just so we're -- maybe 23 generally? 23 makes it easier, we can look at paragraph 37(1.1)(a) 24 24 says that a Responsible Authority to exercise Q. I'm asking generally if any 25 25 action taken under section 37(1) is subject to the discretion in responding to the JRP's report must be Page 571 Page 572 1 approved, correct? 1 simply make a decision under this authority that, 2 A. That's correct. I just wasn't 2 for example, was based on no evidence or flew in the 3 sure of the context in which the line of analysis 3 face of the evidence that was provided. If that's was taking me, but I know that will be unfolding 4 the question, does the scope extend to that kind of 4 5 5 discretion? I would say the answer is "no." shortly. 6 If the question as I understood it is 6 Q. Okay. And then under paragraph 7 7 37(1.1)(c) provides that any action taken by the this encumbered by a specific criteria under 8 Responsible Authority must be in conformity with the 8 section 37, then I do not see the criteria in the 9 9 approval of the Governor in Council. statute that would specifically encumber cabinet. 10 10 A. Yes, that's right. There is obviously other criteria. 11 Q. Would you agree with me that 11 You took me to section 16 already that speaks to a 12 subsection 37(1.1) says nothing about how the 12 range of factors will animate the decision overall. 13 Governor in Council is to go about providing its 13 So, in short, my point is simply that 14 14 approval or the circumstances in which it's to the context for this broad grant of discretion 15 15 remains bounded as all broad grants of discretion provide its approval of the RA's response? 16 16 A. Well, that's an interesting will be, at least in the domestic administrative law 17 17 question. So the provision that you've taken me to, with which I'm familiar and the constitutional and 18 that is, 37(1.1) does not refer to specific 18 rule of law principles, by set boundaries that are 19 19 conditions. But if the scope of the question is: both going to be tied to the overall purpose and 20 Could the Governor in Council, for example, act 20 context of the statute and to the specific record in 21 without evidence, act without there being a 21 front of the cabinet decision-makers. 22 foundation in either the JRP or subsequent 22 Q. Okay. You've posed an answer to 23 information sought and obtained in a legitimate and 23 a question that I didn't ask?

24

25

A. Well, that's twice.

Q. Yeah. So just answer the

24

25

lawful way by the Responsible Authority. In other

words, can the Governor in Council, can cabinet

Page 576

Page 573 1 question. I think you did answer it but to be fair 2 you posed and you answered another question. 3 A. So just to be clear and I'll be 4 as explicit as I can be, often the questions are coming in a context. So to answer that question out 5 of context would not be consistent with the views 6 7 I've expressed and what I will endeavour to do is 8 ensure I understand the context within which you're

I can.

Q. Just so you know, the context that I'm asking is what the statute provide, as simple as that. So I think you gave me the answer but I want to be clear.

asking and answer again as briefly and as clearly as

You'd agree with me that subsection 37(1.1) says nothing about how the Governor in Council is to go about providing its approval or the circumstances under which it is to provide its approval?

A. Yes, read on its own the answer is goings "yes". Statutes are not read on their own at least in Canadian Public Law so a provision would be read in context with the statute generally and that context, of course, would inform constraints on the discretion. So yes, you are correct in this

section there are no criteria listed or constraints set out. It would not be correct, however, to say that that discretion is unencumbered by any criteria or boundaries.

Q. There is nothing in subsection 37(1.1) that provides the Governor in Council is bound by a JRP Report in providing its approval; correct?

A. That's correct.

Q. Okay. And just to be clear, looking back at subsection 37(1), it provides that the Responsible Authority must take into consideration the JRP's report but there's nothing in subsection 37(1.1) that requires the Governor in Council to take into consideration the JRP's report; correct?

A. There is not a provision in that part of the statute, no.

Q. If you could look to paragraph 31 of your second report, please?

A. Yes.

Q. In paragraph 31 of your second report you state:

> "If the Ministers wish to rely on additional evidence or

1 experience with Canadian Public Law that I'm 2 familiar with. 3 Q. I'm simply starting with the

statute though right now, okay.

A. Yes.

Q. All right. So would you agree that any additional actions, to use your words, by the JRP could result in new or different findings or recommendations?

A. In other words, in a scenario where additional clarifications were sought or information requested from decision-makers to the JRP, could they have come up with additional information, factors, analysis? I would say that is correct.

Q. Okay. All right, Dean Sossin, let's turn to the Nova Scotia Environment Act which is at tab 3. That's Exhibit R-5 for the record.

Now I want to as we with did with CEAA, just look at what the JRP was supposed it do in conducting a review in a manner that discharges the requirements of Part IV of the Nova Scotia Environment Act.

If you could turn to paragraph 34 please of your second report?

information not contained in the record of the JRP, they could have requested that the JRP undertake additional actions." [As read.]

Do you see that?

A. I do.

Q. So, I take that you don't preclude the possibility that if faced with such a request by the Ministers, the JRP could take further additional actions in connection with such evidence or information that you refer to there?

A. Yes. And just to clarify, the question that was posed to me initially on which I offered my views was that the actual record in this case and the actual decisions reached. For example, the decision not to seek clarifications from the JRP, seek additional information. So in the abstract, your characterization is to my understanding correct. In this context we actually have a record of what was asked or not asked, what was clarified or not clarified so we don't, or at least I wasn't looking at this as an abstract exercise of statutory interpretation, but one applied to this context, again, within the

23

24

25

(613) 564-2727

Q. Okay. Now, in light of what

has a different statutory mandate than a review

we've just discussed, a review panel under the NSEA

	Page 577		Page 578
1	A. The one that begins:	1	evaluation of the likelihood of adverse effects and
2	"Under the NSEA"	2	significant environmental effects be part of a
3	Q. That's it. So here you state	3	review panel's mandate under the NSEA?
4	that:	4	A. Can you repeat the first part of
5	"Under the NSEA panels are	5	your question?
6	authorized to evaluate the	6	Q. I simply referred to the first
7	likelihood that a project will	7	the preamble, the paragraph 34 which is that you say
8	cause 'adverse effects and	8	that:
9	significant environmental	9	"Panels are authorized to
10	effects'."	10	evaluate the likelihood that a
11	And then you list some definitions	11	project will cause adverse
12	from the Act. And these are adverse effects,	12	effects and significant
13	environmental effect and significant; right?	13	environmental effects"
14	A. That's correct.	14	A. That is my understanding, yes.
15	Q. And we heard these terms earlier	15	Q. So in light of that, I asked:
16	today in the cross-examination of Mr. Estrin. And I	16	"Is the identification and
17	want to just discuss a few aspects of them in terms	17	evaluation of the likelihood of
18	of what review panels conducting a review under the	18	such effects part of a review's
19	NSEA are to do in discharging the requirements of	19	panel's mandate under the CEAA"
20	the NSEA.	20	or under the NSEA, excuse me.
21	So, given what you say in your	21	A. Under the NSEA, I would imagine
22	preamble at paragraph 34, specifically that panels	22	so, yes.
23	are authorized to evaluate the likelihood that a	23	Q. Okay. And I would add that the
24	project will cause adverse effects and significant	24	issue of whether such adverse effects or significant
25	environmental effects. Would the identification and	25	environmental effects could be mitigated is probably
	Page 579		Page 580
1	a more accurate determination or description of the	1	panel under the CEAA; would you agree?
2	mandate; would you agree?	2	A. That's correct.
3	A. I would accept that mitigation	3	Q. Because a review panel under
4	plays a key role and is present in the statute and I	4	the CEAA has to consider whether a project will
5	would not disagree with that assessment.	5	cause significant adverse environmental effects,
6	Q. All right. Now, just to be	6	taking into account mitigation under that statute.
7	clear, a review panel under the NSEA doesn't need to	7	Whereas, as we've just discussed, a review panel
8	make a finding regarding the existence of adverse	8	conducting a review under the NSEA is going to
9	effects that can't be mitigated and significant	9	consider whether a project's going to cause adverse
10	environmental effects that can't be mitigated in	10	effects or significant environmental effects that
11	order to discharge its mandate; correct?	11	can't be mitigated; correct?
12	Maybe I'll clarify.	12	A. That's correct. Although, my
13	A. If you could clarify that?	13	understanding is also that the JRP terms of
14	Q. A review panel could make a	14	reference were attempting to blend statutory
15	finding of one or the other of adverse effects or	15	mandates for the panel itself.
16	significant environmental effects in discharging its	16	So, again, my opinion or my views
17	mandate; correct?	17	are, for the most part directed at the
18	A. I believe that is correct	18	decision-makers, their discretion and their decision
19	although some of the details of how panels, in fact,	19	as opposed to the specific decision of the JRP.
20	operate veers into some of the territory that David	20	Although, obviously, these are intertwined on the
21	Estrin has greater expertise on, but I have no basis	21	record in this case so I believe your
22	to disagree with that assessment.	22	characterization would align with my view as well.
23	O Olsay Now in light of what	23	O Olyan A sayala mana mainta an

23

24

25

Q. Okay. A couple more points on

review panels under the NSEA. If you still have

paragraph 34 open?

	Page 581		Page 582
1	A. I do.	1	And I'd like you to read out
2	Q. And in particular, the definition	2	subsection 39(1)?
3	of environmental effect.	3	A. (Reading):
4	A. Yes, I have it.	4	"Upon receiving a referral from
5	Q. Would you agree with me that in	5	the Minister pursuant to
6	discharging their mandate under NSEA, review panels	6	section 38, the Board shall
7	must evaluate any change that a project may cause	7	conduct a public hearing or
8	not only on the biophysical environment but also on	8	review and submit a report and
9	the social-economic conditions of the surrounding	9	make a recommendation to the
10	area?	10	Minister to approve the
11	A. Yes.	11	undertaking, reject the
12	Q. One last point with respect to	12	undertaking, or approve the
13	review panels. And I'd like you to turn to tab 3 of	13	undertaking with conditions." [As
14	the binder which is the Nova Scotia Environment Act.	14	read.]
15	It is Exhibit R-5.	15	Q. So, this reflects what a review
16	A. Yes. I have it.	16	panel is supposed to do in discharging its mandate
17	Q. And are you at section 39 or can	17	under the NSEA; would you agree with that?
18	you turn to section 39?	18	A. Yes.
19	A. I am now at section 39 under the	19	Q. All right. Let's turn to EA
20	heading "Hearing and Recommendation by the Board."	20	decision-making under the NSEA for just a few
21	Q. That's it. So this explains what	21	minutes. If you can keep in the NSEA and it's on
22	the Nova Scotia Environmental Assessment Board which	22	the same page, section 40.
23	is what are what review panels are now called in	23 24	A. This is "Powers of Minister"?
24	Nova Scotia must do in terms of carrying out a		Q. That's it. So section 40(1)
25	public hearing and making recommendations.	25	provides:
	Page 583		Page 584
1	•	1	•
1 2	Page 583 "Upon receiving a recommendation from the Board under section 39,	1 2	Page 584 decisions are to be reached in relation to any other process like a JRP or a panel?
	"Upon receiving a recommendation		decisions are to be reached in relation to any other
2	"Upon receiving a recommendation from the Board under section 39,	2	decisions are to be reached in relation to any other process like a JRP or a panel?
2 3	"Upon receiving a recommendation from the Board under section 39, the Minister may approve the	2 3	decisions are to be reached in relation to any other process like a JRP or a panel? Q. Well, I guess my question is: It
2 3 4	"Upon receiving a recommendation from the Board under section 39, the Minister may approve the undertaking, approve the undertaking subject to any conditions deemed appropriate or	2 3 4 5 6	decisions are to be reached in relation to any other process like a JRP or a panel? Q. Well, I guess my question is: It doesn't really provide anything other than the
2 3 4 5	"Upon receiving a recommendation from the Board under section 39, the Minister may approve the undertaking, approve the undertaking subject to any	2 3 4 5 6 7	decisions are to be reached in relation to any other process like a JRP or a panel? Q. Well, I guess my question is: It doesn't really provide anything other than the three one of the three options that the Minister is supposed to take; would you agree with that? A. With respect to the powers of the
2 3 4 5 6 7 8	"Upon receiving a recommendation from the Board under section 39, the Minister may approve the undertaking, approve the undertaking subject to any conditions deemed appropriate or reject the undertaking." [As read.]	2 3 4 5 6 7 8	decisions are to be reached in relation to any other process like a JRP or a panel? Q. Well, I guess my question is: It doesn't really provide anything other than the three one of the three options that the Minister is supposed to take; would you agree with that? A. With respect to the powers of the Minister and the decision-making? Yes, I would
2 3 4 5 6 7 8 9	"Upon receiving a recommendation from the Board under section 39, the Minister may approve the undertaking, approve the undertaking subject to any conditions deemed appropriate or reject the undertaking." [As read.] A. Correct.	2 3 4 5 6 7 8	decisions are to be reached in relation to any other process like a JRP or a panel? Q. Well, I guess my question is: It doesn't really provide anything other than the three one of the three options that the Minister is supposed to take; would you agree with that? A. With respect to the powers of the Minister and the decision-making? Yes, I would agree with that.
2 3 4 5 6 7 8 9	"Upon receiving a recommendation from the Board under section 39, the Minister may approve the undertaking, approve the undertaking subject to any conditions deemed appropriate or reject the undertaking." [As read.] A. Correct. Q. And if you look at section 39(2)	2 3 4 5 6 7 8 9	decisions are to be reached in relation to any other process like a JRP or a panel? Q. Well, I guess my question is: It doesn't really provide anything other than the three one of the three options that the Minister is supposed to take; would you agree with that? A. With respect to the powers of the Minister and the decision-making? Yes, I would agree with that. Q. Okay. Now, to be fair I'll turn
2 3 4 5 6 7 8 9 10	"Upon receiving a recommendation from the Board under section 39, the Minister may approve the undertaking, approve the undertaking subject to any conditions deemed appropriate or reject the undertaking." [As read.] A. Correct. Q. And if you look at section 39(2) just above that.	2 3 4 5 6 7 8 9 10	decisions are to be reached in relation to any other process like a JRP or a panel? Q. Well, I guess my question is: It doesn't really provide anything other than the three one of the three options that the Minister is supposed to take; would you agree with that? A. With respect to the powers of the Minister and the decision-making? Yes, I would agree with that. Q. Okay. Now, to be fair I'll turn to paragraph 8 of your second report. There you do
2 3 4 5 6 7 8 9 10 11	"Upon receiving a recommendation from the Board under section 39, the Minister may approve the undertaking, approve the undertaking subject to any conditions deemed appropriate or reject the undertaking." [As read.] A. Correct. Q. And if you look at section 39(2) just above that. In relation to review panels, the	2 3 4 5 6 7 8 9 10 11	decisions are to be reached in relation to any other process like a JRP or a panel? Q. Well, I guess my question is: It doesn't really provide anything other than the three one of the three options that the Minister is supposed to take; would you agree with that? A. With respect to the powers of the Minister and the decision-making? Yes, I would agree with that. Q. Okay. Now, to be fair I'll turn to paragraph 8 of your second report. There you do note that the effect of the statutory framework for
2 3 4 5 6 7 8 9 10 11 12 13	"Upon receiving a recommendation from the Board under section 39, the Minister may approve the undertaking, approve the undertaking subject to any conditions deemed appropriate or reject the undertaking." [As read.] A. Correct. Q. And if you look at section 39(2) just above that. In relation to review panels, the powers of the Minister in section 40 are reflected	2 3 4 5 6 7 8 9 10 11 12 13	decisions are to be reached in relation to any other process like a JRP or a panel? Q. Well, I guess my question is: It doesn't really provide anything other than the three one of the three options that the Minister is supposed to take; would you agree with that? A. With respect to the powers of the Minister and the decision-making? Yes, I would agree with that. Q. Okay. Now, to be fair I'll turn to paragraph 8 of your second report. There you do note that the effect of the statutory framework for the decision on the project is to authorize the
2 3 4 5 6 7 8 9 10 11 12 13 14	"Upon receiving a recommendation from the Board under section 39, the Minister may approve the undertaking, approve the undertaking subject to any conditions deemed appropriate or reject the undertaking." [As read.] A. Correct. Q. And if you look at section 39(2) just above that. In relation to review panels, the powers of the Minister in section 40 are reflected in section 39(2); correct?	2 3 4 5 6 7 8 9 10 11 12 13 14	decisions are to be reached in relation to any other process like a JRP or a panel? Q. Well, I guess my question is: It doesn't really provide anything other than the three one of the three options that the Minister is supposed to take; would you agree with that? A. With respect to the powers of the Minister and the decision-making? Yes, I would agree with that. Q. Okay. Now, to be fair I'll turn to paragraph 8 of your second report. There you do note that the effect of the statutory framework for the decision on the project is to authorize the Ministers to exercise their discretion and here
2 3 4 5 6 7 8 9 10 11 12 13 14 15	"Upon receiving a recommendation from the Board under section 39, the Minister may approve the undertaking, approve the undertaking subject to any conditions deemed appropriate or reject the undertaking." [As read.] A. Correct. Q. And if you look at section 39(2) just above that. In relation to review panels, the powers of the Minister in section 40 are reflected in section 39(2); correct? A. That's my understanding.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	decisions are to be reached in relation to any other process like a JRP or a panel? Q. Well, I guess my question is: It doesn't really provide anything other than the three one of the three options that the Minister is supposed to take; would you agree with that? A. With respect to the powers of the Minister and the decision-making? Yes, I would agree with that. Q. Okay. Now, to be fair I'll turn to paragraph 8 of your second report. There you do note that the effect of the statutory framework for the decision on the project is to authorize the Ministers to exercise their discretion and here we're talking about the discretion under section 40:
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	"Upon receiving a recommendation from the Board under section 39, the Minister may approve the undertaking, approve the undertaking subject to any conditions deemed appropriate or reject the undertaking." I do see that.

	Page 589		Page 590
1	project may cause or is likely to cause adverse	1	provisions to be guided in the application of that
2	effects or significant environmental effects?	2	discretion, the answer would be "yes" in my view.
3	A. Could you clarify "conditions" in	3	Q. Okay. One more question about
4	the question that you posed? Are you asking for,	4	the Minister's decision under the NSEA. Unlike the
5	are these the framing regulatory boundaries of the	5	Responsible Authority under the CEAA who has to take
6	discretion or how would you characterize it?	6	action in conformity with the approval of Governor
7	Because the conditioning is a bit unclear to me.	7	in Council, the Nova Scotia Minister doesn't have to
8	Q. Well, I suppose I'm asking if	8	take doesn't have to seek the approval of or act
9	they are the factor that is considered under each	9	in conformity with any other body in the Nova Scotia
10	one of the provisions but for (a) in section 13, the	10	government; correct?
11	significance of adverse effect and significant	11	A. That is my understanding, yes.
12	environmental effects or lack thereof is what feeds	12	Q. Can you turn, Dean Sossin, to
13	into the decision; would you agree with that?	13	your paragraph 9?
14	A. Are you asking me what feeds into	14	A. Paragraph 9 of the August
15	a decision under this regulation or the actual	15	opinion?
16	decision we have? Because of course we have the	16	Q. Yes.
17	decision document. So we have the reference to, for	17	A. On page 3?
18	example, unacceptable and significant adverse	18	Q. That's it.
19	effects in relation to the environment and I'm	19	A. "Without Legitimate Grounds."?
20	paraphrasing from the decision document. But we do	20	Q. Yeah. So here you state:
21	know what the Minister of the Environment and Labour	21	" without legitimate grounds
22	did conclude in this case on this record.	22	to deny approval to the project,
23	Q. Again, I'm not in that world yet.	23	but for the inappropriate
24	A. Okay. So if you're asking (a)	24	reliance on the JRP's finding in
25	rather than (b), so would a Minister look to these	25	relation to CCV, in my view the

So if you look at paragraph 584, for example, of the Arbitral Decision and 583, as well. But 584, in particular, is the provision in which the Arbitral Tribunal makes this point itself. It says the JRP is not the decision-maker. It is the relevant GIC federally, as you pointed out, and the Nova Scotia Ministry of the Environment that had the opportunity to seek additional analysis, had the mandate to consider the entirety of the record, as you've pointed out, the JRP and anything in addition to it that it might need. And it's ultimately the decision-maker that was found to have breached the Articles 1105 and 1102 standards in this NAFTA matter.

So the JRP completed its task and did so in a flawed, unreasonable, inappropriate, arbitrary, unfair way and there is a characterization of many, many adjectives.

It denied a fair, just, expected opportunity I think are the phrases used in varying

So, had that happened, as you pointed out, my conclusion is that acting reasonably, the Cabinet federally and the responsible Minister in Nova Scotia, based on that record and the absence of any other finding of significant adverse environmental effects or the reference of the Nova Scotia Minister to unacceptable and significant adverse effects on the environment, absent anything else beyond that one JRP Report recommendation, there was no other basis for the Minister's acting reasonably with the record they actually had in front of them, in my view, to have denied the project based on this statutory mandate, the dual mandate you've taken me to federally and provincially.

Q. Right. You again just provided a response to a question I didn't ask.

A. So the context I thought you were asking is my understanding of what the Arbitral Tribunal did or said, I should say, in these two paragraphs.

Q. Okay. So that's --

A. That's what I was attempting to provide.

Q. Well, you went into a whole host of elaboration on decision-making and a number of opinions that really aren't even expressed in this second expert report, sir.

A. Well, I thought the second expert report makes it clear that it's based on my analysis of the tribunal's award on liability and jurisdiction or jurisdiction and liability in addition to the other factors.

So that's the basis for the key conclusion that you took me to of why, again, in my analysis I've concluded that acting reasonably the decision-makers would have approved the project. That's the basis for that conclusion that you took me to.

Q. Well let's just rewind a bit because I want to get a clear answer to my question.

I think I know what it's going to be, but I want a clear answer. Would you agree with me that if the Whites Point JRP carried out its mandate to conduct a likely significant effects after mitigation analysis to the whole range of potential project effects as it was required to do by CEAA,

that it would find other likely significant adverse environmental effects of the project? Just a simple response this time.

A. Hypothetically, and in a different context, I don't see why not. Actually, in this context of course we have different information. But hypothetically, if that's the question to speculate on, I have no reason or basis to say otherwise in a speculative context.

O. Okay. And then I take it that your non-hypothetical response, we'll say, is that the JRP only found one likely SAEE; is that correct? Simple answer; is that correct?

A. Yes, that is my understanding of the two decision documents. And my understanding of the arbitral finding was to that effect as well.

O. Okay. And you don't see any inconsistency with that conclusion and what you see in paragraph 452, sir?

A. In paragraph 452 I see the Arbitral Tribunal making a finding that one of the flaws in this process and of course there were substantive and procedural flaws found. One of them was that the decision-makers were not provided a full analysis in the -- again, the evidence that

Page 599

ultimately has come out including the coverage of speeches or CBC interview after-the-fact with the chair of the JRP.

There is a range of things that flowed into that view that the JRP, from either the outset or somewhere along the way, had determined this view around community core values would be its overriding approach. But as David Estrin mentioned earlier and as the record shows, when looked at in its entirety including the Arbitral Tribunal's finding in its entirety, there was nothing at all preventing the decision-makers from obtaining exactly that additional analysis you are referring to if they saw the need for it. And, again, every decision-maker is presumed to understand the statutory mandate under which they're making the decision. And I see no reason that wouldn't apply here.

Q. Okay. And we're not talking about decision-makers yet. And I believe your evidence, sir, was that decision-makers were not provided a full analysis; is that correct?

A. The decision-makers, I characterize one of the errors in the decision included, as set out in these paragraphs, and again Page 600

I was asked to take these findings and give an opinion as to the implications of them. I would not disagree that one of the errors in the decision was that the JRP had taken the approach that it took.

Q. So you agree that the decision-makers were not provided a full analysis by the JRP?

A. Well, the JRP was complete. Obviously the Ministers could not have issued their decision if they didn't believe the JRP was complete. So I'm trying to understand what you're characterizing as a full analysis.

Q. Well, it's actually your word. You said that the decision-makers were not provided a full analysis.

A. Well, if it's my words then it must be right.

Q. Okay, that's good to hear.

A. And you can see I'm not trying to be difficult. I just want to be precise in the hopes of assisting the Tribunal in this distinction between the range of things that could have been done and, again, what was actually done.

O. Okay. Well, it seems to me, Dean Sossin, that you are not far off from paragraph 452

if your conclusion is that decision-makers were not provided a full analysis given that paragraph 452 provide that the JRP did not carry out its mandate to conduct a likely significant effects after mitigation analysis to the whole range of potential project effects; would you agree with that?

A. I would.

Q. Okay. I don't want to belabour the point but I'll ask the question again.

If the JRP provided a full analysis, that is, to conduct a likely significant effects after mitigation analysis to the whole range of potential project effects, would you agree with me that it could find other likely significant adverse environmental effects of the project?

A. Are you asking whether it could theoretically or whether it could on this record?

Q. Well, I think we are a theoretical construct here because we're looking as what could have happened.

Would you agree with me, if the JRP carried out its mandate, to use your words, the JRP provided a full analysis to the whole range of the potential project effects as it was required to do so, that it could find other likely significant

adverse environmental effects of the are project; is that possible?

A. Again, I was asked to give an opinion and my views on what actually did occur. So in a theoretical or hypothetical world, I don't know that I'm qualified to speculate on what could have occurred in that hypothetical set of, you know, set of suppositions or assumptions that you are posing. So there may well be people who could do that, but my opinion has been focussed on what actually occurred.

Q. Okay. I wasn't asking what could occur. I was asking: Is it possible that the JRP, if it provided a full analysis, if it conducted a likely significant effects after mitigation analysis to the whole range of potential project effects as it was required to do, is it possible that it could find other likely significant adverse environmental effects?

A. Maybe the best way to answer you is by saying that I also, in my report, expressly rely on the reports of David Estrin who has spent some time this afternoon, I think, addressing that question based on an analysis.

He didn't seem to come to the

Page 603

Page 601

conclusion that there was a basis in the record for that finding, at least as I understood his discussions. So I just don't feel I'm in a position to answer the question based on my expertise of what could have happened based on this record in a hypothetical, other and different analysis by a JRP.

We do know the JRP had all the information before this time. We do know it considered exactly these kinds of considerations and we do know that it didn't fulfill its task in a way that could be described as appropriate or reasonable. I know those things. But I simply don't have a basis for addressing the question you've asked, if I've understood it.

Q. So you are not going to respond to if it's -- the question of whether it would be possible for the JRP to find other likely significant adverse environmental effects of the project if it had carried out its mandate?

MR. NASH: With respect, he has responded to that question. He just responded to that question. He's actually responded to your question.

THE WITNESS: I believe the response is I don't believe I'm in a position given my

Page 604

expertise and the foundation of the record in this case. But I don't want to be difficult and I don't want to, you know, have you go to unnecessary trouble.

If you want to try reframing or rephrasing, I'm more than happy to try and work with you, but I'm trying to be honest about the expertise I have and what I was asked to give an opinion on in this matter based on the actual decisions and the record I was provided with.

BY MR. SCOTT LITTLE

Q. Okay. Let's move on. I want to try to unpack your opinion in paragraph 9 as it relates to the Minister's decision under the NSEA.

A. Okay.

Q. Now, it seems that paragraph 9 is based on two assumptions. I'm going to phrase them.

One, that there were no legitimate grounds to deny approval to the project. Two, there can be no inappropriate reliance on the JRP's finding in relation to CCV.

I want to take a closer look at the assumptions.

A. Okay.

Q. So the first one is no legitimate

(613) 564-2727

	Page 605		Page 606

7	[As read.]	7	environmental effect on the
8	Q. Okay, one more. Page 77.	8	social-economic health and
9	First column, second paragraph	9	viability of some of the fishing
10	beginning:	10	communities of Digby Neck and
11	"The range"	11	Islands." [As read.]
12	Would you be able to read that,	12	Q. Okay. Now, earlier, Dean Sossin,
13	please, too?	13	we found that the evaluation and finding of an
14	A. (Reading):	14	adverse environmental effect, taking into account
15	"The range of the effect on the	15	mitigation would be relevant to the Nova Scotia's
16	fishery would have environmental	16	Minister's decision under Section 40; correct?
17	repercussions that extend	17	A. I believe that is correct.
18	throughout lobster fishing area	18	Q. So, if these findings remained in
19	34. Displacement of fishers from	19	the JRP Report, and to the extent that the Minister
20	Whites Cove and shipping access	20	relied upon CCV, and he could no longer rely on CCV,
21	areas would force fishers to	21	these findings would be relevant to the Nova
22	relocate. This could put greater	22	Scotia's Minister's decision; correct?
23	pressure on stocks in other areas	23	A. Are you okay if I put that in
24	of LFA34. The effect would last	24	context because that's an important question and I
25	throughout the operation of the	25	don't believe I can give a "yes" or "no" answer, but
	Page 611		Page 612

I would be more than pleased to address it directly.

Q. Maybe answer my question and then you can offer your context.

A. Well, again, I think the answer is part of the context so I would feel uncomfortable giving an answer without the context.

O. Okay.

A. So, the passages you've taken me to are precisely the passages that one would have expected if they rose to the level of the Nova Scotia Environment Act such that the Minister was relying on them as a basis for denying the project, to mention them.

In other words, the decision document refers not to the various concerns you've expressed, but to only one concern as set out in the JRP which is the community core value. So this goes to the view, again, that I've expressed that the Minister was fully apprized of the relevant effects, environmental effects, adverse effects that would have been necessary to reach a finding.

So there is a decision from the Supreme Court of Canada that I believe is analogous on this point, in particular, the Trinity Western University decision of 2001 where the British Columbia College of Teachers performed a rigorous analysis of whether a university could offer teacher training to those wishing to be teachers in the province. And it was found to have undertaken that analysis in an appropriate way, but for one factor. It looked to a discriminatory aspect of the university expression of values in its covenant and found that disqualified it from being able to be accredited.

Supreme Court found that that was an inappropriate consideration, very similar said, but for that, there was no other basis that the College of Teachers had found that would justify not accrediting that body. And it had all that opportunity. It had the full analysis before it. There's no question that it was missing information it needed or that it didn't understand its statutory role. It simply added a provision that was not open to it to add, at least without balancing freedom of religion and other concerns and considerations.

So, the effect of the decision was simply to say that without that inappropriate factor, irrelevant consideration within the language of Canadian public law or administrative law, the decision, in effect, is clear from the record. The

Page 616

only reasonable course of action was to grant the accreditation to the University. And the Supreme Court did so in that case directly through an order of mandamus, coming to the conclusion that there was no further analysis needed.

Now that case didn't involve procedural flaws of the kind that are also found here and we may get into why I've also concluded a likely outcome if it did go through a domestic court process would be a further process, again, before a different ministerial decision-making environment, but that's the conclusion I've reached.

There was no finding of any other significant environmental effects or to use the language of the Nova Scotia Minister, unacceptable and significant adverse effects on the environment. There was no other reference in that decision document to any of the matters you've raised, and no reason why such matters wouldn't be referred to, given the Minister's assumed or presumed interest in wanting the proponents to be aware of exactly why this quarry was not going to go forward in circumstances where everyone was aware that was a very rare occurrence, and a very significant occurrence. So that's the context where I think the

provisions you've taken me to are part of what led to my conclusion itself.

- Q. I am mindful of the time --
- A. No, I am as well --
- Q. And I want to get through --
- A. -- but I thought that was a critical point you raised and I wanted to do justice to an important question you asked.
- Q. If you could turn, please, to Tab 8 of the document or to the binder.
 - A. Yes.
 - O. This is Exhibit R-331.

Now, you said that the decision document refers to just community core values. This is the decision document.

- A. I said -- I believe I said it referred to the panel's report. And the panel's report had reached one recommendation only on the significant adverse environmental effects that were likely which was the community core values even though it had, again, that full record before it.
- Q. Well, I had that you referred -the decision document refers to just community core values but I think we are on the same page.
 - A. I do as well and if I did

Page 615

Page 613

mischaracterize that, you have my apologies.

Q. So in paragraph four, the Minister notes that the definition of environmental effect in the Environment Act is broad in nature and includes any change to the project may have on the environment, including social-economic conditions, environmental health, physical and cultural heritage; correct?

A. That's correct.

Q. All right. And in paragraph 5 the Minister notes:

"The project poses the threat of unacceptable and significant adverse effects to the existing and future environmental, social and cultural conditions influencing the lives of the individuals and families in the adjacent communities."

So, in this determination the Minister refers to adverse effects on environmental conditions; correct?

A. Yes.

Q. And adverse effects on social conditions; correct?

A. The reference here is, as you've read it out, yes.

Q. And adverse effects on cultural conditions; correct?

A. Yes.

Q. All right. And all of these factors, environmental, social and cultural, they are all contained in the definition of environmental effects under the NSEA; correct?

A. That is correct.

Q. All right. And nowhere in this letter does the Minister mention community core values; right?

A. Well the Minister refers to having arrived at the decision after careful consideration of the panel's report and if you turn to the panel's report and the, I believe, seven recommendations that the panel makes, only one refer -- and my understanding -- only one of those seven recommendations refers to an environmental effect that would justify denial of the project, significant adverse environmental effect or likely significant adverse environmental effect, that is, community core values. When it was, as you point out, clear in their record had they actually concluded that after mitigation, for example, those other considerations could not have been addressed

Page 620

to the satisfaction of the project going forward, it was open to them to make those recommendations. And, again, the decision-makers could have sought greater clarification of any of those and if the Nova Scotia Minister, in particular, did believe, for example, that the effect on the lobster fishery justified not approving this project or accepted, for example, that the other considerations you took me to were of such a nature that it rose to a level that was contemplated under the Minister's statutory mandate, I just can't imagine a reason why that link would not be mentioned in this decision document.

In other words, the panel report is mentioned. The panel made one recommendation related to these matters which was the CCV, as you've been referring to it when all those other considerations were before it.

So you have a theory -- you've accepted a theory. That's the wrong way of putting it. You've made a finding in, I believe, it's paragraph 583 of the award on jurisdiction and liability to the effect that the chair believed if other mitigation measures were alerted, the government was alerted to or if there were other environmental effect or adverse effects which could

be mitigated, if those were mentioned, a reasonable outcome would well be approval so they weren't mentioned.

Now, that may or may not be true. I'm not in a position of course to take issue with the analysis. I assume it's an analysis based on the record, but be that as it may, there was no bar on the JRP coming to conclusions about other environmental effects or adverse effects or significant adverse environmental effects. And you'll will forgive me if I'm not getting every term of art exactly correct. That Minister chose not to. So at this point, I don't -- in my analysis and understanding of this decision document, I do not see it as resting on all those other matters which could have led the JRP to make a recommendation in those areas, but for which they chose not to.

Q. Let's -- I'm very mindful of the time now. I'm going to try to ask you two simple questions.

The passages from the JRP Report that you just read into the record are findings of adverse environmental effects that can't be mitigated; correct?

A. Did you see a reference to "that

Page 619

Page 617

cannot be mitigated here"? I'm just looking for you to take me to where it says that.

Q. No, I'm talking about the passages to the JRP report that you referred to earlier that you read into the record --

A. Yes.

Q. -- those were findings of adverse environmental effects.

A. I would have to go back to them. If you want to take me to them again, I wasn't reading them with that precision in mind. If you are of the view they are, and it is not contentious I don't want to belabour this.

Q. Let's assume they are because I don't want to read them into the record again. They are.

And would you agree with me with the Minister's decision letter notes the threat of unacceptable adverse effects to the existing and future environment?

MR. NASH: Well, I think the document should be read correctly. The document does not say that.

MR. SCOTT LITTLE: I'm sorry, unacceptable and significant adverse effects to the

existing --

MR. NASH: Unacceptable and significant. Unacceptable and significant adverse effects to the existing, et cetera.

BY MR. SCOTT LITTLE:

Q. Okay. Would you agree with me that this letter notes the threat of unacceptable and significant adverse effects to the existing and future environment?

A. I certainly would agree it says what it says. Absolutely.

Q. Okay. Would you agree with me that the finding that you read into the record just earlier, would they be inconsistent with the Minister's decision to approve the project?

A. I don't know that I have a basis to offer a conclusion on that kind of speculation. Again, the JRP certainly did not find those various measures justified recommendations that the project be -- approval for the project be denied on that basis. So I have to take into consideration the JRP didn't take that step. And then the decision-makers, the Nova Scotia Minister we are we're talking about in particular, could have and chose not to seek any clarification of whether those

	Page 621		Page 622
1	matters, in the view of the JRP, did justify denial,	1	Now, I want to specifically get an
2	could have asked for further clarification, for	2	understanding of what would remain in the JRP Report
3	example, on exactly that point, chose not to. And	3	for the purposes of your opinion if there is no
4	the only basis for the decision other than that	4	inappropriate reliance on the JRP's findings in
5	characterization of the language that you've now	5	relation to CCV.
6	taken us to, taken me to, is the panel report which	6	So, can you turn to Tab 7 of Exhibit
7	had its one recommendation in relation to	7	R-212?
8	environmental effect.	8	A. Tab 7 of my binder?
9	So that's been the inference that	9	Q. Yes, tab 7. It is the
10	I've drawn based on that line of logic. So I am not	10	JRP Report.
11	in a position to say, based on my expertise, that	11	A. Yes I have it.
12	the effect on the lobster fishery for example could	12	Q. At page 103.
13	have risen to that level for the JRP for the Nova	13	A. Page 103.
14	Scotia Minister and whether that would have been in	14	Q. Yes, the last paragraph?
15	some other, again, hypothetical context on its own	15	A. Yes.
16	or cumulatively part of a reasonable analysis.	16	Q. I have that. In the first column
17	All I can say is, again, what was	17	it states:
18	decided here and the justification offered for that	18	"A primary consideration
19	decision and that's what I was asked to express my	19	influencing the panel's decision
20	opinion on.	20	to recommend rejection of this
21	Q. Okay. I have one more area of	21	project is the adverse impact on
22	questioning. I just want to look at the no	22	a valued environmental component,
23	inappropriate reliance on the JRP's findings in	23	the people, communities and
24	relation to CCV assumption on which your opinion is	24	economy of Digby Neck and
25	based.	25	Islands. The region of Nova
	Page 623		Page 624
	~	1 4	

Scotia is unique in its history
and in its community development
activities and trajectory. Its
core values, defined by the
people and their governments
support the principles of
sustainable development."
So if there's no inappropriate
reliance on the JRP's findings in relation to
community core values, I am wondering if there would
still be a recommendation made by the JRP. So
I have a few questions about that.

So the JRP was legally mandated to make a recommendation that the project should be approved, approved with conditions or rejected so there has to be a recommendation still; correct?

A. And a recommendation was made that as you pointed out has been found to have been inappropriate and unreasonable, yes.

Q. So there has to have been a recommendation made?

A. My understanding from the JRP Report as it flowed is that there was one recommendation that related to these environmental effects and that is precisely the criterion that

you've taken me to that has been found to be unreasonable. So if the gist of your question is: If you take away the CCV, if I can refer to it that way, does that mean there is no recommendation from the JRP? I would frame it differently.

I would say that the JRP concluded that the only basis on which to deny approval was something that now has been discredited as highly problematic.

So when you remove the one basis that the decision-makers had for denying it, then the logical inference that I've drawn is that acting reasonably in the absence of CCV and based on this record, without any other recommendation on the evidence from the JRP, they would have approved it.

So if your question is: But wouldn't that have violated the very statutory condition that requires a recommendation, I come back to paragraph 535 of the arbitral findings that you took me to which is that the reliance on this aspect of the JRP was to the prejudice of the Investors.

So I just, in my view, came to the conclusion that it would not be visited on the Investors. In other words, not to have the conclusion be because of the reliance on this

unreasonable factor, that somehow then there was not a proper foundation for the decision.

This was the only environmental effect that was found to justify denial. And it's been, in effect, removed, like in Trinity Western. They've taken that aspect away. What's left?

What's left is there is no barrier to approval on the record in light of that fact. So that's how I reach the conclusion I did.

Now your point about, but they had to make a recommendation. They did make a recommendation and it's been found to have been inappropriate to the prejudice of the Investors. And I emphasize that because I think it's important in framing certainly my understanding of this matter.

- Q. Okay. So am I correct then that if there's no inappropriate reliance on the JRP's findings in relation to CCV, then the recommendation would be for approval, is that what you're saying?
- A. Acting reasonably, my conclusion is the Ministers would have approved and I believe the record reflects that.
- Q. No, I'm asking if the JRP would have recommended approval with no reliance on CCV?

Page 626

Page 628

A. The JRP had no other basis for recommending denial so I think maybe it's a semantic distinction. No other basis for recommending denial strikes me as ultimately the conclusion would be approval.

If you are asking me to put a recommendation in the language of the JRP Report that was not there, again, I've gone as far as to say once you take away the only legitimate basis provided for denial as not legitimate, the only choice that's left to the Ministers acting reasonably would have been to approve. That's my conclusion.

But, again, I take your question to be a more precise one and I don't know that I'm able to say what the JRP would have recommended. I'm basing my conclusion on the record before the decision-makers.

Q. Okay. So, you don't know what the JRP would have recommended if there was no inappropriate reliance on the JRP's finding in relation to community core value; is that correct?

A. I think the logic of their own analysis, given that they had the ability to choose other grounds and didn't, would be that they would

Page 627

Page 625

have recommended approval. But, again, my expertise is not on the interstices of environmental standards and their assessment. My expertise is on the scope of ministerial discretion, its boundaries and accountabilities.

Q. And your conclusion that they would have recommended approval, qualified as it was, that's despite all the findings of adverse environmental effects that we just reviewed earlier; correct?

A. I'm informed by the JRP's own view that those did not rise to the level of matters that could have justified denial because had they risen to that there is absolutely no reason I'm aware of why they wouldn't have mentioned it.

There is reference, again, in paragraph 583 to a rationale is not a proper rationale and, again, looked at from the standpoint of what should now happen with the Investors' impact of this decision in mind, that informs my view that the decision-makers had the entirety of the record before them and the ability to supplement it. They made the decision in reliance on a factor that no longer can have that impact. There was no other factor recommended as rising to that level by the

JRP.

So, again, I'm only giving you a hard time on what I say the JRP approved because it's asking, I think, for a level of expertise that I'm not comfortable that I have but I do feel comfort in saying the record before the decision-makers did not have another legitimate basis for denial and therefore reasonable Ministers or Ministers acting reasonably or cabinet in the Nova Scotia Minister acting reasonably would have approved in that context.

Q. Those are my questions. Thank you, Dean Sossin.

A. Thank you very much.

PRESIDING ARBITRATOR: Thank you, Mr. Little. Mr. Nash, I trust that your re-direct can be short because I think you have taken, in a

wonderful way, care of your own re-direct.

MR. NASH: Very, very short. Thank you, Judge Simma.

THE WITNESS: And if I have overstepped at any point, I do want to offer Mr. Little my sincere apologies.

RE-EXAMINATION BY MR. NASH:

O. You turn to Tab 3 in front of

Page 629 1 1 you. It is the Nova Scotia Environmental Act? 2 2 A. Yes. 3 3 Q. And could you turn please to --4 4 well just at the first page, the Purpose of the Act. 5 Do you see that on the first page of tab --5 6 6 A. Yes I do. 7 7 Q. -- Tab 3. You refer, you were 8 8 referred to the Nova Scotia Environment Act in Tab 3 9 in your cross-examination and you noted that a 9 10 10 statute must be interpreted in its context. Does 11 11 section 2 of the Act, the Purpose section inform 12 12 your analysis on that point? 13 A. Yes, it does. 13 that page. 14 14 Q. Can you explain why? A. Yes. 15 15 A. So as the Tribunal itself found, 16 16 the structure of this NSEA and of SAEE for that 17 17 matter both look at environmental protection and 18 economic development not as juxtaposed interests but 18 19 as reinforcing and reconciled interest in this 19 20 20 scheme. So looking to the ways in which that is set 21 21 out is important and of course looking to the 22 22 evidence-based nature of the analysis to follow is

> And again if what you wanted to do is give an open-ended discretion to cabinet to, for

example, under the SAEE approve or not approve what they wish to approve or not approve period, there would be no reason to set out purposes. It would be redundant. Why would you do that?

So I take the establishment of purposes here and again in the Nova Scotia and federal legislation for these purposes to be, in effect, the foundation from which the boundaries on that ultimate decision-makers discretion flow.

O. Thank you. Could you turn to page 14 of 55. You will see the numbered pages at the top of the page. In particular, section 34 on

O. You commented on the Minister's exercise of discretion under the Nova Scotia Environment Act.

Could you turn to section 34(1)(f) please and comment on whether that section, subsection factors into your opinion regarding the Minister's exercise of discretion about mitigation?

A. It does. And again clearly states that the undertaking is -- where undertaking is rejected because of the likelihood that it will cause adverse effects or environmental effects,

mitigation is part of that analysis.

equally important.

Q. Thank you. Those are my questions.

PRESIDING ARBITRATOR: Thank you very much. Questions on the part of the Tribunal?

Can I ask one question please: Just as a -- how should I say, as a outsider -- it would occur to me, couldn't the Minister have taken the view that the reliance of the panel on community core values was inadmissible and then gone back to the JRP and said "could you please elaborate. We find your main reason doesn't really carry?"

Would you please elaborate on the various other findings that Mr. Little pointed out? I think you pointed to three or fours finding that say there are problems. Well, I expressed in a very -- problems here and there and here and there, and elaborate what these issues and then get back to

THE WITNESS: Yes, in other words, that stage, after receiving the JRP Report to obtain additional information or analysis or independently to seek information, in other words, from staff or others, not necessarily only the JRP was, in my understanding, available and a decision was actively taken not to seek it. In other words, it's a -- an area of the statute that we must understand every decision-maker to have adverted to and decided if they did not take that opportunity to not take that opportunity.

PRESIDING ARBITRATOR: Uh-hmm. Thank you very much. That was my only question. And that, I think, that brings us to the end of this exercise.

Mr. Sossin you are relieved. You are free again.

THE WITNESS: Thank you.

PRESIDING ARBITRATOR: I note for the record that there we are one witness short today. Mr. Geddes was on for today so my guess is that we will have him tomorrow morning, together with an impressive number of people.

So I just wonder whether anything can be done to, let's say, to prevent any further fall back. Just to mention if everything -- if you don't make -- we would be ready to also sit on Sunday because what can you do on a Sunday in Toronto?

Just relying on that terrible joke I heard about Canada. Is it interesting? Well, what do you do in the afternoon? We could sit in the

1	afternoon so please don't take that as an offence. I
2	love that country. It is just we could
3	actually, we could start half an hour earlier if
4	that at 9:00 instead of 9:30. Would that be okay?
5	So let's start tomorrow at 9:00 and hope for the
6	best.
7	MR. SCOTT LITTLE: Sorry, we are just
8	interested in getting a time check in terms of the
9	time that's been used so far.
10	DR. PULKOWSKI: I can provide that
11	immediately. So I have down for the claimants, 3
12	hours and 44 minutes and the respondent has used 7
13	hours and 7 minutes of the 21 hours allotted to each
14	party. And do let me know if that does not concord
15	with your own time count, please.
16	PRESIDING ARBITRATOR: Any questions?
17	Mr. Little, is that going to end up in a question or
18	can we no further questions.
19	MR. SCOTT LITTLE: We're talking
20	about dinner tonight.
21	PRESIDING ARBITRATOR: Have a nice
22	evening and tomorrow at 9:00 okay, thank you.
23	Whereupon proceedings adjourned at 6:10 p.m.
24	to be resumed on Wednesday, February 21, 2018 at
25	9:00 a.m.
